## Brief Introduction

## COMPANY HISTORY

|               |                     |
|---------------|---------------------|
| Capital Asset | \$28.6 million      |
| Turnover      | \$50.0 million      |
| Area          | 62351m <sup>2</sup> |
| Staff         | 1100                |

## SALES NETWORK Products have been exported to more than 70 countries and areas in the global.

## QUALITY CERTIFICATIONS

In 2013 ,DEGSON laboratory is the first one in Asia which passes UL and VDE approved laboratory certification.

### Visiting UL、VDE

① The general manager of UL global energy & technology division visit our company

② Visiting VDE, VDE office gave a warm welcome to our general manager Mr.Ding.

③ VDE Laboratory Accreditation: In July 2010, VDE Issued the "VDE Authorized Laboratory" Certificate to DEGSON' s laboratory.  
UL laboratory accreditation: UL formally issued "UL WTDP" certification to DEGSON in March 2013.

## PLUGGABLE TERMINAL BLOCKS

Plug-in terminal blocks, provide the wire size from 0.08mm<sup>2</sup> to 10mm<sup>2</sup>. Available with different pitches from 2.5mm to 10.16mm. Choosing insert direction, contact direction, plug-in direction according to requests. The product is designed in accordance with IEC/EN61984, UL1059, CSA C22.2 No.158 standards.

01-11

## PCB UNIVERSAL SCREW TERMINAL BLOCKS

PCB universal screw terminal blocks, this typical feature of the screw connection system is characterized by the easy connection and extremely high contact strengths. Provide the wire size from 0.08mm<sup>2</sup> to 35mm<sup>2</sup>. Available with different pitches from 2.54mm to 15.0mm, and 3 wire insertion directions : 90°, 135°, 180°. The parts can be assembled by 2 ways and 3 ways, with the design level structures from 1 level to 4. The product is designed in accordance with IEC/EN60998, IEC/EN60947-7-4 UL1059 CSA C22.2 No.158 standards.

12-16

## PCB SPRING TERMINAL BLOCKS

PCB Spring terminal blocks, available with two connection methods, cage clamp contact and dish clamp contact. It can be used instead of Printed Circuit universal screw terminal blocks, more flexible. The product is designed in accordance with IEC/EN60998, IEC/EN60947-7-4, UL1059, CSA C22.2 No.158 standards.

16-19

## TRANSFORMER TERMINAL BLOCKS

Transformer terminal blocks, with structure design features of easy wire connection and reliable connection; also with snap foot allowing quick fixing to flat mounting rails 10x2mm or to snap-in devices of the winding frame. The product is designed in accordance with IEC/EN60998, UL1059, CSA C22.2 No.158 standards.

## THROUGH-WALL TERMINAL BLOCKS

Through-wall terminal blocks, the design of structure is characterized by the easy connection and extremely high contact strengths. These connectors are available in all types of wires with the size from 0.5mm<sup>2</sup> to 95mm<sup>2</sup>, and designed in accordance with IEC/EN60947, UL1059, CSA C22.2 No.158 etc.

# CONTENTS

## RELAY MODULE

Relay modules series is divided into connector module series and relay module series. Compact structure design have the advantage of saving space. Reliable screw connection or push-in connection technology. The products are available of installing on the NS35 and NS32 din rail.

22-23

## FEED THROUGH TERMINAL BLOCKS

Feed through terminal blocks, connecting with two conductors easily and credibility. provide the wire size from 0.5mm<sup>2</sup> to 16mm<sup>2</sup>. Available with fuse and without fuse. The product is designed in accordance with IEC/EN60998、UL1059、CSA C22.2 No.158 standards.

## DIN RAIL TERMINAL BLOCKS

Din Rail terminal blocks, available with two connection methods, universal screw contact and cage clamp contact. The combination terminals connect two conductors easily and credibility. They are designed for fitting both U type and G type Din Rails. The product is designed in accordance with IEC/EN60947、UL1059、CSA C22.2 No.158 standards.

 Poles 2P-20P

**DG48R - B**

CE 750V/32A 4.0mm<sup>2</sup>  
 UL 300V/20A 22-12AWG  
 Poles 2P-22P

Pitch: 10.0mm  
 (.394")

The product is designed according to UL1059, CSA C22.2 No.158.

# BARRIER TERMINAL BLOCKS

|                                                                                                                                                                                                |                                                                                                                                                                                                  |                                                                                                                                                                                                |                                                                                                                                                                                                     |                                                                                                                                                                                                |                                                                                                                                                                                                  |
