Longevity

AMPG is a privately-owned family business started by current management in 1987. With the second generation in the business, already for many years, we are realizing a future of serving our customers, collaborating with our employees, and contributing to a vibrant domestic manufacturing economy.

Philosophy

We're proud to be an American manufacturer dedicated to innovating, designing, and providing solutions for our diverse customer base. Our philosophy is simple...

"...to provide unparalleled customer service, produce beautiful, precise parts and keep inventory levels high to ship at a moment's notice."

We are committed to our customers and our products.

Stock & Custom...**FAST**

As a precision manufacturer of specialized fasteners, architectural hardware, mechanical components and industrial accessories, AMPG stocks over 35,000 products. We also offer custom manufacturing supported by design, product testing and engineering services. To see the latest and most complete catalog of our over 35,000 different items, visit www.ampg.com.

How to Buy Our Products

We go to market in partnership with the largest domestic and international distributors in the world, and we thank them for their continued support. To find a distributor near you, visit www.ampg.com/distributors.

About AMPG

We Make Precision Fasteners and Components

AMPG is a privately-owned family business started by current management in 1987. Our second generation is currently well experienced in the business and dedicated to keeping AMPG a closely held family firm.

We're Proud to be an American Manufacturer

AMPG currently manufactures and inventories over 35,000 items in our Indianapolis warehouse. New products are the lifeblood of the business, and we have a long term strategic plan in place to introduce thousands of new products each and every year.

Our 58,000 square foot facility supports low to medium volume orders with over 46 late models and brand-new CNC lathes, mills, and secondary operations equipment. Our company has an ongoing and aggressive investment program in the latest and most advanced production equipment, as well as software and engineering systems to run our business as efficiently as possible. ISO Certification to 9001:2015 was gained to anchor the culture of continual improvement both on and off the manufacturing floor. The latest in measuring, testing, and monitoring equipment is used to insure product quality and fast lead times. Lean principles guide the manufacturing process using robots, vision systems, and machine monitoring to enable continuous unmanned production.

Family Owned, Family Operated

AMPG began in New York in 1987 and moved to Indianapolis Indiana in 2004 in order to find the skilled machinists that are the foundation of our success. We are especially proud of our employee retention and ability to find new team members here in Indianapolis. As of 2017 all of our core team members have over ten years' experience with the company. The second generation has over ten years' experience already working alongside current ownership. We have a unique training methodology in place that allows us to grow our manufacturing capabilities to match our product plan and sales needs.

Our dedication to our employees is evidenced by the numerous Safety and Healthiest Employer awards we have won over the past years.

Product Quality, Appearance and Quick Deliveries are Foundational Goals

AMPG makes and stocks hard to find fasteners, precision components, and beautiful architectural fittings. Our stock line of hard to find parts ships same day. We also offer custom manufacturing capabilities including design, product testing and engineering services.

A Simple Philosophy

Our vision is to provide a great customer experience by having beautiful, precise, hard to find products on the shelf to ship today.

Our business plan is to design, manufacture, and stock an ever-expanding line of small volume, infrequently used, but needed right now product lines of fasteners, components, and industrial accessories.

“All AMPG Washers are Precision Made”

Washers are multipurpose fasteners that are vital in a variety of applications. In general, washers have two main functions: to distribute the pressure of the nut evenly over a surface without damage and to ensure that the nut is pressed against a smooth surface to reduce the chances of loosening over time. Ensure a tighter join with a lock washer, or pre-load it with a wave washer.

Shims can be used to incorporate spacing and clearance in all manner of applications. They can be use as a temporary solution or as a permanent component in many different settings. We offer standard and custom shims in a variety of materials, and in a comprehensive range of sizes and shapes.

AMPG has thousands of hard to find items, made in the USA. We specialize in non standard sizes – extra thick or extra thin. Also small quantities of traceable Military Specification washers. We manufacture a full line of machined product – countersunk washers, spherical washer sets, and others. We have a large line of square washers in many materials, in 2”, 3” and 4” square.

Ordering Washers:

Start by finding your Bolt Size. Then determine the Inner Diameter (ID) and the Outer Diameter (OD) as well as your Thickness needed for your project.

Some guidelines for choosing between the materials we produce are shown below.

