Introduction to Genesis Cable

Enabling Your Success

At Genesis, we're committed to raising standards, continuously innovating and developing superior cable solutions for today's evolving technologies. Engineered and tested to exceed the highest quality standards, Genesis produces trusted low-voltage cable solutions that increase customer satisfaction. To drive your success, we deliver a hassle-free experience from specification through installation to operation, across a wide range of residential and commercial applications.

Innovative Solutions for Every Application

We manufacture a complete low-voltage cable portfolio, with solutions across a variety of industries. Our high-performance solutions span the Security, HVAC and Electrical markets and can be purchased from over 10,000 locations across the U.S., Canada and Latin America.

Security

- Burglar alarm systems
- Access control
- Closed circuit television (CCTV)

Networking

- Enterprise networks
- Hot spots
- Video conferencing systems
- Point of sale systems

Fire + Life Safety

- Conventional and intelligent detection
- Audible and visual notification
- Emergency mass communication

Entertainment

- Conferencing and meeting systems
- Home theater audio
- Cable and satellite television

Comfort (HVAC)

- Building climate and energy management
- Home climate control
- Centralized, localized, and zoned system

Other

- LED lighting
- Outdoor lighting
- Underground piping + sprinkler systems

Introduction to Genesis Cable

Your Single Source Provider

3-For-1 Warranty

At Genesis, we ensure protection for you and your customers. If any cable fails to perform to spec, we'll replace it - three units to one.

ReadyShip

ReadyShip keeps your business running on schedule by providing same- or next-day shipping on more than 100 products.

Surelynk® Warranty

Providing 25 years of complete infrastructure protection for any EIA/TIA-568-C Series-Compliant Genesis Ethernet network.

Dealer Loyalty Programs

Genesis dealers can earn rewards - including rebates and co-op dollars - for buying and installing Genesis Cable. The more you buy, the greater your rewards.

Toll-Free Customer Support

We deliver confidence by ensuring prompt response and resolution when and where you need it. When you work with Genesis, you work with the best.

In Stock, Readily Available

Genesis keeps your business running on schedule, with product availability from more than 10,000 locations nationwide.

Part Numbers, Packaging + Color Codes

All Genesis® Cable products are assigned an eight-digit part number that contains a product code, put up code and color code.

Put up and color codes can be found below.

Put Up Code	
Code	Description
01	250' Reel
03	4 x 250' Reel
05	250' Pull Box
09	250' SPEED BAG®
10	1000' Reel
11	1000' Pull Box
21	1000' Reel-In-A-Box
25	2500' Reel
35	150' Coil
39	5 x 50' Coil
43	100' Reel
46	125' SPEED BAG®
48	4 x 500' Reel
50	500' Reel
55	500' Pull Box
58	500' SPEED BAG
61	500' Reel-In-A-Box
71	5000' Reel
86	1000' REACT® Packaging
87	500' REACT Packaging

Color Code	
Code	Description

Packaging Technology

Speed Bag® Packaging

Save time, space and money with Speed Bag packaging. Easy-to-open, these innovative packages are stackable and facilitate multiple wire pulls from one source. Speed Bags are also environmentally efficient - eliminating empty reels and cutting down on jobsite waste.

Applications + Features

- Created with the installer in mind to get in and out of jobs easier.
- More compact than a standard reel or pull box.
- Easily fits into five-gallon bucket, tool bag or cart for ease of transport.
- Available for more than 50 thermostat and security cables.

Pull Box

Simplify cable pulls with Pull Box packaging technology. Operating as a reel-less coil, these packages prevent tangles and snags, reduce installation time and minimize material waste.

Applications + Features

- Crush-resistant box, with reinforced handles for durability that lasts throughout an installation.
- Tangle free pulls for faster installations.
- Lighter than traditional reels for easier transport.
- Stackable, recyclable boxes for simple storage and clean-up.

Reel-In-A-Box

Reel-In-A-Box packaging technology streamlines cable installations compared to traditional packaging methods like reels and coils. Offering additional cable protection, Reel-In-A-Box reduces cable twisting and tangles for quicker installations and multiple cable runs.

