# Our Products Meet Your Unique Needs

- **A comprehensive platform based product range**
- **Standard products as well as modified and individually customized solutions**
- **Shock and vibration protection**
- **High level of RFI shielding on board, subrack or rack level**
- **Board level components, such as**
  - Front panels, handles, board retention or plug-in units
- **Next level mechanics**
  - Subracks, cases and cabinets
- **Small form factor case for single board computing**
- **Supporting electronics**
  - Backplanes, power supply units, fully wired and controlled systems

## ELECTRONICS

# Our Products Meet Your Unique Needs

- A comprehensive and innovative, platform-based product range
- Standard products as well as modified and individual customized solutions
- High performance CompactPCI Serial and MicroTCA Systems for sophisticated medical applications
- High level of RFI shielding on board, sub rack or rack level
- Shock and vibration protection
- Mobile or stationary racks and cases
- Small form factor cases for single board computing

## MEDICAL

# Our Products Meet Your Unique Needs

- Active membership in MicroTCA.4 and AdvancedTCA for advanced physics specification work
- Outstanding cooling performance on system, subrack and cabinet level
- World leading signal integrity on Schroff 100G xTCA backplanes
- Excellent EMC shielding on system, subrack and cabinet level
- Dedicated xTCA system offering for advanced physics applications
- Complete solution: from single components to integrated systems up to fully integrated cabinets

Cooperation with DESY in the Helmholtz Validierungsfond project "MTCA.4 for Industry" (HVF-0016)

**SCIENTIFIC &  
LABORATORY**

# Our Products Meet Your Unique Needs

---

- **Flexible, complimentary platform-based products to support infrastructure and improve energy efficiency**
- **Server and colocation cabinets**
- **Aisle containment solutions**
- **Cooling solutions for high density computing**
  - Row, rack and direct to chip cooling with up to 750kW heat dissipation
- **Intelligent power distribution units**
  - Metered, switched or remotely controlled PDUs
- **Monitoring solutions to remotely control access and environment**

**DATA CENTER / IT**

# Our Products Meet Your Unique Needs

- Standard product platform solutions based on open standards
- Solutions for harsh environments including IP protection, EMC shielding, thermal management and seismic resistance
- Schroff played a leading role in defining the ATCA and MicroTCA specifications (PICMG)
- High speed ATCA, MicroTCA and CompactPCI backplanes and systems
- Open Compute and Storage Rack based on OCP standards
- Indoor and outdoor cabinets with a wide range of thermal management options
- Small form factor cases for single board computing

**ICT**

# Our Products Meet Your Unique Needs

- Modular product platforms for stationary and on-vehicle applications
- Standard products as well as modified and individually customized solutions
- High level of shock and vibration protection
- Certified and tested for safety and security
- High level EMC shielding available
- Subrack-based and conduction cooled rugged system solutions

## INFRASTRUCTURE

Certified for

BN411002	JEC61587-1
BN411003	JEC 48 D
NFF61005	EIRENE FRS 7.0
NF60002	EIRENE SRS 15.0
EN 50 155	

# Our Products Meet Your Unique Needs

- Modular product platform as the basis for customer specific requirements (COTS)
- High shock and vibration resistance from board level through systems up to cabinets
- MIL 901D cabinets, cases and rugged subracks for land, sea and air missions
- Card-Lok™ and Wedge-Lok™ retainers for circuit board heat removal and retention
- VME, VXS, VPX, CompactPCI & Rugged MTCA systems
- Backplanes and power supplies with conformal coating
- Outstanding EMC characteristics

## DEFENSE & AEROSPACE

Open Modular  
Computing Specifications

# Our Products Meet Your Unique Needs

- Standard product platforms or customized designs
- Cabinets and subracks made of steel or aluminum
- Cooling options include fans, air conditioners and water-cooling solutions
- Embedded Systems based on VME, CompactPCI and MicroTCA
- Backplanes and power supplies for industrial automation
- Integration: mechanics, electronics, electrical, climate control
- Small form factor cases for single board computing