Material Type	Specification	Tensile, psi	Yield, psi	Estimated Shear, psi	Elongation	Brinell Hardness	Rockwell Hardness
Brass 360	ASTM B16	58,000	45,000	29,000	25%	BHN 143	B78
Stainless Steel 18-8 (303)	ASTM A582	90,000	35,000	45,000	50%	BHN 160	B83
Stainless Steel 316 (316/316L)	ASTM A276	75,000	30,000	37,500	45%	BHN 160	B83
Stainless Steel High Five® (316 H5)	ASTM A276	125,000	100,000	62,500	26%	BHN 250	C25
Stainless Steel 17-4 PH	ASTM A564 TYPE 630	160,000	145,000	80,000	15%	BHN 332	C36
Steel 12L14	ASTM A108	78,000	60,000	39,000	15%	BHN 160	B84
Steel Alloy C4140/41L40 (Alloy)	ASTM A108 Cold	105,000	85,000	52,500	15%	BHN 187	B91
	ASTM A108 Thru Hard	140,000	n/a	70,000	n/a	BHN 300	C32
Steel Grade 2	ASTM A307 Equivalent	60,000	36,000	30,000	18%	BHN160	B70
Titanium Grade 2	ASTM B348 GR 2	75,000	55,000	37,500	20%	BHN 163	B85

Note: Listed Mechanical Properties are obtained from various suppliers and is intended for comparison of materials, only. Values are based on raw material specifications. AMPG assumes no obligation and liability for the accuracy of this information. For critical applications, product testing may be appropriate.

AMPG 303, AMPG 316, AMPG 316H5, AMPG 174, AMPG 405, AMPG Ti2, AMPG 661, AMPG 360 are ® Registered Trademarks of AMPG (Accurate Manufactured Products Group) and may not be used or reproduced without our permission.

2022 Washers

About Our Materials

Brass

Stainless Steel

Steel

Brass

- Brass is a softer material approximately two-thirds copper and one-third zinc.
- Provides good resistance to rust and atmospheric corrosion.
- Friction-resistant material used for gears, bearings, fasteners and valves.
- Nonmagnetic.

Stainless Steel 18-8 (303)

- Type 303 stainless offers excellent corrosion resistance.
- Resists chemicals, most dyes, food and nitric acid.
- Corrosion-resistant material used for screws, bushings, nuts and hardware.
- May be mildly magnetic.

Stainless Steel 316 (316/316L)

- Type 316 stainless offers superior corrosion resistance than Type 303 stainless.
- Resists salt water, acids, chlorides, alkalis and other industrial solvents.
- Low-maintenance material used in commercial kitchens and food processing.
- May be mildly magnetic.

**AMPG uses dual certified Type 316/316L stainless material. Meets all 316 stainless properties but has lower carbon content, making it more suitable for welding.*

Stainless Steel High Five® (316H5)

- High Five® Stainless is AMPG's higher strength grade of 316 stainless steel.
- Resists salt water, acids, chlorides, alkalis and other industrial solvents.
- Corrosion-resistance material with strength equivalent to Grade 5 steel materials.
- May be mildly magnetic.

Stainless Steel 17-4 PH

- Type 17-4 PH stainless maintains excellent corrosion resistance and strength at high temperatures.
- Resists chemicals, most dyes, food and nitric acid.
- High-strength material used for fittings, valves, bolts and shafts.
- Mildly magnetic.

Steel Carbon 12L14

- 12L14 steel is used in many general-purpose applications.
- Material requires a finish to resist rust, such as Black Oxide treatment or zinc plating.
- Low-strength material used for bushings, washers, inserts, fittings, screws and nuts.
- Magnetic.

Steel Alloy 4140/41L40 (Alloy Steel)

- Alloy 4140 is a "primary" material used high strength fasteners and components.
- Material requires a finish to resist rust, such as Black Oxide treatment or zinc plating.
- High-strength material that exceed Grade 8 used for socket screws, studs and components, only after heat treatment.
- Magnetic.

Titanium Gr 2

- Titanium Grade 2 is best known for being strong, lightweight and corrosion resistant.
- Resists chlorides, hypochlorites, chlorates, perchlorates and chlorine dioxide.
- Lightweight material used for chemical-processing equipment, heat exchangers and fasteners.
- Nonmagnetic.

About Our Finishes

Black Oxide

Black Oxide

Black oxide by itself provides virtually no protection against corrosive environments. Black oxide only offers moderate protection and thus ideally suited for indoor applications. This treatment provides an attractive and matte black finish. While steel is the usual substrate, other materials including stainless steel, alloy steel, copper and brass react equally well.

Nickel Plated

Nickel Plated

Nickel is used in plating fasteners primarily for esthetics purposes. It provides comparable corrosion resistance to zinc plating, but at a much higher cost.

