**BURNDY WEJTAP™**

**CONNECTION SYSTEM**

BURNDY®, a leading manufacturer of quality electrical connectors for over 70 years, introduces the WEJTAP™ SYSTEM, a system that adds further dimension to the existing BURNDY® group of proven, reliable connection systems.

**WEJTAP™ COMPONENTS** are designed to provide a reliable system connection. The system consists of WEJTAP™ connectors, installation tools (including a variety of hotline and lineman accessories) and a unique power-booster.

**WEJTAP™ CONNECTORS** use an aluminum alloy wedge that is power-driven between the run and the tap cables locking them into a “C” shaped tempered aluminum alloy spring-body. The spring-body maintains consistent pressure throughout the life of the connection to ensure reliability during severe electrical and climatic conditions. The wedge’s wiping action combined with factory installed PENTX 1530 provides superior contact integrity. The wedge is automatically locked onto the spring-body by a skiving action produced by a lance at the forward end of the WEJTAP™ installation tool.

The **WEJTAP™ TOOL** is a one-piece assembly that consists of a head and power unit. Two color-coded interchangeable heads accept all WEJTAP™ connectors and STIRRUP™. The design of the tool recognizes the need for simplicity and speed of operation as well as outstanding safety features such as automatic gas release vented away from the operator, fast simple breech loading and fast advance when engaging the connector assembly. No loose parts to drop or misplace and a booster ejection system that provides further safety to the operator. Fewer simplified hotline devices and handy lineman accessories complete an outstanding tool package.

The **WEJTAP™ POWER-BOOSTER** Patented is a self-contained device that provides the force necessary to drive the wedge into direct contact with the conductors. The booster is activated only when properly positioned in the tool assembly. A power cell in the booster is recessed to guard against premature discharge. The tool/booster system is designed to activate and deactivate the booster automatically should the operator decide to remove the tool from a connector prior to completing the installation. The deactivated booster may be safely removed from the tool.

J-3

**Features and Benefits**

- Large conductor chamfer on ends of wedge
  - ◊ Instant hand or visual identification of large run grooves. Ensures correct wedge orientation.
- Color-coded WEJTAP™ connector and booster packaged together
  - ◊ Easy selection by installer.
- Factory coated grooves with PENTX 1530
  - ◊ Maintains low contact resistance, assists in protection against climatic conditions and is compatible with common insulations.
- One-piece tool
  - ◊ No project delays due to dropped or lost parts.
- Fewer and improved hotstick accessories
  - ◊ Simplifies hotline installation and saves time.
- Contained booster ejection system
  - ◊ Safe for operator guards against the booster being ejected in direction of the installer.

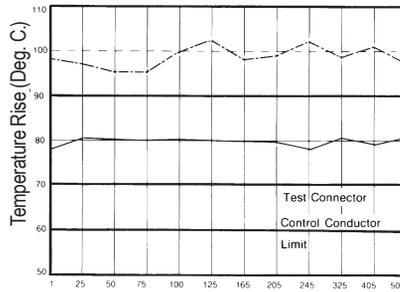

- Automatic gas release vented away from operator
  - ◊ Eliminates manual gas venting and improves safety.
- Simplified loading
  - ◊ Speeds installation — no threads — just depress safety bar, twist and pull open — load — push and twist to close prior to applying connector.
- Acme-type threads
  - ◊ Provides smooth, fast engagement of tool and connector — saves installer's time.

### WEJTAP™ AND TEST DATA

WEJTAP™ connectors have been subjected to extensive tests simulating the most severe service and weather conditions. In addition, the WEJTAP™ system meets or exceeds the industry standards of ANSI C119.4 Class 3, NEMA CC3 1973 Class AA, 500 Heat Cycles.