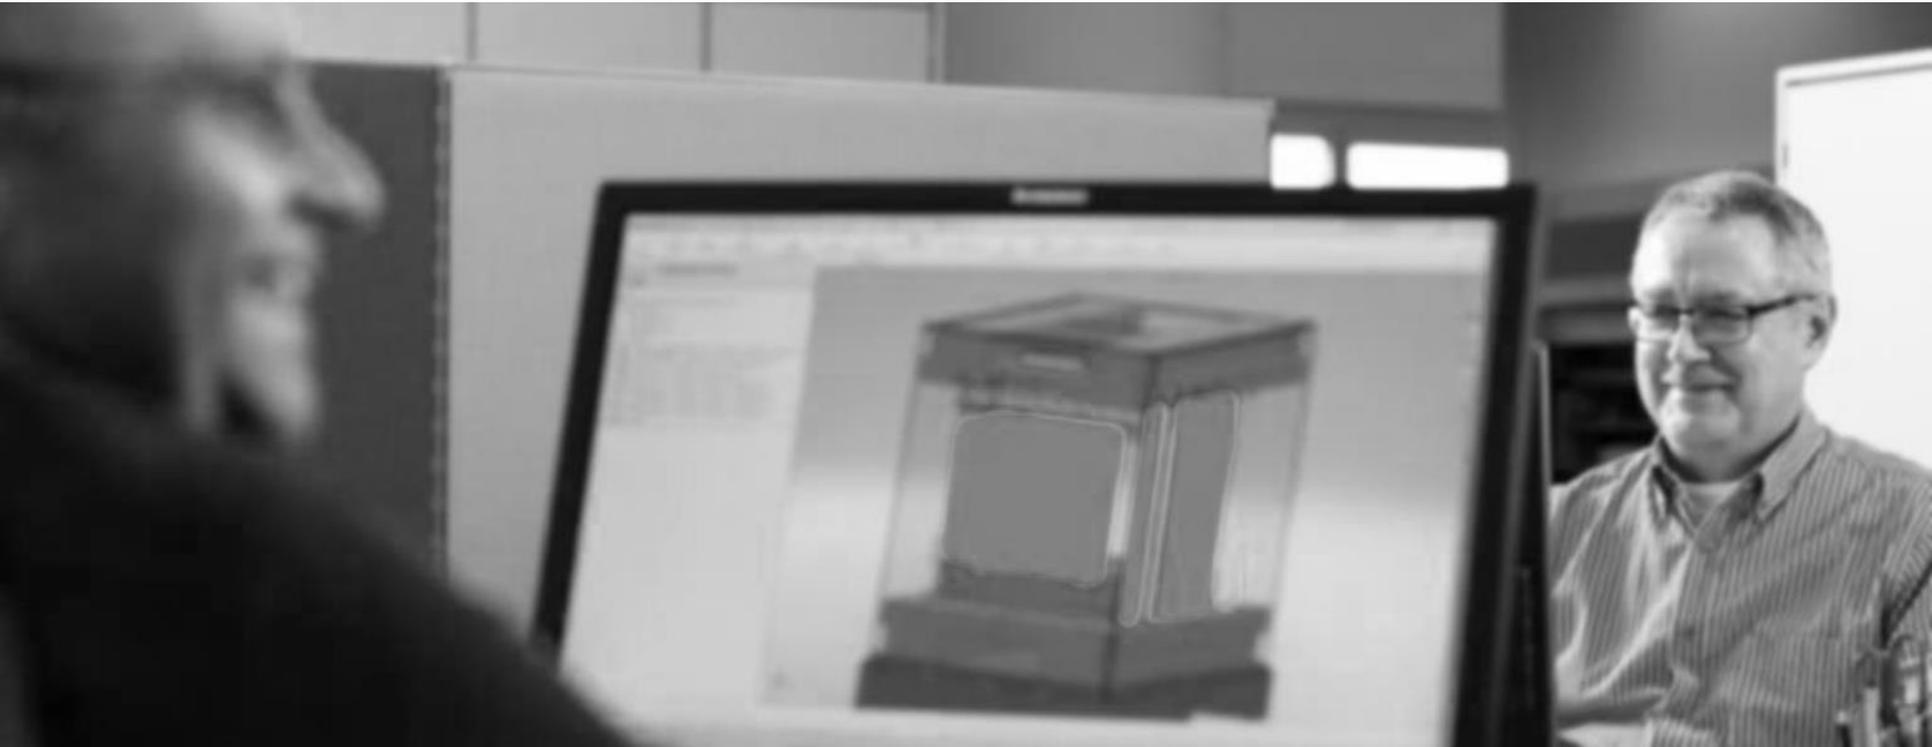

## INDUSTRIAL

## SCHROFF Product Portfolio

# SCHROFF Product Portfolio

## PRODUCTS FOR Non-19" APPLICATIONS

**SCHROFF's small form factor product** line offers a variety of cases, components, cooling solutions and accessories to enclose and protect non-standardized or standardized boards, such as embeddedNUC™, Mini-ITX, ATX and others.

The **SCHROFF COM System** for type 6 COM express modules a complete solution includes a COM module, COM Carrier, integrated in a case with cooling and power supply.

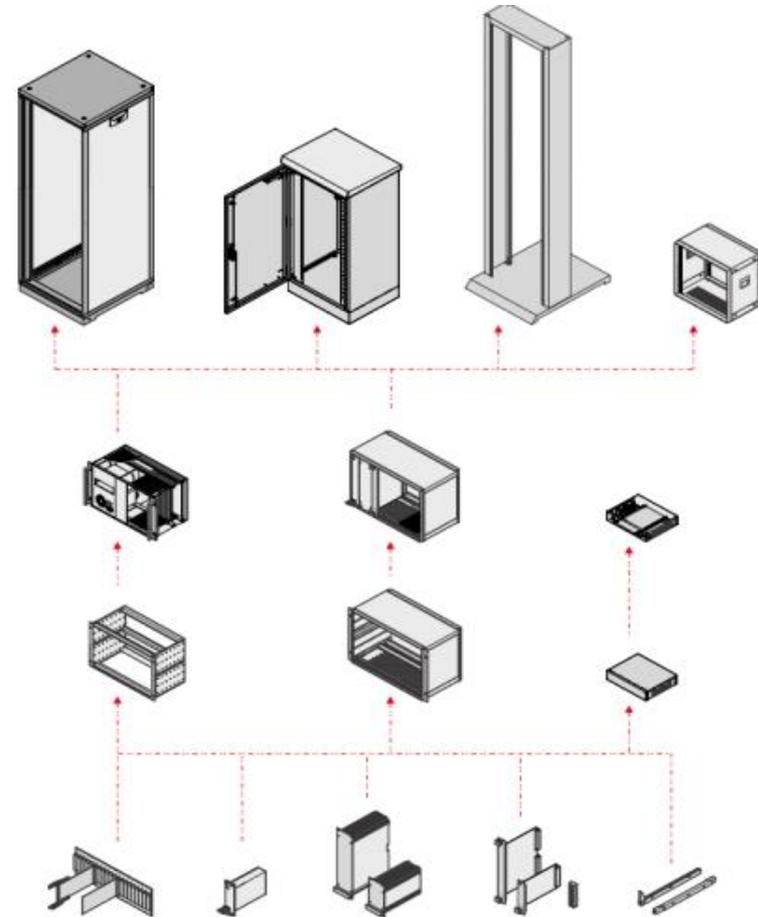

## PRODUCTS FOR 19" APPLICATIONS

**CABINETS:** Floor standing cabinets provide water, dust protection, RFI shielding and secure access to house subracks, rack-mount cases or embedded systems