Galvanized

Hot-Dipped Galvanized

Galvanized and Hot-Dipped Galvanized

Galvanizing involves the application of a layer of zinc. Galvanized metal has a thicker sacrificial protective finish than zinc plated metals. Hot dipped galvanizing puts the thickest possible coating on the metal resulting in superior corrosion resistance. Hot-dipped galvanized steel washers are 10 times as corrosion resistant as zinc plated washers. Hot dipped galvanized fasteners are frequently used in coastal environments. Hot-dipped galvanized washers are tapped slightly larger than regular washers to accommodate this thick coating.

Passivation

Passivation

Passivation is a non-electrolytic process typically using nitric or citric acid to remove contamination from the surface of stainless steel and titanium finished parts. During manufacturing, sulfides added to raw material for improved machinability or particles of iron from machining center cutting tools may transfer to the surface of the finished parts. Surface contamination can result in premature rust and can inhibit the formation of the oxide film which protects the material from corrosion. Passivation renders the material more rust resistant due to lack of iron to react with the atmosphere.

Plain and Oiled

Plain and Oiled

Plain steel fasteners with oil added provides mild rust resistance. For components used in indoor dry environment.

Zinc Plated

Yellow Zinc Plated

Zinc Plated, Yellow Zinc Plated

Steel fasteners can be electro-plated with zinc for better corrosion resistance and usually to a thickness .0002" – .0003". Fasteners that have been zinc plated have a silver finish. It is a sacrificial finish that corrodes before the underlying steel. Zinc plated washers are fairly corrosion resistant but will rust over time and quicker if the coating is damaged or if exposed to harsh elements. Applying a zinc yellow-chromate passivate over the zinc, improves corrosion resistance and yellow is commonly used to identify high-strength components such as Grade 8 materials.

Flat Washers — Inch

These washers are thicker than general purpose washers for covering large holes or for use as spacers and levelers. All of these washers are produced in the USA.

Tolerances: ID and OD are $\pm .010$ inch.

Thickness tolerance varies by size :

Up to 1/8 thickness is $+.005 / -.014$ inch.

From 1/8 to 9/32 thick is $+.005 / -.020$ inch.

Also known as:

Machined Beveled Washers — Inch

These Williams style washers are thicker and have a beveled outside edge. They are made by machining rather than stamping and are sometimes used in spacing, clamping and bolting applications due to their tighter tolerances and flat machined surfaces.

Materials and finishes offered in:

- Steel, Oiled
- Low Carbon Steel, Oiled
- Low Carbon Steel, Zinc-Plated Finish
- 18-8 Stainless Steel, Plain Finish

Also known as:

- Williams Washer
- Spacing Washer

Machined Straight Side Washers — Inch

These washers are made by machining rather than stamping. Stamped flat washers have a sloped side, where the die break from regular stamping presses occurs. These washers have straight sides and provide a finished appearance.

Turned — Not Stamped

Materials and finishes offered in:

- 18-8 Stainless Steel, Plain Finish
- Steel, Oiled, Plain Finish
- Alloy Hardened Steel, Black Oxide Finish
- Low Carbon Steel, Nickel-Plated

Also known as:

- Dress Flat Washer
- Machined Dress Washer

Large OD (Fender) Washers — Inch

A Large OD washer is similar in shape to a standard washer, differs in that the outside diameter is traditionally much larger in proportion to the inside hole. These flat washers are commonly used to spread the load on thin sheet metal and so named after their use on automobile fenders. The large OD design allows the washer to be placed under the head of a bolt or nut, and helps distribute the load when tightening.

Materials and finishes offered in:

- 18-8 Stainless Steel, Plain Finish
- 316 Stainless Steel, Plain Finish
- Steel, Zinc-Plated Finish
- Low Carbon Steel, Black Oxide Finish

Also known as:

- Fender Washer

Extra Large OD Washers — Inch

This flat washer provides an extra-large bearing surface for use with 1-3/8" to 4" anchor bolts, screws and nuts. Used on machinery, presses, large diameter bolts, shafts, studs and rollers or wherever a large flat washer is needed. Larger OD washers distribute heavier loads over a wider surface. Higher loads require a studier washer to carry the excessive clamp strength and prevent embedment.

**Materials and finishes offered in:**

- 18-8 Stainless Steel, Plain Finish
- Thru Hardened Alloy, Black Oxide Finish
- Steel, Hot Dip Galvanized
- Low Carbon Steel, Black Oxide Finish

Also known as:

- Jumbo Washer

Military Specification Washers — Inch

Mil Spec washers are made in accordance with meticulous material and production criteria, which ensure optimal performance. This means they're produced with the utmost uniformity and reliability. An appropriate choice for some aerospace, automotive and industrial applications. Certification is available if requested at the time of order placement. Passivation provides added protection against oxidation and corrosion.

