MALLORY Precision electronic components

Introduction

The Mallory General Catalog presents in condensed form the thousands of precision electronic components available from Franchised Mallory Distributors. For more detailed information about specific products, ask your distributor for the appropriate Mallory technical bulletin.

This edition of the General Catalog contains many new products. Some are additions to existing lines and others are completely new products not previously available from Mallory. All are identified by a large dot either along side of the Mallory catalog number or the product description.

Because of the extremely broad nature of the Mallory line, some of the products shown in this catalog may not be stocked by your local Mallory Distributor. He will, however, be pleased to help you in every way possible. Remember, your Mallory Distributor is your best source for all of your electronic requirements.

Up to date price sheets, on all of our products, are available from your local Mallory Distributor.

In the interests of improved design and performance, Emhart reserves the right to make changes in any specification shown.

Table of Contents

| PRODUCT | PAGE | PRODUCT | PAGE | | | |
|---|--|--------------|--|--|------------|--|
| ALUMINUM ELECTROLYTIC CAPACITORS | | | | | | |
| CYLINDRICAL TYPES | | | | | | |
| •CGO | Computer grade, low post, low controlled ESR, low impedance, to 85°C | 7, 15 | OPRN | Rectangular can, quick disconnect terminals, non-PCB, U/L and CSA approved, AC Motor Run, to 70°C | 37 | |
| CGS | Computer grade, high post, high C/V product, to 85°C | 8 thru 9, 15 | RPN | Round can, quick disconnect terminals, non-PCB, U/L and CSA approved, AC Motor Run, to 70°C | 37 | |
| CG | Computer grade, high post, high reliability, long life, to 85°C | 12, 13, 15 | •MPD/MPF | Round can, metallized polypropylene film, quick connect terminals, AC Motor Run, to 70°C | 38 | |
| CGR | Computer grade, high post, high performance, low ESR, high ripple, to 85°C | 14, 15 | PSU | Phenolic case, cylindrical, low post, EIA Type 2, AC Motor Starting, to 65°C | 39 | |
| HES | Computer grade, high post, low ESR/inductance, high energy storage, to 85°C | 15 | HARDWARE | | | |
| SFC | Computer grade, bus type terminals, low ESR/impedance, high ripple, stacked foil, to 85°C | 16 | Assorted capacitor 40, 41, 42 | | | |
| HC | Phenolic case, low post, high C/V product, polar, to 85°C | 17 | TANTALUM ELECTROLYTIC CAPACITORS | | | |