**SYSTEMS:** Combination of protective housing with a backplane, a power supply, cooling provision and shelf management; defined to international standards such as CompactPCI, VME, AdvancedTCA, MicroTCA

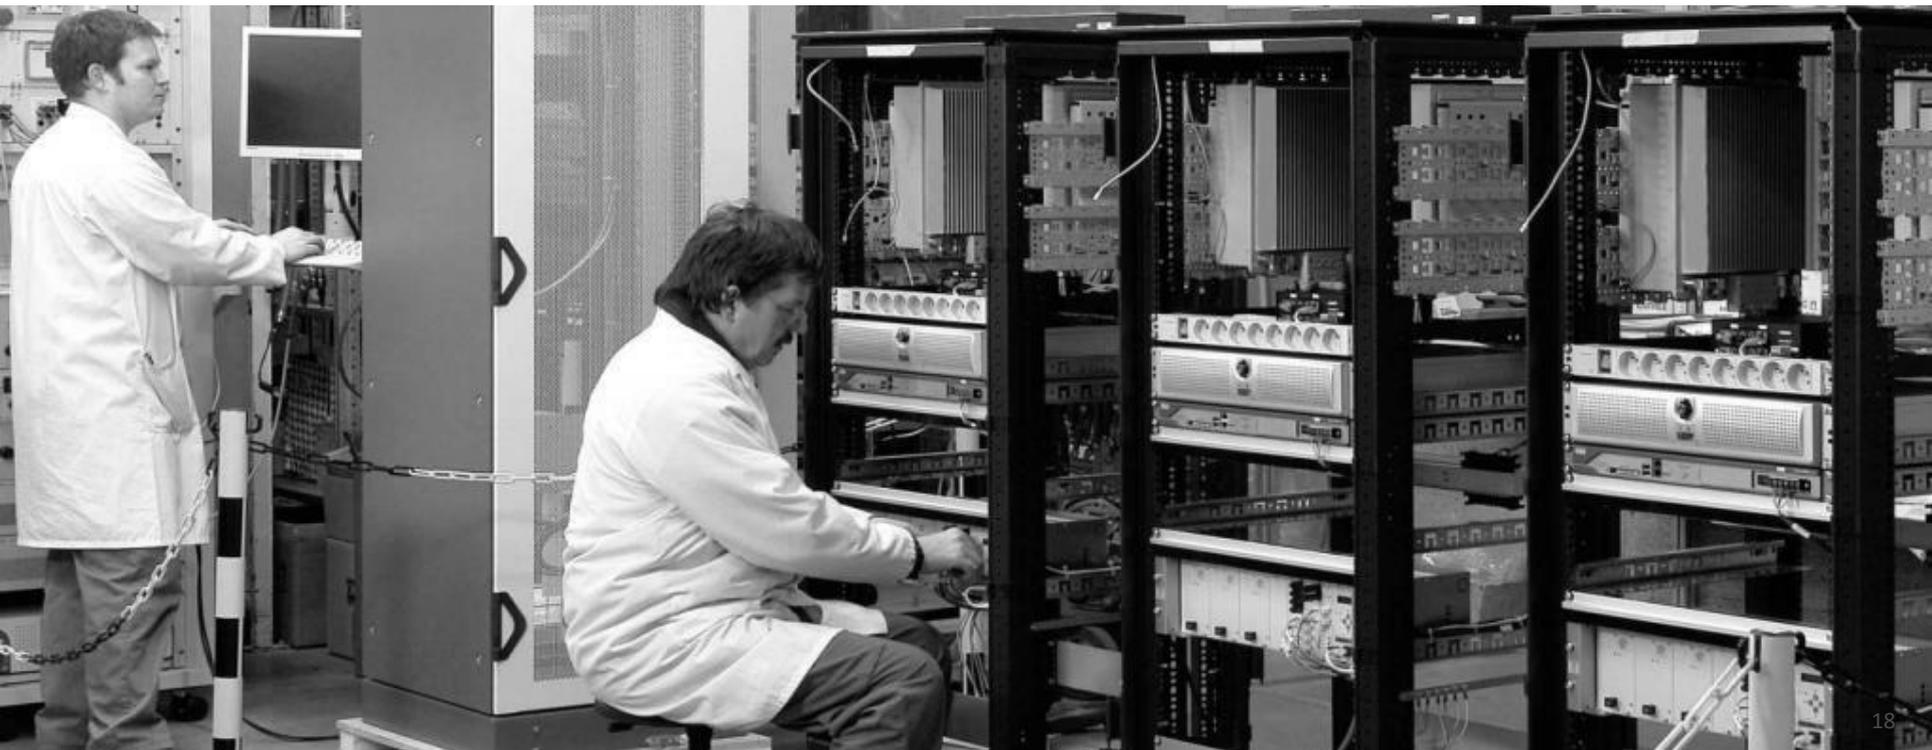

**SUBRACKS AND CASES:** Subracks or table-top, rack mount or portable cases accommodate PCBs. Standard-based designs facilitate interconnection of backplanes, power supplies and PCBs

**BACKPLANES and ACCESSORIES:** Handles, front panels, plug-in units and front element accessories to complement euroboards in 19" applications.