Applications + Features

- Crush-resistant packaging offers greater protection for cable.
- No special equipment needed to pull cable.
- Stackable, recyclable boxes for simple storage and transport.

Security

Reliability and continuous connectivity are critical for every security network and system performance cannot be trusted to inferior wire. As the foundation for the highest-performing security networks in the world, Genesis Security Cable optimizes intrusion, access control and video systems for continuous high performance at all times.

Innovative Security Solutions

Burglar alarm systems
Access control
Closed circuit television (CCTV)

Featured Products:

Profusion®

Unconstrained by binders, adhesives or thick overall jackets, Profusion decreases material costs by up to 16% and reduces entry point wiring time by up to 30%. This single, jacketless cable is twisted together like a rope, bundling individual lock power, door contact, card reader and request-to-exit wiring.

Access Control Composite Cable

Designed to bend freely around corners and obstructions without getting snagged, this convenient, jacketed bundle combines individual lock power, door contact, card reader and request-to-exit cables for smoother pulls and more efficient installations.

CCTV Coaxial Video

Built with pure copper conductors and a 95%-coverage braid shield, CCTV Coaxial Video Cable experiences lower resistance and voltage drop, greater flexibility and protects against electromagnetic interference to optimize signal strength and transmission.

Fire + Life Safety

There is no second chance when it comes to protecting people and their environment, so don't leave system connectivity and performance up to inferior wire. Genesis Fire + Life Safety Cable optimizes critical systems for continuous high performance at all times, delivering peace of mind when it matters most.

Innovative Fire + Life Safety Solutions

Conventional and intelligent detection
Audible and visual notification
Emergency mass communication

Featured Products:

Striped Fire Wire

Maximize jobsite productivity by assigning a different stripe color to each type of circuit for easy differentiation, minimized confusion and expedited installations and service. Extruded stripes offer continuous identification and long-lasting durability.

Stranded Fire Alarm Cable

Designed for optimal safety and delivering superior flexibility for easier pulls through conduit, over long distances and around corners.

Metal Clad Fire Wire

Eliminates the need to bend, install and mark rigid conduit during cable installation. Permanent red helical tape runs continuously along the cable for easy identification as a fire alarm circuit.

Comfort (HVAC)

Engineered for the evolving demands and functionality of today's most-intelligent buildings, Genesis HVAC + Building Automation Cable is foundational for optimizing the highest-performing smart building systems. From global networks to smart homes, Genesis Cable offers the technology required for continuous high-speed data transfer and system connectivity.

Innovative Comfort Solutions

Building climate and energy management
Home climate control
Centralized, localized, and zoned system

Featured Products:

Thermostat Cable

Made for today's high efficiency equipment - and equipment from decades past - Hybrid Thermostat and Standard Thermostat Cables provide optimal connectivity for your HVAC system and deliver hassle-free installations. Available in easy-to-open, environmentally-friendly Speed Bag® packaging.

Mini Split Cable

Developed for optimal versatility - including indoor in-conduit installations and outdoor installations with or without conduit. Direct burial and sunlight-resistant listings allow cable to handle harsh and wet environments in unprotected outdoor applications.