| NP | Phenolic case, low post, non-polar, to 85°C | 17 | SOLID ELECTROLYTE TYPES | | | |
| FF, HC, FP | Photoflash, polar to 85°C | 17 | INDUSTRIAL (NON-MILITARY) | | | |
| FP, PFP, WP, PWP | Metal can, twist prong/printed circuit mount, single, dual, triple, quad section, polar, to 85°C | 17 thru 21 | TDC | Epoxy coated, color dipped, radial leads, .125"/.250" lead spacing, to 85°C | 43, 44, 45 | |
| TUBULAR TYPES | | | | | | |
| TCG | Computer grade, axial leads, low ESR, long life, to 85°C | 22 | TDL | Epoxy coated, color dipped, radial leads, .100"/.200" lead spacing, to 85°C | 43, 44, 45 | |
| TCX | Computer grade, axial leads, high performance, high ripple, to 105°C | 23 | TDM | Epoxy coated, color dipped, radial leads, low profile, .125"/.200" or .250" lead spacing, to 85°C | 43, 44, 45 | |
| TT | Miniature, axial leads, welded construction, polar, to 85°C | 24, 25 | TIM | Molded rectangular case, low ESR, radial leads, four case sizes, to 125°C | 46, 47 | |
| TC | Axial leads, high performance, polar, to 85°C | 26, 27 | TAC | Molded tubular case, low ESR, axial leads, four case sizes, to 125°C | 48, 49 | |
| TCN | Axial leads, non-polar, to 85°C | 26, 27 | TAS | Metal tubular case, hermetic seal, axial leads, to 125°C | 50 | |
| TCD | Insulated leads, dual section, polar, to 85°C | 27 | TXA | Metal tubular case, hermetic seal, axial leads, extended range, to 125°C | 50, 51 | |
| TCT | Insulated leads, triple section, polar, to 85°C | 27 | THF | Metal tubular case, high frequency, low impedance, axial leads, to 125°C | 53 | |
| •VTL | Miniature, single-ended, low ESR, low DCL, welded construction, polar, to 85°C | 28 thru 31 | MILITARY (NON-ER) | | | |
| •VTE | Miniature, radial leads, low ESR, extremely low DCL, welded construction, polar, to 85°C | 32 | CS12/13 | (MIL-C-26655) Metal case, tubular, hermetic seal axial leads, to 125°C | 51, 52 | |
| QLA | High performance, four-terminal, axial leads, low impedance, polar, to 105°C | 33 | MILITARY ESTABLISHED RELIABILITY (MIL-C-39003) | | | |
| VPR | High performance, vertical mount, low ESR impedance, polar, to 105°C | 34, 35 | CSR13 | Metal case, tubular, hermetic seal, axial leads, polar, failure rate level to "S", to 125°C | 54 | |
| AC TYPES | | | CSR23 | Metal case, tubular, hermetic seal, axial leads, polar, failure rate level to "R", low DCL, to 125°C | 55 | |
| OPN | Oval can, quick disconnect terminals, non-PCB, U/L and CSA approved, AC Motor Run, to 70°C | 36 | | | | |