## SCHROFF Cabinets

# Multi Purpose Electronics Cabinets

## ➤ Varistar

- Robust welded steel frame cabinets with high load rating, available with and without front door
- Comprehensive range of high-protection options including IP20 and IP55, EMC shielding, seismic, MIL 901D and liquid cooling

## ➤ Novastar

- Esthetical bolted aluminum frame cabinets with high functionality and flexibility
- Application versatility - ranging from audio-video, broadcasting, laboratories, instrumentation and control

## ➤ Eurorack

- Bolted aluminum frame cabinets
- Configuration flexibility including IP40 ingress protection, 800 mm width, universal frame and EMC shielding options

## ➤ Labrack

- Open frame 19" rack for laboratory applications

**Flexible platforms for a variety of applications**

# Outdoor Cabinets

The redesigned Outdoor Modular Cabinet is a flexible and reliable solution to ensure the smooth and dependable functioning of sensitive electronics in outdoor environments, and is specifically tested and certified for outdoor trackside railway applications.

- IEC 61969-3 and EN 50125-3 for protection against environmental conditions
- EN 50125-3 for shock & vibration (1-3 m from the rail)
- EN 60529 for ingress protection up to IP55
- IEC 61587-2 and IEC 61969-3 for Seismic Bellcore Zone 4
- EN 50125-3 for wind resistance (180 km/h)
- EN 1627 and EN 1630 for vandalism protection
- EN 50121 for electromagnetic compatibility
- IEC 61969-2 for coordination dimensions
- IEC 60068-2-75, IEC 62262 and IK 10 for impact/hammer test

# Shielded and Ruggedized Cabinets

## ➤ Varistar Seismic

- Earthquake-resistant cabinet up to Bellcore Zone 4
- NEBS compliant plinth
- Optional EMC-shielding

## ➤ Varistar MIL

- Shock and vibration resistance for demanding environments
- Tested to MIL 901D
- EMC shielding to avoid electromagnetic interferences

## ➤ Varistar EMC

- High performance in RFI shielding up to 60dB at 1GHz
- Pre-configured, shielded cabinets with perforated doors and cable entry accessories
- Test reports available in many different configurations

**Flexible platforms in rugged environments**

# Datacom and ICT Cabinets

## ➤ Varistar Server Cabinets

- Wide range of preconfigured, configurable and customizable server cabinets in various dimensions and colors
- Comprehensive range of accessories and cable management options

## ➤ Varistar Colocation Cabinets

- Wide range of preconfigured, configurable and customizable colocation cabinets with 2, 3 or 4 compartments
- Fully separated compartments with dedicated, protected cable channels
- Comprehensive range of accessories and cable management options

## ➤ Varistar Aisle Containment and Air-Water Heat Exchangers

- Aisle containment separates warm and cold areas for maximum cooling efficiency
- Liquid cooling provides highly efficient heat removal from IT equipment
  - RackChiller In Row
  - Rack Chiller Rear Door (active and passive)
  - Cooling Distribution Units

**Cutting-edge cabinets and cooling capabilities**

# Communication Cabinets

## ➤ Etsirack

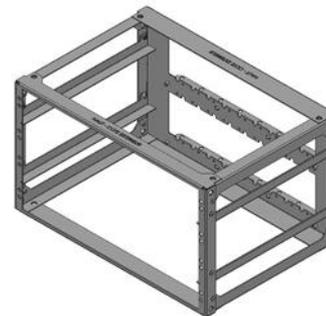

- Metric frame for public and private telecommunication networks
- Supports chassis dimensions according ETS 300119

## ➤ Outdoor Rack

- Broadband access, traffic control or track-side applications
- Maximum protection:

## ➤ On-Board Rack

- Durable frame to support 19" electronics in transport applications
- Lightweight solution for a secure, durable and reliable installation

Tailored cabinets for unique applications

# Cabinet Cooling

## ➤ 19" Fan trays

- For cooling components and assemblies in 19" cabinets
- High airflow rate for efficient heat dissipation
- With axial or radial fans
- CE-approvals

## ➤ Heat exchangers

- To increase the cooling capacity in data centers or to provide cooling redundancy
- Cooling capacity up to 750kW
  - Passive/active rear door heat exchanger
  - Rack integrated active heat exchanger
  - In-row heat exchanger
  - Direct-to-chip cooling
- Optional remote monitoring

Efficient space utilization, efficient cooling

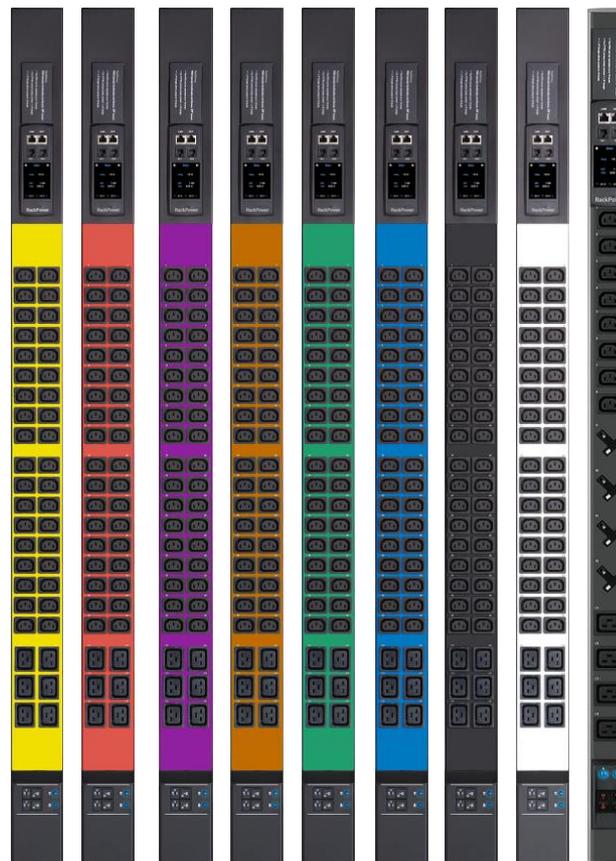

# Power Management and Monitoring

## ➤ Power Distribution Units (PDU)

- Basic PDUs, optionally with switch or circuit protection functionality
- Intelligent PDUs for remote metering and monitoring as well as optional remote switching on rack level, circuit level or even outlet level