All Military Spec Washers are passivated to certain specs :

AN960 is Passivate QQ-P-35

NAS1149 is Passivate AMS 2700 Method 1, Type 6, Class 1

MS15795 is Passivate ASTM A380

Materials and finishes offered in:

- 18-8 Stainless Steel, Passivated

Standard SAE Washers — Inch

Flat washers distribute pressure of a threaded fastener to prevent damage during tightening. These SAE style washers meet ASME B18.21.1. SAE washers generally have a smaller ID and OD than other standard flat washers.

Materials and finishes offered in:

- 18-8 Stainless Steel, Plain Finish
- 316 Stainless Steel, Plain Finish
- Titanium Grade 2, Plain Finish
- 316 H5 Stainless Steel, Plain Finish

Standard DIN Washers — Metric

Flat washers are an essential part of any fastener assembly. As they serve to incorporate spacing and distribute load when placed between a nut and bolt, they will help prevent wear and distortion of installation surfaces over time. Use them to make maintenance easier by allowing for smoother loosening and tightening of components. These USA made metric washers meet DIN 125.

ANSI TYPE B Washers — Inch

Type B is a series of flat washers with tighter tolerances where outside diameters are categorized as Narrow, Regular or Wide for specific bolt sizes.

All washers are stamped and made in the USA. Type B washers are manufactured to the ANSI B18.22.1 specification.

Materials and finishes offered in:

- 18-8 Stainless Steel, Plain Finish
- 316 Stainless Steel, Plain Finish
- Steel, Zinc-Plated Finish

Steel, Zinc Plated

Non-Metal Washers — Inch

AMPG stocks flat washers that are also available in non-metal materials. Fiberglass flat washers are insulators of electrical and thermal energy. Also chemically resistant and having a high strength to weight ratio. Color of these washers may be either light tan and/or green. Nylatron flat washers are non abrasive and have low surface friction and made from Nylatron® GS PA66. MDS cast nylon material has superior bearing and wear properties. Phenolic is a tough and lightweight material that resists distortion caused by pressure. Used in electronics, and where moisture resistance is required. Teflon washers are ideal in for low-temperature applications and are often used as insulators in electronic equipment.

Materials and finishes offered in:

- Fiberglass, Green/Tan Finish
- Nylatron, Gray Finish
- Phenolic, Red/Brown Finish
- Teflon, White Finish

Alignment (Spherical) Washers

Also known as equalizing, leveling, self-aligning, and spherical washers. A male & female pair are a great solution for fastening a non-parallel surface and clamping uneven parts together. The male washer has a convex bottom surface, while the female has a matching concave top. The male washer has a slightly narrower ID than the female washer while both have the same radius. This allows a bolt to pass through both washers to compensate for misaligned surfaces. A pair of spherical washers have a 3-4° angle of correction. Ideal for die and fixturing applications.

Materials and finishes offered in:

- 18-8 Stainless Steel, Plain Finish
- 316 Stainless Steel, Plain Finish
- Low Carbon Steel, Black Oxide Finish

Countersunk Washers – Inch & Metric

A countersunk washer is also known as a finishing washer and dress washer, AMPG washers are machined to be sturdier, offer a larger OD, and provide greater bearing surface than stamped countersunk washers. Flat and oval head screws sit flush within them for a neater appearance. For inch screws, washers are available in 90° and 100° countersunk angles. For metric screws, washers are available with a 90° and 100° countersunk angles. The 90° countersunk is the common angle for commercial metric flat head screws. The majority of military specification screws and rivets are 100°. The 100° countersink angle distribute pressure over a wide area to prevent crushing soft materials. The greater the angle, the greater the bearing surface and the less likely the screw is to pull through thinner materials such as sheet metal. Inch made to AMPG 2002. FIN.05. Made in the USA.

Tolerances: ± 0.010 inch

Materials and finishes offered in:

- 18-8 Stainless Steel, Plain Finish
- 316 Stainless Steel, Plain Finish
- Low Carbon Steel, Black Oxide Finish

Countersunk (Pyramid) Washers — Inch

These countersunk finishing washers are machined out of Type 316 Stainless Steel. Our pyramid-style washer was developed for an application where an exceptional aesthetic finish was required. These washers are countersunk to accept 82° Flat Head and 82° Oval Head machine screws. Ideal for use on furniture, cabinetry, instrument framing, face plates, where a contemporary look is preferred.