Consult your local Mallory distributor for price information.

Table of Contents

| PRODUCT | PAGE | PRODUCT | PAGE | | | |
|--|---|----------------|-----------------|---|--|--------|
| CSR33 | Metal case, tubular, hermetic seal, axial leads, polar, failure rate level to "P", extremely low DCL, to 125°C..... | 56 | •S | Temperature Frequency/Stable, 500-1000 volts, radial leads, to 85°C | 78, 69 | |
| LIQUID ELECTROLYTE TYPES | | | | | | |
| INDUSTRIAL (NON-MILITARY) | | | | | | |
| CTL | Copper case, elastomer seal, low DCL, axial leads, to 125°C..... | 57 | •H | High voltage, Class 2, 2000-6000 volts, radial leads, to 85°C | 78, 69 | |
| TLS | Silver case, elastomer seal, axial leads, to 125°C | 58, 59 | •U | U/L recognized, across-the-line, AC bypass, 150 VAC rms, radial leads, to 85°C | 79, 69 | |
| TLH | Silver case, extended range TLS, elastomer seal, axial leads, to 125°C | 58, 59 | | | | |
| •TLW | Silver case, hermetic seal, low DCL, axial leads, to 175°C | 61 | | | | |
| MTP | Silver case, red epoxy end fill, miniature, high C/V product, elastomer seal, axial leads, to 85°C | 66 | | | | |
| CMT | Copper case, red epoxy end fill, miniature, high C/V product, elastomer seal, axial leads, to 85°C | 66 | | | | |
| TAP | Miniature, low DCL, axial leads, to 85°C | 67 | | | | |
| TNT | Miniature, low DCL, axial leads, to 85°C | 67 | | | | |
| XTM | Steel tubular case, high voltage, axial leads, to 175°C | 68 | | | | |
| XTH | Steel cylindrical case, high voltage, solder lug terminals, to 175°C | 68 | | | | |
| XTL | Steel cylindrical case, high voltage, solder lug terminals, to 175°C | 68 | | | | |
| XTV | Steel cylindrical case, high voltage, solder lug terminals, to 175°C | 68 | | | | |
| MILITARY (NON-ER) MIL-C-3965 | | | | | | |
| TLS | (CL64/65) Silver case, tubular, elastomer seal, axial leads, to 125°C | 58, 59 | CK05 | Molded ceramic, radial leads, X7R, .200" lead spacing, to 125°C | 85, 86 | |
| •CL66/67 | Silver case, tubular, elastomer seal, axial leads, to 125°C | 60 | CK06 | Molded ceramic, radial leads, X7R, .200" lead spacing, to 125°C | 85, 86 | |
| •CL55 | Steel case, rectangular module, hermetic seal, to 125°C | 65 | CK12 | Molded ceramic, axial leads, X7R, to 125°C .. | 87, 86 | |
| MILITARY ESTABLISHED RELIABILITY (MIL-C-39006) | | | | | | |
| CLR65 | Silver case, tubular, hermetic seal, axial leads, failure rate level to "R", to 125°C | 62, 63 | CK13 | Molded ceramic, axial leads, X7R, to 125°C .. | 87, 86 | |
| CLR69 | Silver case, tubular, hermetic seal, axial leads, failure rate level to "P", to 125°C | 64 | CK14 | Molded ceramic, axial leads, X7R, to 125°C .. | 87, 86 | |
| CLR10 | Steel case, tubular, hermetic seal, axial leads, failure rate level to "P", to 125°C | 68 | CK15 | Molded ceramic, axial leads, X7R, to 125°C .. | 87, 86 | |
| CLR14 | Steel case, cylindrical, hermetic seal, solder lug terminals, failure rate level to "P", to 125°C .. | 68 | CK16 | Molded ceramic, axial leads, X7R, to 125°C .. | 88, 86 | |
| CLR17 | Steel case, cylindrical, hermetic seal, solder lug terminals, failure rate level to "P", to 125°C .. | 68 | | | | |
| CERAMIC CAPACITORS | | | | | | |
| DISC TYPES | | | | | | |
| INDUSTRIAL (NON-MILITARY) | | | | | | |
| •A | Spark-Arrestor, 1000-2000 volts, radial leads, to 85°C | 70, 69 | DOORKNOB | | | |
| •L | Class 3, Semiconductor type, reduced titanite, radial leads, 12-50 volts, to 85°C | 71, 69 | M500P30KV | High voltage ceramic (30,000 volts), with two terminals, Z5U, to 85°C | 89 | |
| •G | General purpose, radial leads, 50-1000 volts, to 85°C | 72, 73, 69 | | | | |
| •C | Temperature Compensating, NPO through S2L, radial leads, 50-1000 volts, to 85°C | 74 thru 77, 69 | FILM CAPACITORS | | | |
| | | | | | | |
| | | | | POLYESTER TYPES | | |
| | | | | EWF | Polyester wrap and fill, axial leads, end sealed in epoxy, 100-630 volts, to 125°C | 89 |
| | | | | PVC | Epoxy coated, radial leads, 100-1000 volts, to 125°C | 90, 91 |