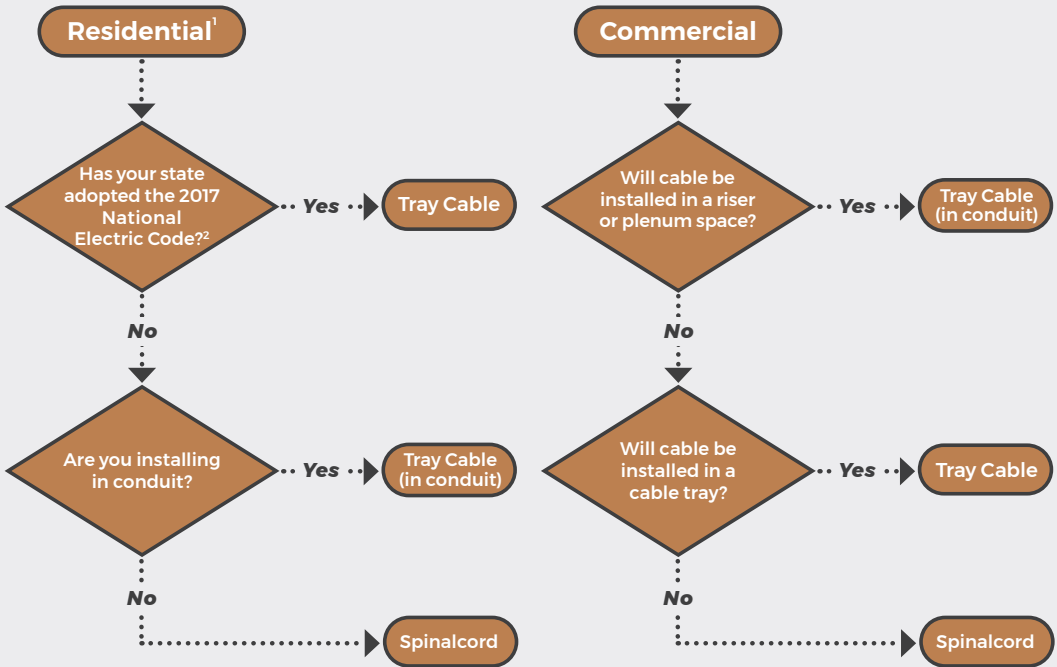

Building Automation Cable

Designed to adhere to several communication standards and protocols that enable communication and data-sharing across devices. Built for integrated building automation systems, these cables protect performance without distortion or interruption, support system functionality, increase building efficiency and maximize energy cost savings.

Choosing a Mini Split Cable

This flow chart will help you determine if Genesis Spinalcord® or Genesis Mini Split Tray Cable is best for your next indoor installation.

¹ Defined as a single- or dual-occupancy dwelling.

² NEC Adoption Status: <https://www.nfpa.org/nec/nec-adoption-and-use/nec-adoption-maps>

This chart is provided for informational and educational purposes only, and is not a substitute for professional advice.

Under no circumstance will Genesis have any liability for loss or damage incurred as a result of the use of this tool.

When in doubt, consult the appropriate authority having jurisdiction (AHJ).

Traditional vs. Hybrid Thermostat Cable

Traditional thermostat cable takes a one-size-fits-all approach to cable design. Hybrid Thermostat Cable customizes its design to better fit the needs of modern and legacy thermostat equipment. This upholds device performance at a more cost-effective price.

Powering a Thermostat

A typical thermostat cable contains five to eight conductors. One conductor carries all the current needed to power the thermostat. The remaining conductors split this current to control specific, individual functions, such as cooling, heating and fans.

Traditional Thermostat Cable

Traditional Thermostat Cable is designed with 18 AWG conductors. **Requiring more copper, it is less cost effective and weighs more, making transport more challenging.**

All conductors, except for the power supply, are larger than they need to be to optimize device performance.

Hybrid Thermostat Cable

Hybrid Thermostat Cable is designed with an 18 AWG power supply conductor and all remaining conductors at 20 AWG. **The smaller gauge conductors use less copper, creating a more cost-effective solution that is lighter and easier to haul.**

Despite its smaller conductors, **voltage drop is negligible and the cable can perform up to 250 feet.**

Networking

Continuous connectivity and system reliability are critical for every data network. Engineered to increase signal speed, Genesis Networking + Communication Cable delivers uninterrupted connectivity, boosts system integrity and strengthens data security. Genesis is foundational for pioneering the highest-performing data networks in the world, delivering optimal data network performance every time, for every application.

Innovative Networking Solutions

Enterprise networks
Hot spots
Video conferencing systems
Point of sale systems

Featured Products:

Cat 6A Cable

Provides maximum bandwidth, capacity and speed - and 10G performance - delivering optimal results for today's high-tech applications.