## ➤ Monitoring

- Monitoring devices for single cabinets or cabinet rows, with a broad range of plug-and-play environmental sensors

Power under full control

## SCHROFF Subracks and Cases

# Small Form Factor Solutions

## Innovative Enclosures

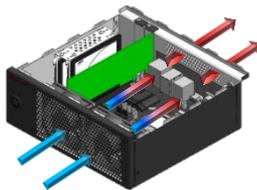

- Various designs:
  - Interscale: Interlocking sheet metal design for easy assembly and integrated EMC protection

- More to come...
- Customized sizes, cutouts

## Cooling solutions

- Fans
- Flexible heat conductors
- Heat sinks

## • Peripheral Components

- Power supplies
- Power switches / LED indicators
- HDD brackets

## • Mounting Accessories

- Wall, desktop, and din rail mounting brackets

Innovative products, combined with simple-to-use design tools, enable designers to quickly create customized solutions to enclose and protect their standardized or non-standardized small form factor boards.

More than just a box...customizable solutions to enclose and protect SFF boards

# Subracks and 19" Rack-Mount Chassis

## ➤ EuropacPRO

- Designed to the latest international standards, supporting today's embedded electronics
- Superior protection through upgradeable RFI shielding and high shock and vibration performance
- Tailored versions to diverse environments -such as laboratory, industrial, railway/mobility and security/defense

## ➤ MultipacPRO

- Designed to accommodate and protect boards horizontally
- Aluminum version for appealing esthetics or sheet metal for economic design
- Easily modified and tailored to various of sizes

## ➤ Inpac

- Durable 19" chassis
- Flexible design for standard board formats or individual solutions

Wide range of platforms tailored to your needs

# 19" Table-Top and portable Cases

## ➤ RatiopacPRO / RatiopacPRO Air

- Versatile case with range of dimensions, individual colors and cut-outs/modifications. Multiple EMC shielding and advanced cooling options
- The ideal platform for tailored solutions – 19" rack mount, portable, table top or tower

## ➤ PropacPRO

- The robust case, for 19" compatible or custom electronics assemblies
- Upgradeable with EMC shielding and mobile accessories
- Ideal for mobile or table top applications

## ➤ CompacPRO

- Light and reliable design
- Optimized for portability (no EMC shielding)
- Nicely featured design alternative to PropacPRO
- Most price sensitive version
- For 19" components or individual electronics assemblies

**Multiple designs for various applications**

# System Case or Wall Mount Case

## ➤ Comptec

- While the previous product lines are designed to house electronic boards, Comptec integrates complete subracks or subrack-based systems
- Steel version accompanied by a lightweight aluminum version for mobile applications
- Ideal for transporting or downsizing standard subrack systems

## ➤ Epcase

- Wall mounted case with hinged side panels for easy access to rear of the installed subracks or systems

Simple subrack installation and easy access

---

nVent

**SCHROFF Systems**

# Open Standard System Platforms

## ➤ AdvancedTCA

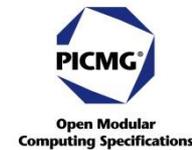

- Systems and components available worldwide in a variety of configurations, from low profile 2- to 6-slot chassis to large-capacity 14-slot models
- Up to 100 G data transmission and 450W per board
- Full Advanced Mezzanine Card (AMC) accessory program

## ➤ MicroTCA

- Modular high speed systems; from small form factors to pico cube, desktop up to 19"
- Supporting MicroTCA.0, MicroTCA.1 and MicroTCA.4

## ➤ COM Express Type 6

- Carrier board for COM Express type 6 modules
- A modular design allows additional modules to be added, including fieldbus, Mini PCI Express, XMC and other modules

Leading in technology, leading in variety

# Open Standard System Platforms

## ➤ CompactPCI, CompactPCI Serial and CompactPCI PlusIO

- Wide range of CompactPCI based systems, either off-the-shelf or configured upon demand within 10 days
- Robust mechanics, effective heat dissipation and RFI shielding
- CompactPCI PlusIO hybrid systems for easy technology upgrade
- Power supply either ATX or 19" pluggable

## ➤ VME, VME64x and VXS and VPX

- Wide range of VME based systems, either off-the-shelf or configured upon demand within 10 days
- Robust mechanics based on 19" chassis, table-top cases or tower systems.
- Power supply either ATX or 19" pluggable

MEMBER  
**VITA**  
Open Standards, Open Markets

**PICMG**  
Open Modular  
Computing Specifications

Leading in technology, leading in variety

# Open Standard System Platforms

## ➤ PXI Express System

- Tailored & customized solutions for small and medium quantities
- Modular solution, with tested and validated components including switches, bridges, clock modules
- Mechanics, power supply, cooling capacity, air flow path or slot configuration can easily be adapted to customer requirements
- Minimizes development costs and time to market