| POLYPROPYLENE TYPES | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| PVC16 | Epoxy coated, radial leads, high surge, 1600 volts, to 105°C. | 91 | MB | Capping button, used with CBSS spacers | 98 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| PVC2X | Epoxy coated, radial leads, high surge, 2000 volts, to 105°C. | 91 | PCG | Printed circuit guides | 98 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| POLYSTYRENE TYPES | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| SX | Fused polystyrene, negative temperature coefficient, axial leads, 630 volts, to 85°C. | 92, 93 | RCG | Rack card guides | 98 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| SXM | Fused polystyrene, negative temperature coefficient, axial leads, 160 volts, to 85°C. | 92, 93 | CBG | Circuit board edge guide. | 98 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| SXK | Fused polystyrene, negative temperature coefficient, axial leads, 33 volts, to 85°C. | 92, 93 | CBE | Circuit board ejector. | 99 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| SXL | Fused polystyrene, negative temperature coefficient, axial leads, 63 volts, to 85°C. | 92, 93 | CCP | Circuit board puller | 99 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| FASTENING DEVICES | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| CABLE TIES | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| •T | U.L. recognized nylon flat ties | 94 | BMS | Circuit board hold down | 99 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| •RT | Reusable nylon flat ties | 94 | HLCBS | Hinged circuit board edge support | 99 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| •IT | Identification ties. | 94 | SPACERS | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| EZ | Removable beaded ties in five colors | 94 | PT | Removable beaded ties with pushbutton that locks into panel | 94 | SN | Spacer nut, expanding type | 100 | TENSION GUNS | | | | •MARK III | Standard tension gun | 94 | SS | Plastic spacers | 101 | •MARK V | Low cost tension gun | 94 | HS | ex spacer standoffs | 101 | •HDT150 | Heavy duty tensioner, works with all ties. | 94 | MISCELLANEOUS | | | TIE HOLDERS | | | | FTH | Holders for flat ties | 94 | SNGS | Serrated nylon grommet | 99 | TL | Twist lock tie | 95 | NGS | Nylon grommet | 99 | CLAMPS AND CLIPS | | | | FCC | Flat cable clamp, adhesive backed | 96 | D, F & R | Strain relief bushings | 100 | •CFCC | Adhesive backed, flat cable clamp | 96 | HR | Harness spiral wrap | 100 | N | Nylon cable clamps, $\frac{3}{8}$ " wide | 95 | #4-3 through #250-24 | Screw insulators and bushings | 101 | E | Ethyl cellulose cable clamps, $\frac{1}{2}$ " wide | 95 | CONTROL PRODUCTS | | | AL | Aluminum cable clamps | 95 | CARBON CONTROLS | | | NE | Aluminum, vinyl dipped cable clamps | 95 | U | Carbon control, bushing mount | 103, 104 | SK | Aluminum cable clips, adhesive backed | 96 | FCT | Carbon element, focus control | 103, 104 | HUC | Cable or tubing anchor, adhesive backed | 96 | FCR | Carbon element, focus control rear shaft | 103, 104 | CH | Cable hanger | 95 | SU | Carbon element, bushing mount nylon shaft | 103, 104 | KK | Cable or tubing anchor, adhesive backed | 96 | HVC | Carbon element, high voltage color control | 103, 104 | V | Vinyl component clip | 96 | US | Switch for PTA or U type controls | 103, 104, 105 | N-B | Nylon cable clamps, $\frac{1}{2}$ " wide | 95 | MLC | Carbon element, bushing mount subminiature control | 103, 104 | WIRE SADDLES | | | | WS | Open top wire saddle, barbed arrow tip fits .187" diameter hole | 97 | EZ | Carbon element, audio taper with rotary or push-pull switch | 105 | LWWS | Wide locking wire saddle | 97 | TRIMMER CONTROLS | | | RWWS | Extra wide locking wire saddle | 97 | MTC | Carbon element, miniature trimmer control | 103, 104 | LWS | Locking wire saddle, barbed arrow tip | 97 | RVA | Carbon element, subminiature trimmer | 106, 107 | WWS | Wide wire saddle | 97 | RVG | Cermet element, subminiature trimmer | 106, 107 | CIRCUIT BOARD SUPPORTS AND GUIDES | | | | CBS | Circuit board support, snaps into .187" diameter hole | 97 | •RVX | Conductive plastic element, subminiature trimmer | 106, 107 | LCBS | Locking circuit board support | 97 | POWER RHEOSTATS | | | LNCBS | Extra long circuit board support | 97 | 25K | 25 watt $\frac{3}{8}$ -32 bushing mount $1\frac{1}{16}$ " diameter | 108 | TCBS | Screw fastened circuit board support | 97 | 50K | 50 watt $\frac{3}{8}$ -32 bushing mount $2\frac{5}{16}$ " diameter | 108 | DLCBS | Dual locking circuit board support | 98 | 75K | 75 watt $\frac{3}{8}$ -32 bushing mount $2\frac{3}{4}$ " diameter | 108 | SCBS | Threaded circuit board support | 98 | 100K | 100 watt $\frac{3}{8}$ -32 bushing mount $3\frac{1}{8}$ " diameter | 108 | CBSS | Stacking circuit board spacers | 98 | 150K | 150 watt $\frac{3}{8}$ -32 bushing or screw mount 4" diameter | 108 |