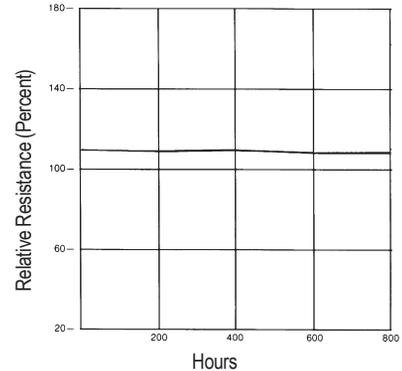

As with all BURNDY® connectors, the WEJTAP™ has been designed to operate cooler than the attached conductors. The WEJTAP™ connectors have also been subjected to the ASTM B117-73 Salt Spray Test. The results are shown to the right.

**ANSI C119.4 - 1986 Heat Cycle Test**  
Average Temperature Rise vs. Current Cycles

Detailed test report packages are available upon request.

**ASTM Salt Spray Test**  
Average % Relative Resistance vs. Hours of Salt Spray Exposure

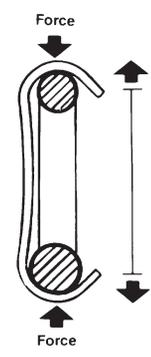

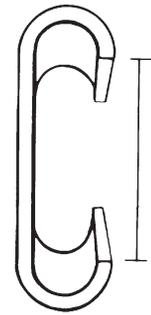

### WEJTAP™

C-member bodies are color-coded and the wedges are marked with nominal conductor run and tap ranges. WEJTAP™ connector packages are labeled with a variety of common conductors with their nominal ranges.

RUS Accepted

J-4

- WEJTAP™ connector wedges are marked with nominal ACSR, Aluminum and Copper concentric standard conductors.
- Red WEJTAP™ connector range  
Run 8-1/0 Tap 8-2
- Blue WEJTAP™ connector range  
Run 2-300 Tap 6-300
- Yellow WEJTAP™ connector range  
Run 266.8-1590 Tap 6-1590

All WEJTAP™ wedges contain a clearly defined chamfer on the large end of the run conductor groove to identify the "large run" groove. Installers will appreciate the convenience of visual or hand identification for correct wedge positioning.

WEJTAP™ wedges are driven between the run and tap conductors and activate the spring characteristics of the "C" shaped body. This action maintains contact pressure even when the connection is subjected to severe climatic and electrical conditions.

The BURNDY® WEJTAP™ System has a wide variety of connectors available for many different conductor ranges.

Color coded boosters and connectors ensure proper matching during installation.

The BURNDY® Power Booster is designed and engineered for the highest reliability and safety. Proven rimfire design means misfires are almost nonexistent. Close manufacturing component tolerances provide maximum resistance to moisture or submersion.

**ORDERING INFORMATION**

■ Power boosters may be ordered separately in boxes of 25.

- Red boosters    **Cat. # WPBRN Box 25**
- Blue boosters    **Cat. # WPBBN Box 25**
- Yellow boosters    **Cat. # WPBYN Box 25**

Select appropriate connector; match with equal number of color coded boosters (see below).

WPB—Red, Blue, Yellow Boosters

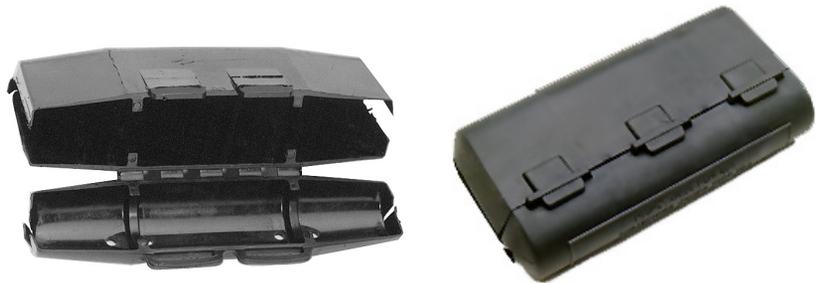

For information about conductors which are not listed, and for further ordering information, please contact BURNDY® at 1-800-346-4175.