Shielded Network Cable

Protects highly confidential data transmission and minimizes interference for a faster, stronger and safer connection.

Direct Burial Cable

Rugged, durable, sunlight-resistant and expertly engineered to successfully withstand the harshest outdoor conditions.

The Importance of Verifications

Industry standards for category cables are created by the Telecom Industry Association (TIA/EIA). Each category has specific performance requirements that need to be met to be verified for that category. As the category number increases, so do the performance requirements.

Performance requirements are tested up to standard frequencies for each category: Cat 5e at 100 MHz, Cat 6 at 250 MHz and Cat 6A at 500 MHz, and all are tested at a length of 100 meters.

Below please find common applications for each category.

Category	Category 5e	Category 6	Category 6A
Typical Applications	Voice and Data Networks Gigabit Ethernet	Voice and Data Networks Gigabit Ethernet IP Video Power over Ethernet (PoE)	Voice and Data Networks 10 Gigabit Ethernet IP Video Power over Ethernet (PoE)
Standard	100 MHz	250 MHz	500 MHz
Network Throughput	1 Gbps (up to 100 meters)	1 Gbps (up to 100 meters)	10 Gbps (up to 100 meters)

Any manufacturer claims of performance beyond these lengths and frequencies should be examined and considered with extreme caution. These claims often require products to be used within specific circumstances and applications that don't offer the versatility of verified category cable.

Cables failing to meet set standards can experience incomplete signal transfer and signal interference, affecting the performance of the entire system. This reduces system flexibility for future business needs, leading to unnecessary rip-outs and reinstallations and additional time and money.

Verified cables can be identified by locating the UL-Verified holographic sticker or ETL-Verified printed mark on the cable's packaging, in addition to reviewing the print legend on cable for UL or ETL text. It must read: (UL or ETL) verified to TIA-568-C.2. Both must include the tested communication standard, i.e., Cat 5e.

Bandwidth and PoE

Power Over Ethernet (PoE) Cable provides both data and electric power to a device, eliminating the need for additional wiring. Most category cable installed today offers PoE functionality, but bandwidth limits – the maximum amount of data that can be transferred along a cable – dictate the most appropriate application for each type of cable.

Cable Type	Part Number	Bandwidth @ 100 Meters	Bandwidth @ 30 Meters	Recommended PoE Limit
Category 6A	5393, 5193	10 Gbps	40 Gbps	60W+
Category 6+	5102, 5392, 5092, 5192	1 Gbps	10 Gbps	60W+
Category 6	6361, 6360	1 Gbps	10 Gbps	60W+
Category 5e	5088, 5078, 5388, 5178	1 Gbps	1 Gbps	Up to 25.5W

Recommended Applications					
Data centers 	Wireless access points 	IP video surveillance 	Digital signage 	VoIP phones 	Basic voice + data networks

Entertainment

Genesis Audio/Video Cable delivers optimal performance of HDTV, digital video, audio and stereo systems. With a selection designed for every budget, Genesis has the highest performing cable no matter your application. Expertly engineered for home theaters and office environments, Genesis Audio/Video Cable produces the ultimate in picture and sound quality for every system and price point.

Innovative Entertainment Solutions

Conferencing and meeting systems
Home theater audio
Cable and satellite television

Featured Products:

Audio/Speaker Cable

Audacious Sound Cable® is expertly engineered with oxygen-free copper conductors and a high strand count to deliver better quality and bolder sound. Genesis Audio/Speaker Cables use twisted bare copper conductors to moderate the effects of electromagnetic interference and are designed for uncompromising performance and unparalleled value.

Multimedia Cable

To minimize the number of cable pulls, reduce installation costs and shorten labor time required for pre-wiring residential systems, this versatile, high-performance cable supports voice, video and data.

Coaxial CATV Cable

Available with dual and quad shields, Coaxial CATV Cable effectively protects low- and high-frequency signals for clearer signal transmission. Choose from RG-6 or RG-11 cables for reliable home video application performance.