Materials and finishes offered in:

- 316 Stainless Steel, Plain Finish

Bearing Plates — Inch

Also known as square or rectangular washers. Bearing Plates are used in array of fastening applications. With their flat sides, bearing plates are designed to prevent rotation and fit in restricted spaces that do not accommodate round washers, such as slots and channels. An excellent part for shimming and providing a large and extra thick bearing surface. They are commonly used in machining & metal working, construction, electrical and automotive applications. Square washers offer wider and thicker dimensions making them good for distributing heavier loads than round washers. One popular use is with woodwork and timber construction. Since they develop more friction when tightened against wood, this type of washer is specified for seismic applications. Testing has shown square washers function better than round washers which tend to fold up and split during an earthquake. Other specialty square & rectangular washers are Case-Hardened Tooling Washers for Work Holding, Bearing Plate Washers for Anchor Bolts, Back-Up Washers for Blind Rivets and Square and Slotted ID Washers.

Peel Away Shims — Inch

Brass shims have good strength and are corrosion resistant. Remove layers with a utility knife until you get the thickness you need. Layers are bonded with adhesive.

Tolerances:

ID and OD are ± 0.01 inch.

Thickness is ± 0.003 inch.

Materials and finishes offered in:

- Brass, Plain Finish

Brass

Bolt Size	Shaft Size	OD	Thickness	Brass Part Number

1/4	.255	.500	.031	Z9977

Horseshoe Shims — Inch

A fully machined Horseshoe Shim manufactured out of Type 316 Stainless Steel. Used where regular plastic shims are prohibited, where a fire resistant shim is specified, and where the installer needs to weld to the shim. Also used where installing handrails, guardrails, etc.

Thickness tolerances:

±.032 inch

Materials and finishes offered in:

- 316 Stainless Steel, Plain

Shims for Shoulder Diameters — Inch

Lengthening Shim Washer

Add these washers over the threads of our stainless steel shoulder screws, and you extend the shoulder, making the shoulder longer for more bearing surface. OD matches shoulder diameter. 25 shims per pack.

Shortening Shim Washer

Slip these washers over the shoulder of our stainless steel shoulder screws, and you reduce the shoulder length, making the shoulder shorter for more clearance under the head. OD matches head diameter of the shoulder screw. 25 shims per pack.

Materials and finishes offered in:

- 18-8 Stainless Steel, Plain Finish (packs of 25)

Shims for Bearings — Inch

Used for Inner Race Spacers on shafts, or for a precision special dimensioned flat washer. Manufactured from Type 300 series stainless steel or Brass and burr free. Precision manufactured to extra tight tolerances. These shims are packed in a protective packaging to prevent bending.

10-25 pcs. per Pkg.

Thickness tolerances:

.001 - .008 ± .0005

.010 - .016 ± .001

Materials and finishes offered in:

- 18-8 Stainless Steel, Plain Finish (packs of 25)
- 316 Stainless Steel, Plain Finish (packs of 10)
- Brass, Plain Finish (packs of 10)

Wave Washers — Single and Triple Wave — Inch

These wave washers act as springs because of their flexible shape. Used on shafts, and in assemblies where tolerance are too large, these washers expand/compress to take up the space. They can also be used to reduce vibration.

Materials and finishes offered in:

- 18-8 Stainless Steel, Plain Finish

Single Wave, 18-8 Stainless Steel

Bolt Size	ID	OD	Thickness	Free Height	18-8 SS Part Number

Tapped Flange Washers — Inch

The threaded hole and the raised flange make these washers very easy to tighten down. These washers are used for crossarm anti-split bolts and where crossarm braces attach to the crossarm. The flange allows the washer to be tightened with a crescent wrench. The tapped through hole used with a nut provides a secure double nut connection. Available in square or rounded corners.

Materials and finishes offered in:

- Steel, Hot Dip Galvanized Finish

Square Corners, Steel, Hot Dip Galvanized

Bolt Size	Overall Length	Washer Width	Thickness	Thickness w/Flange	Steel, Galvanized Part Number

Longevity

Since 1995, Accurate Manufactured Products Group (AMPG) has been a stocking manufacturer of precision components, hard-to-find fasteners and industrial products.

Strategic Location

AMPG's 121,600 square foot facility is located in the Heart of the Midwest which gives us access to high-quality machinists/employees as well as being strategically located for fast delivery.

Advanced Equipment

Our manufacturing facility operates 24/7, producing precision parts on state-of-the-art CNC Swiss Lathes. Parts are made from high quality materials with a superior machined finish.

Superior Quality

Our advanced electronic Quality Control systems are employed on the manufacturing floor to catch trends before bad parts are produced.