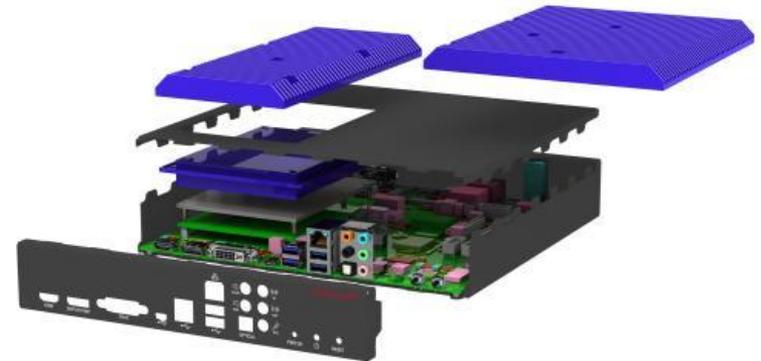

**PXI**<sup>™</sup>  
Systems Alliance

## ➤ COM System

- A modular design allows additional modules to be added, including fieldbus, Mini PCI Express, PMC, XMC
- Complete solution that combines a COM module and hard drive in a conduction cooled case and a power supply
- Carrier board for COM Express type 6 modules
- Customized system design tailored to application-specific requirements
- A system solution available for delivery that can be integrated, tested, verified and certified on request

**Leading in technology, leading in variety**

# Open Standard System Platforms

## ➤ Computer and Storage based on OCP

- The infrastructure of the new Schroff ServCite Rack is specifically designed to meet the next-generation requirements of the telecom industry

## ➤ Key features:

- Server based architecture
- Designed to meet telecom requirements for temperature range and shock and vibration needs
- High grade of flexibility of processing power or storage capacity
- Highly reliable system, hot swap possibility for all FRUs
- Rack Agent for hardware management
- Advanced thermal performance
- Accessories like rear door cooler or electronic door locks

**A new generation of speed, storage and data processing capacity**

# Rugged Enhanced Systems

## ➤ Titan COTS VME64x system

- Based on Schroff's rugged subrack
- Created for shock levels up to 25g at 3g vibration

## ➤ Titan Rugged Enhanced Chassis

- Forced Convection or Conduction Cooled, built to be rugged and reliable as well as lightweight and compact
- For shock and vibration levels exceeding 25g
- Available in high IP ratings

Maximum protection, minimum time to market

# Power Supplies

## ➤ 19" Power Supplies

- We have a broad range of AC/DC and DC/DC linear regulators, switch mode PSUs and converters, single, dual and triple in a range of 8W to 180W

## ➤ Open Standard System Power Supplies

- Pluggable or open frame in AC/DC or DC/DC for VMEbus, VME64x, CompactPCI, MicroTCA

## ➤ Services

- Standard products from stock as well as modified and individual customized solutions

**Rapidly customized, rapidly delivered**

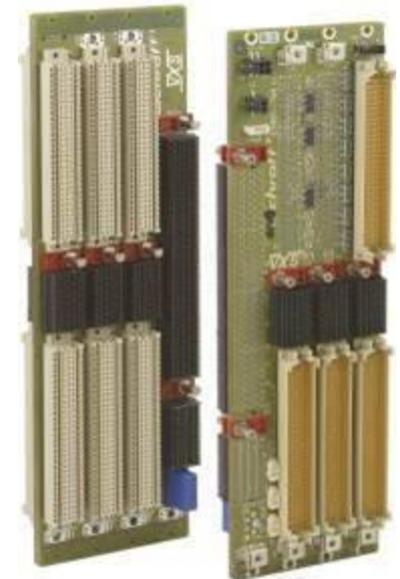

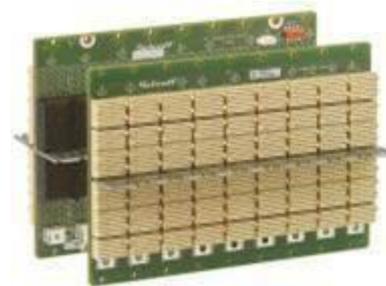

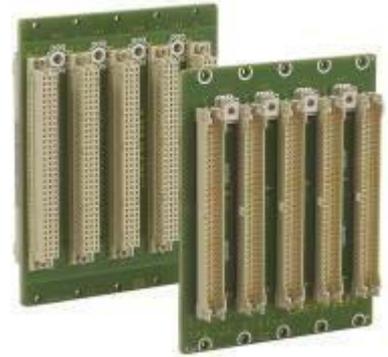

# Backplanes & Test Adapters

## ➤ Comprehensive standard backplane program including

- CompactPCI, CompactPCI Serial, CompactPCI PlusIO
- VME, VME64x, VPX, VXS
- Power backplanes
- Universal backplanes
- Test adapters

## ➤ Services

- Standard backplanes from stock (48 h)
- Development and production of customized backplanes
- Conformal coating
- Individual modification
- Tests and certification

**Rapidly customized, rapidly delivered**

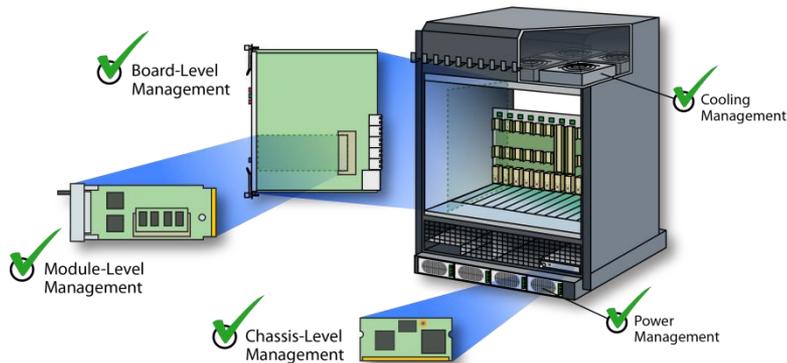

# Hardware platform management

## ➤ Providing management of HW/SW platforms

- Local and remote access at chassis and board level
- Monitoring power and cooling, logging events, inventory control and recovery

## ➤ Hardware

- Shelf Management Mezzanine
- Reference Schematics
- Starter Kit (Reference Carrier)