Other

Genesis Lighting and Tracer Cables are outdoor rated for continuous connectivity, no matter the environment. Offering a selection of sizes and capabilities, Genesis Cable provides continuous connectivity for outdoor comfort and safety.

Innovative Cable Solutions

LED lighting
Outdoor lighting
Underground piping + sprinkler systems

Featured Products:

LED Lighting + Dimming

Designed for indoor and outdoor applications, these cables increase efficiency and control over lighting systems. Offering more system customization, LED Lighting + Dimming systems have a longer lifespan and increased energy efficiency, for optimized, long-term performance.

Landscape Lighting

Approved with direct burial and sunlight resistant ratings, these cables are perfect for low-voltage direct burial lighting applications.

Tracer/Irrigation

Ideal for buried applications as a way of easily identifying pipes and cables with a specific color code. With a direct burial rating, cable can withstand harsh weather conditions to perform when it is needed most.

Tracer wire is typically color coded as follows:

- Yellow - Gas Pipes
- Blue - Water Pipes
- Orange - Fiber Optic Cables
- Green - Sewage Lines

Technical Tools + Resources

Cable Listings

Using unlisted cable is a dangerous decision that can threaten device, personal and environmental safety. Cable listing marks show that products have been tested to industry-specific fire and safety standards by unbiased third-party organizations. Choosing listed cable will protect your cable investment - preventing rip outs, reinstallations and fire hazards.

Reputable Testing Partners

The two most recognized testing entities are UL and ETL. Both are certified as Nationally Recognized Testing Laboratories (NRTL), giving them the authority to test and certify products to widely accepted safety requirements.

Though different organizations, UL and ETL test to the same standards for any given listing and a listing from either organization has identical meaning.

Underwriters Laboratories (UL) is a global entity that tests and certifies products and helps develop industry standards through ongoing scientific research.

Intertek (ETL) is a globally recognized testing entity that tests and certifies products to published industry standards.

Manufacturers have the freedom to choose their NRTL, including a testing entity besides UL or ETL.

The Mark of Quality

Listed cables can be identified by the listing mark and unique file number placed on the product and its packaging. This mark is most often found on the front face of boxes, circular flange or label of reels, and the file number is printed on the cable's jacket.

Unmarked products shouldn't be trusted and are a threat to device and personal safety.