J-5

**WEJTAP™ COVER**

WEJTAP™ Covers are installed on WEJTAP™ connectors to prevent them from coming in contact with other taps or exposed ground points. The covers are rugged snap-on devices available in four sizes to cover all connector sizes.

| Cover Catalog Number | WEJTAP™ Size        | Nominal Conductor Range Run | Nominal Conductor Range Tap | Cover Color         |
|----------------------|---------------------|-----------------------------|-----------------------------|---------------------|
| WCCR                 | Small Old Style Red | 8-1/0                       | 8-2                         | Black Weather Rated |
| WCCB                 | Red & Blue          | 2-300                       | 6-300                       |                     |
| WCCSY                | Small (Yellow)      | 300-556.50                  | 6-556.50                    |                     |

**WEJTAP™  
COPPER WEJTAP™**

**CONNECTION SYSTEM**

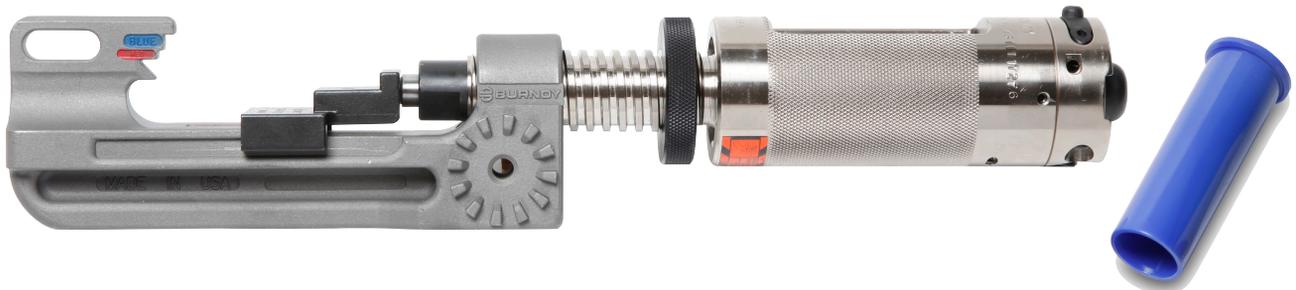

The BURNDY® Copper WEJTAP™ powder actuated copper connectors are designed for overhead copper to copper tap applications.

**Features include:**

- Newly expanded range taking capabilities
- New larger size connector for #6 - #2 applications
- Uses standard BURNDY® WEJTAP™ tooling without the need for installation platforms
- Meets latest ANSI C119.4 (2011) including optional fault current test annex
- Prefilled with PENETROX™ E to improve the performance over the life of the connection

J-11

**WEJTAP™  
INSTALLATION  
TOOLS**

**Type WTB**

The WEJTAP™ patented tool body is a one-piece assembly basic drive mechanism used to install WEJTAP™ and STIRRUP™ connectors ranging from #8 AWG through 1590 kcmil ACSR.

**Type WTHRB1S**

WEJTAP™ tool head operating platform for small and medium range (red/blue coded) connectors.

**Type WTHY1S**

WEJTAP™ tool head operating platform for medium and large range (yellow coded) connectors.

**WEJTAP™  
INSTALLATION TOOL  
ACCESSORIES**

J-12

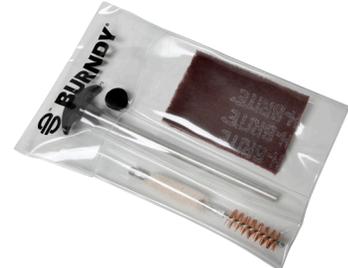

**Type WTOCBR**

WEJTAP™ removal clip for red type II and medium (blue coded) tap connectors used with type WTHRB tool head.

**Type WTOCY**

WEJTAP™ removal clip for large (yellow coded) tap connectors used with type WTHY tool head.

**Type WTCK**

WEJTAP™ tool cleaning/maintenance kit for use with type WTB tool body.