## ➤ Software

- Firmware for
  - Shelf Manager (ShMC)
  - Fan Tray (CU EMMC)
  - Power Supply (PM EMMC)
  - Boards (BMC)
  - Hardware
- Hardware Platform Management (HPM)
  - For PPS Management Products (Firmware Update Solutions)
- Firmware Services:
  - Modifications
  - Customization
  - Maintenance

Management Solutions for Open Standard Platforms

## SCHROFF Board Level Components

# Front Panels and 19" Plug-In Units

## ➤ Front panels

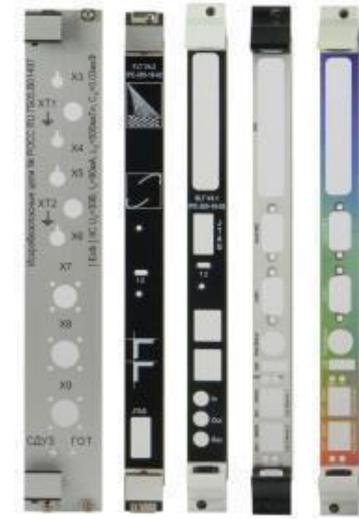

- Front: resistant to scratches, finger prints and environmental forces
- Rear: conductive for shielding performance
- Express modification service
- Digital printing for complex, multi-color designs (aluminum only)

## ➤ Plug-in units

- Static handles for low insertion/extraction forces
- Cantilever extraction handles for moderate force
- IEL/IET handles for CompactPCI and VME64x applications with high density connectors and high extraction forces
- Heavy load XL with extraction forces up to 1500 N for VPX system etc.

## ➤ Handles, connectors and front-element accessories

- Can be ordered separately

Wide range of products with a variety of options

# Cassettes or “Frame-type” Plug-In Units

➤ Cassettes and plug-in units with surrounding frame for mechanical protection and RFI shielding of individual PCB boards with the following options:

➤ **Non-Shielded**

- sheet metal
- with rear panel for connector cut-outs

➤ **Non-Shielded/Shielded**

- sheet metal
- with rear hood

➤ **Shielded**

- aluminum tube
- rear panel with or without connector cutout

Scalable degree of protection

# Retainers

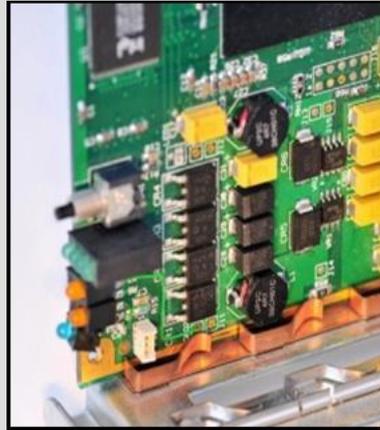

## Card Guides

- Guidance, but no board clamping
- Nylon material

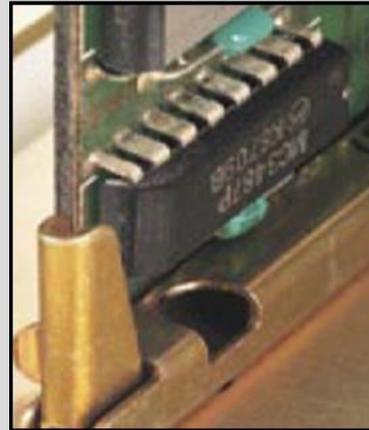

## Retainer/PCB Tainer

- Guidance, but no board clamping
- Sheet-metal design
- Non cold-wall application

## Lok-Tainer

- Board clamping for moderate shock and vibration
- Sheet-metal design
- Non cold-wall or cold wall application

## Card-lok /Wedge lok Wedge Tainer

- Board clamping for rugged, heavy shock and vibration
- Sheet-metal design for cold-wall application
- High clamping force and heat dissipation

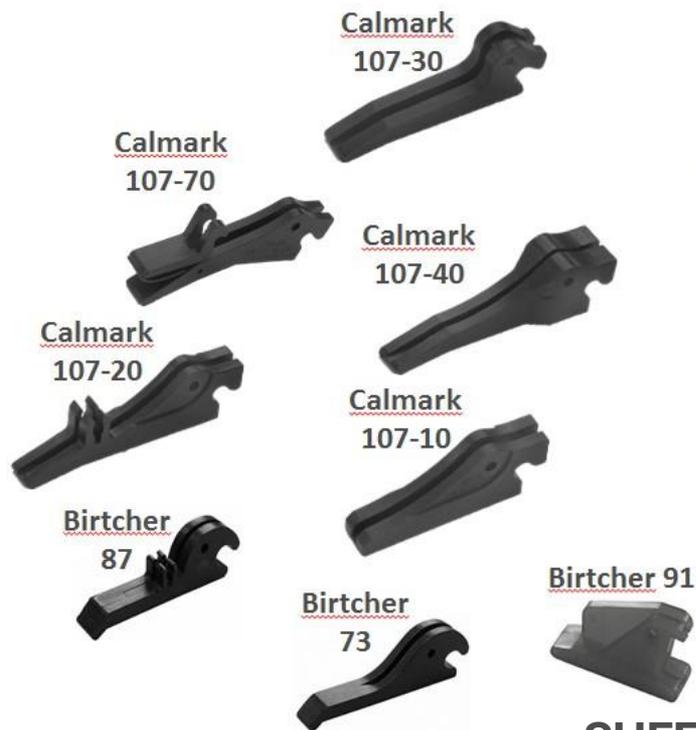

Relative Cost and Performance (clamping force & thermal transfer)