| PRODUCT | PAGE | PRODUCT | PAGE | | | |
|------------------------------------|---|----------|------------------------------------|---|---|---------|
| LW | 4 watt bushing mount with short slotted shaft..... | 110, 112 | RAC | Heavy duty rotary AC switch, 6 amp rating, U.L. listed | 120 | |
| MG | 12½ watt bushing mount with ¾" knurled shaft | 110, 112 | MISCELLANEOUS SWITCHES | | | |
| MRB | 3 watt bushing mount with plug-in nylon shaft..... | 110, 112 | 6M | 1⅓" diameter miniature lever action switch, screw mount | 120 | |
| MRT | 3 watt tab mount with plug-in nylon shaft..... | 110, 112 | KR | Replacement push-pull AC switch, 6 amp rating, U.L. listed | 120 | |
| MRF | 3 watt flange mount with plug-in nylon shaft..... | 109, 112 | PPS | Heavy duty push-pull AC switch, 6 amp rating, U.L. listed | 120 | |
| MRP | 3 watt printed circuit mount with plug-in nylon shaft..... | 110, 112 | DIP SWITCHES | | | |
| MRC | 3 watt printed circuit mount with permanent knob | 109, 112 | 206 | Dual-in-line package switch networks | 116, 117 | |
| MRS | Nylon shaft for MR type controls | 109, 112 | CONNECTORS | | | |
| ATTENUATORS | | | | I.C. SOCKETS | | |
| RT | 10 watt T-pad | 112 | DILB | Solder tail, printed circuit board dual-in-line socket | 121 | |
| T | 15 watt T-pad | 112 | SEMICONDUCTOR PRODUCTS | | | |
| MGL | 50 watt L-pad | 112 | GENERAL LINE SEMICONDUCTORS | | | |
| MGT | 50 watt T-pad | 112 | PTC100 | Transistors | 122, 123, 124 | |
| RL | 10 watt L-pad | 112 | PTC200 | General purpose diodes | 122, 125 | |
| LL | 15 watt L-pad | 112 | PTC400 | Multi-cell diodes | 122, 125 | |
| RR | 10 watt stereo level control | 112 | PTC600 | Thyristors | 122, 126 | |
| MGLL | 50 watt dual L-pad | 112 | ZENER DIODES | | | |
| CIRCUIT BREAKERS | | | | ZB | 1 watt zener diodes | 126 |
| UL | Circuit breakers, U.L. approved anti-cheat | 113 | BRIDGE RECTIFIERS | | | |
| DB | Dual circuit breaker for color T.V. | 113 | CTP | Dual diode with common cathode, 1.5 amps .. | 126 | |
| CBB | Adapter plate for bushing mount | 113 | FW | Bridge rectifier, 2 amp | 126 | |
| ULB | Circuit breaker kits assorted | 113 | FWLC | Bridge rectifier, 4 amp | 126 | |
| CERAMIC FILTERS | | | | FWHF | Bridge rectifier, 8 amp | 126 |
| CGU | IF filter 455KHz | 113 | FWHH | Bridge rectifier, 25 amp | 126 | |
| SFE | IF filter 10.7MHz. | 113 | RECTIFIER DIODES | | | |
| RESISTOR PRODUCTS | | | | A | 1 amp silicon rectifier | 127 |
| TUBULAR WIREWOUND RESISTORS | | | | M2.5A | 2.5 amp silicon rectifier | 122 |
| AE | Axial leads, vitreous enamel coating | 114, 115 | 1N | Exact replacement industrial diodes | 122, 127 | |
| HJ | Hollow core, high power resistors, radial lugs | 114, 115 | S | Exact replacement industrial diodes | 127 | |
| AV | Adjustable high power resistors, radial lugs | 114, 115 | SI | Exact replacement industrial diodes | 127 | |
| SWITCH PRODUCTS | | | | VB | Exact replacement industrial diodes | 127 |
| ROTARY SWITCHES | | | | SONALERT | Audible signal devices | 128-131 |
| 4M | 1.5 amp rotary switch, bushing mount | 118 | MALLOBIN | Electronic component cabinets | 132 | |
| 5M | Miniature rotary switch, bushing mount | 119 | | | | |
| 12M | 1" diameter miniature rotary switch, .55 amps, bushing mount | 119 | | | | |
| 3000 Series | Enclosed rotary switch, 5 amps, bushing mount | 119 | | | | |

LOW ESR, LOW INDUCTANCE, LOW IMPEDANCE PERFORMANCE

The Mallory CGO capacitor, with its unique internal construction combined with a low resistance, non-aqueous electrolyte, provides the performance required for output filtering in switching power supplies.