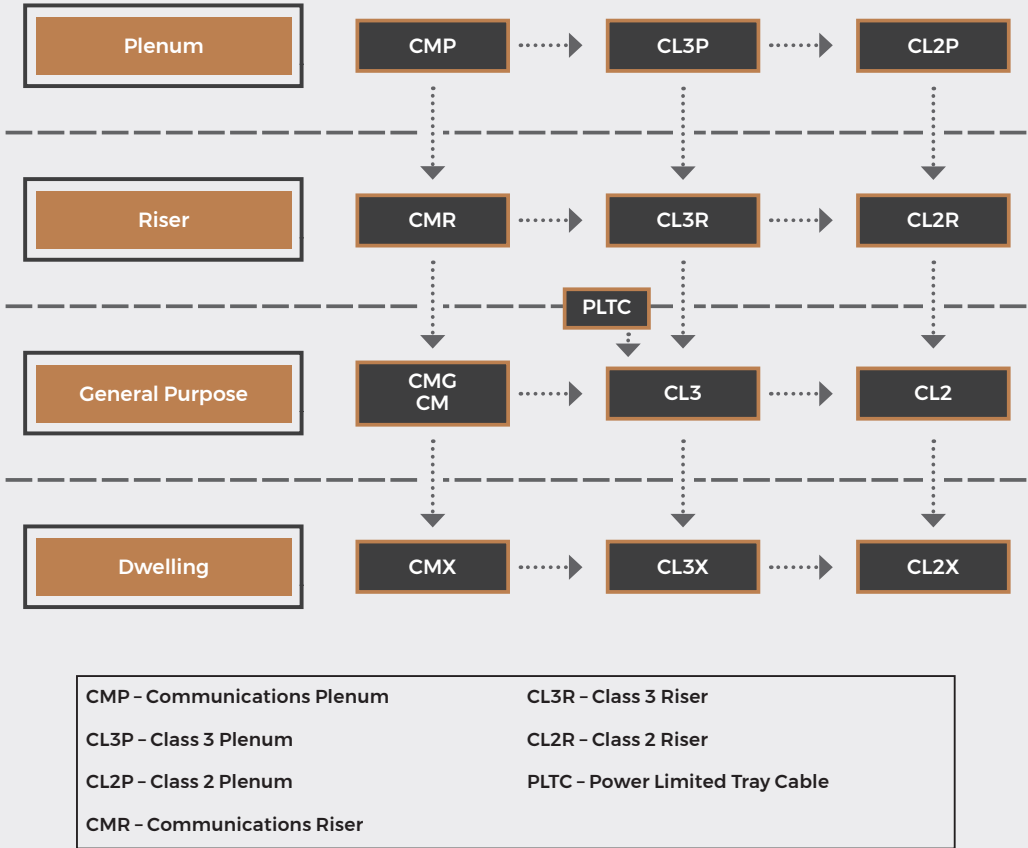

ETL printed mark

UL holographic sticker

National Electric Code

This cable substitution hierarchy outlines permitted substitutions for Class 2 and Class 3 cables. The wiring requirements of Article 725, Parts I and III, apply where substitute cable is installed.

Conductor Sizing

The American Wire Gauge System (AWG) standardizes conductor sizing. As the gauge number decreases, conductor size increases. This lowers resistance, increases the amount of power that can be safely transferred by the conductor and extends the length of runs. Choosing cable with the correct gauge is essential for system performance.

DC Resistance (at 20 °C)					
AWG	Conductor Comparison	Solid Conductor		Stranded Conductor	
		Ohms per 1000 feet	Ohms per kilometer	Ohms per 1000 feet	Ohms per kilometer
24		28.6	93.8	26.47	87.6
23		22.3	73.2	21.1	69.2
22		18	59.1	16.9	55.4
20		11.1	36.4	10.5	34.4
18		6.52	21.4	6.66	21.9
16		4.1	13.5	4.19	13.7
14		2.57	8.45	2.62	8.60
12		1.62	5.31	1.65	5.41
10		1.02	3.34	1.04	3.41
8		0.6407	2.102	0.6535	2.144

Outdoor Ratings

When installing cable outdoors, both performance and safety depend on the selection of the right cable for the job. This reference guide differentiates the various types of outdoor cable ratings, empowering you to make the best choice for your next installation.

Rating/Feature	Cable Marking	Applications	Testing + Additional Information
Sunlight Resistant	<p>Sunlight Resistant, Sun Res or SR</p> 	<p>May be installed in locations exposed to sunlight.</p>	<p>Informally known as UV Rated cable.</p> <p>Evaluated for long-term (720 hours) exposure to UV light and light moisture.</p>
CMX-Outdoor	<p>CMX-Outdoor</p> 	<p>Suitable for installations outdoors on a 1- or 2-family dwelling.</p> <p>Not suitable for burial applications.</p>	<p>Evaluated for long-term (300 hours) exposure to UV light and light moisture.</p>
Wet Location	<p>Wet or Wet Location</p> 	<p>Often combined with other features like sunlight resistance and water blocking for expanded installation versatility.</p>	<p>Insulated conductors evaluated for long-term exposure to water.</p>
Direct Burial	<p>Direct Burial, Dir Burial or Dir Bur</p> 	<p>Suitable for burial with or without conduit.</p> <p>Often combined with other features like sunlight resistance and water blocking for expanded installation versatility.</p>	<p>Evaluated for water absorption and crush resistance.</p>
Water Blocked	<p>Noted in Cable Specification</p> 	<p>Install for added protection of sensitive connected equipment and devices.</p>	<p>Prevents the flow of water along length of cable in unlikely event of compromised cable jacket.</p> <p>Achieved through various methods including gels, tapes, and powders.</p>