**Type WTBASY1**

WEJTAP™ ram replacement assembly.

**WEJTAP™**  
**POWERLUG™**

WEJTAP™ POWERLUG™ terminals are made of cast aluminum alloy for termination of ACSR and Aluminum conductors.

**NOTE:** The recommended connector and booster are ordered separately. Catalog number is for the POWERLUG™ only. Use the Tap Groove Connector diameter, along with the application run conductor diameter, to choose the correct WEJTAP™ connector.

**MULTIPLE CONDUCTOR TAP APPLICATION**

| Connector | *Run Groove                             | *Tap Groove                           |
|-----------|---|---------------------------------------|
| WCY 64 PB | Three - 1/0 ACSR (6/1) Diameter = 0.398 | One - 4/0 ACSR (6/1) Diameter = 0.563 |
| WCY 65 PB | Three - 1/0 ACSR (6/1) Diameter = 0.398 | One - 3/0 ACSR (6/1) Diameter = 0.502 |
| WCY 63 PB | Three - 2/0 ACSR (6/1) Diameter = 0.447 | One - 4/0 ACSR (6/1) Diameter = 0.563 |
| WCB 11 PB | Three - #4 stranded Diameter = 0.232    | One - 1/0 ACSR (6/1) Diameter = 0.398 |
| WCY 54 PB | Three - 1/0 stranded Diameter = 0.368   | One - 4/0 stranded Diameter = 0.522   |
| WCY 53 PB | Three - 1/0 stranded Diameter = 0.368   | One - 3/0 stranded Diameter = 0.464   |
| WCY 64 PB | Three - 2/0 stranded Diameter = 0.414   | One - 4/0 stranded Diameter = 0.522   |
| WCB 11 PB | Three - #4 stranded Diameter = 0.232    | One - 1/0 stranded Diameter = 0.368   |

\* Electrically, the three smaller conductors are the likely taps, however, during installation, they are located in the larger run groove due to their larger aggregate sum.

**WEJTAP™ HOTSTICK  
 ACCESSORIES**

**Type WHSCWH**

WEJTAP™ hotstick connector clamp used to hold the tap connector spring-body and wedge for installation on energized lines with the shotgun hotstick.

**Type WSHWHADP**

WEJTAP™ hotstick angle wedge holder adapter attaches wedge clamp to universal hotstick for hotline installation.

**Type WSHWB**

WEJTAP™ hotstick wirebrush attaches to the universal hotstick for cleaning the contact surface of the line conductor.

**Type WHSPBC**

WEJTAP™ hotstick dual cable clamp used to hold run and tap conductors in position during hotline installation. Universal for all applications from #8-1272 ACSR.

**Type WCHAWAS**

WEJTAP™ hotstick angle wedge holder adapter attaches wedge clamp to universal hotstick for hotline installation with shotgun stick.

**Type WSHGB**

WEJTAP™ hotstick breech drive. Geared shotgun hotstick adapter easily latches to the breech end of WEJTAP™ installation tool without disassembly for use on energized lines.

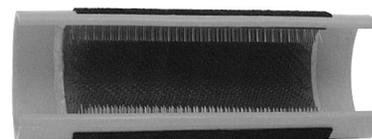

**Type WHSSADP**

WEJTAP™ hotstick spring loaded 90 degree adapter, used to attach tool to universal hot-stick for hotline installations.

**Type WHSTA**

WEJTAP™ hotstick tool (actuator) hammer attaches to the universal hotstick for striking the tool actuator button to complete the installation.

**Type WHHWB**

WEJTAP™ hand-held wire brush for cleaning surface contact areas on non-energized conductors.

**WEJTAP™ KIT  
ORDERING  
INSTRUCTIONS**

**Type WTCC  
(Carrying Case Only)**

WEJTAP™ plastic carrying case. Designed for rugged use in all weather conditions. It accommodates WEJTAP™ installation tool, removal clips, and cleaning kit.