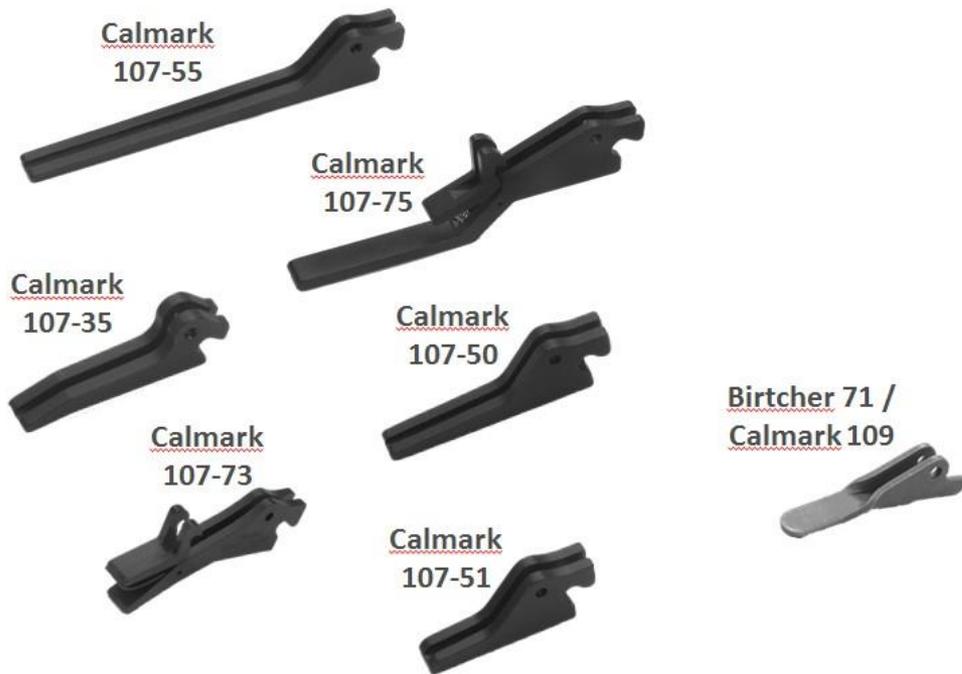

Scalable degree of protection and conduction cooling

# PCB Inserters / Extractors

## NYLON

## ALUMINIUM

## SHEET METAL

## COLD WALL

# Digital Empowerment for Faster Results

## ➤ INSTANT PRICING - Get the right price at the right time!

Simplify and optimize our customers' workflow

Prices on our website for standard and configured products - without any registration or log-in!

Net prices are available for registered customers - Even faster! Find & Manage your projects in your personal account.

## ➤ LIVE CHAT – Communicate with our experts in real time!\*

Send and receive messages, or attachments, in real-time, FASTER than an email response!

Check it out on our website, by clicking on the red icon on the bottom right of the page

Our available Technical Experts are ready to help you to find the product or solution you need!

*\*Live Chat is currently available on the German and French website.*

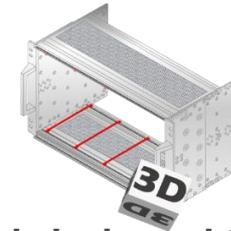

## ➤ ONLINE CONFIGURATORS – Try our 3D configurators without registration !

Interactive 3D configurators, easy to use and fully reliable

Design Your solution and receive the CAD model instantly

Current available Configurators :

**For Electronic Cabinets (Novastar & Varistar) , Front panels, Wegde locks and Subrack**

# Digital Empowerment for Faster Results

## ➤ UPLOAD MANAGER

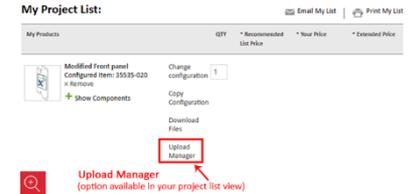

Modify components in YOUR CAD system and attach (upload) to changes to your configuration saved in your project list.

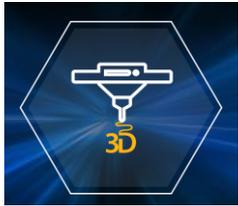

Add cut-outs, text, graphics or change the color directly in our online configurator or download the CAD Model and customize it in your own CAD system. Then upload the modified CAD model to your personal project list.

In addition other files can also be attached (uploaded) to a configuration, for e.g. print data, further requirements or specifications.

This option is only available for configured products and for registered users.

## ➤ 3D PRINTING

Download the STL file from the online configurator, which supplies the geometrical information of three-dimensional data models for creating a model with a 3D printer.

Print instantly and locally your modified front panel on YOUR 3D printer and validate the dimensions your design.

By using your own 3D printer, you'll receive the data at no cost; no license fees will be due

## ➤ INSTANT QUOTE - A SIMPLE WAY TO DELIVER WINNING PROPOSALS!

create proposals and custom quotes in minutes

From basic information and in just a few clicks, you can receive an instant quote and save time.

*Will be available in 2019*

# Creating Standards: ONLINE CONFIGURATORS

## ELECTRONICS CABINETS Novastar

Aluminum frame cabinets with attractive design, ideally suited for :

- General electronics,
- Test & measurement,
- Audio/video broadcasting applications.

## ELECTRONICS CABINETS Varistar

The modular concept ensures the highest flexibility on a single platform. The welded frame and robust steel profiles allow the greatest range of applications :

- Data Centers,
- General Electronics,
- Transportation,
- Naval, Telecommunication,
- Security & Defense.

## FRONT PANELS

Front Panels serve as the installation and the protection of the Printed Circuit Board in a subrack and a case and offer respective I/O options.

- Aesthetic front panel for mounting into 19"enclosures
- Test & Measurement
- Railway
- Advanced Physics
- Industrial
- Automation

## PCB ACCESSORIES Wedge locks

Thermal Performance

- High Performance Retainers
- Security & Defense
- Aerospace
- Railway