**Type WABAG**

WEJTAP™ accessories bag is designed for use in carrying installation tool(s), removal clips, and cleaning kit. Hotstick accessories may be accommodated as well. Holders for power boosters are conveniently located on the outside of the bag.

### WEJTAP™ In-Line Disconnect

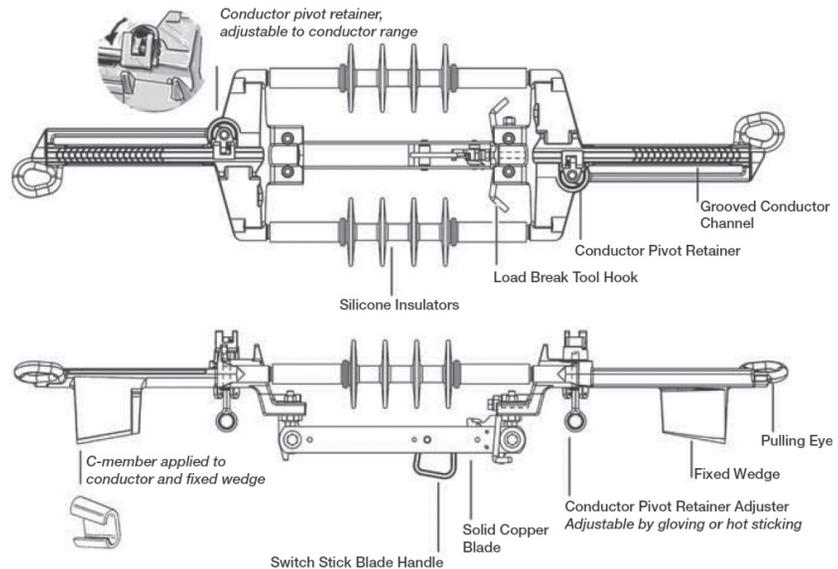

The BURNDY® In-Line Disconnect utilizes proven WEJTAP™ Technology in combination with industry standard components to provide reliable performance of switch applications.

- Utilizes WEJTAP™ connectors for securing the switch to the distribution line in tension applications.
- Utilizes industry recognized and proven GST&D Products, LTD. blade components along with dual Advance Rubber Products, Inc., Insulators attached to a BURNDY® designed yoke plate assembly.
- WEJTAP™ In-Line Disconnect designed for use in gloving and hot stick applications in conjunction with an industry standard load break tool.
- Dual insulators minimize the switch movement during opening and closing of the blade.
- Installation steps are minimized. The switch can be snapped directly on the line and secured with our conductor pivot retainer, designed into the switch frame.
- WEJTAP™ tooling is used to secure the "C Member" to the built-in wedge feature of the frame. Providing reliable mechanical and electrical performance.
- The blade is positioned on the switch to simplify cutting the conductor during installation.
- In-Line Disconnect is removable and reusable.
- Other conductor sizes available. Please contact factory.

**WADM Bolted Wedge  
In-Line Disconnect Switch**

Combining with the best features of the WEJTAP™ In-Line Disconnect Switch, the WADM Bolted Wedge enhances the range taking capabilities with an innovative hybrid bolted connector while maintaining the time saving features.

1. Bolted hybrid connector combines bolted technology with wedge features to make a reliable connection while taking the guess work of knowing when “tight is tight”.
2. Spring loaded pivot retainer snaps onto the conductor freeing the hands of the installer to quickly and safely complete the installation.
3. Dual insulators minimize the switch rotation during opening and closing, especially in mid-span applications.
4. The switch can be easily removed and reused (reconditioning required).

**Product Specifications**

**Voltage:** 15 kV (110 kV BIL)  
29 kV (150 kV BIL)  
35 kV (200 kV BIL)

**Current:** 900 Ampere RMS

**Strength:** Body 10,000 lbs

J-17