The inherent low inductance of the CGO capacitor is evident in the typical impedance versus frequency curves provided in this bulletin. Equivalent Series Resistance is relatively constant from 5KHz through 50KHz.

All CGO capacitors are designed in a 1 1/8" diameter case and are available with either low (standard) or high No. 10-32 threaded insert terminals. Supplied with PVC Sleeve. Replaces: 622D, 3191/91F, 139R. Request bulletin 4-314 for complete technical data. For prices, request price sheet number 321.

HIGHLIGHTS

Capacitance - 2800 to 67000 μ F

Voltage - 5 to 55 WVDC

Capacitance tolerance - $\pm 20\%$; symmetrical

Temperature - -55°C to $+85^{\circ}\text{C}$

Case Sizes - 1.375 diameter with 8 can heights 2.125 to 5.625

Pressure sensitive safety vent

Choice of terminals - high or low post (standard)

High ripple current

Low, controlled ESR - symmetrical $\pm 30\%$ tolerance @ 20KHz

APPLICATIONS

Switching regulator power supply output filtering.

Other high frequency applications requiring any combination of low ESR, low inductance, high ripple current and/or wide temperature range provided by the Mallory CGO capacitor.

NOTE: To order high post terminals change last character in catalog number from "L" to "H", (special).

MALLORY CATALOG NUMBER

Mallory Type Number

This identifies the basic capacitor design

Capacitance

Expressed in microfarads. The first two digits are significant figures, the third is the number of zeroes.

Capacitance Tolerance

M = $\pm 20\%$

DC Voltage Rating

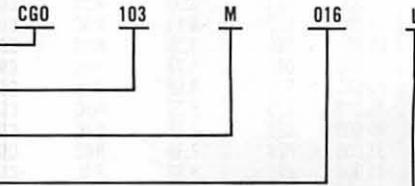

Expressed in volts. Zeroes are used to precede the voltage rating where necessary to complete the three digit block. 7R5 signifies 7.5 volts.

Terminal

H = High screw insert L = Low screw insert (standard)

•NEW PRODUCT

2. ORDERING INFORMATION

Consult your local Mallory distributor for price information.

*See page 15, for case code identification.

Specifications subject to
change without notice.

Type CGS Computer Grade Capacitors

MALLORY

The CGS is a high performance computer grade aluminum electrolytic capacitor in a rugged aluminum can with a choice of high (standard) or low post terminal configurations for mounting. The CGS excels in initial electrical performance and high ripple capability. For applications requiring exceptionally long life, the CGS excels. But, for work-horse power filtering and energy storage applications, the CGS is the top performer. With capacitances up to 540,000 μ F and ripple capability up to 30 amperes rms at 85°C, the CGS handles extreme application requirements with ease. Request bulletin 4-303 for complete technical data. For pricing, refer to price sheet No. 303. Replaces 36D; 36DX; 86F; 500; DCM.

HIGHLIGHTS

Capacitance Range—75 to 540,000 μ F

Voltage Range—3 to 450 WVDC

Capacity Tolerance—U = -10, +75%; T = -10, +50%

Operating Temperature—-40°C to +85°C

FEATURES

Low leakage current/low ESR

High ripple current capability

PVC insulating sleeve

High post terminals (standard)

● NEW PRODUCT

CGS — COMPUTER GRADE CROSS REFERENCE

The following cross reference contains old and new type numbers. As stocks of the old numbers are exhausted they will be replaced by the new number shown adjacent to it in the cross reference. There is no difference in the capacitor, only the part number is changed. Customers can switch to the new number with complete confidence.

Consult your local Mallory distributor for price information.

Type CG Computer Grade Capacitors

MALLORY

The CG's, the original aluminum electrolytic computer grade capacitors, were specifically designed and produced by Mallory during the early 1950's. They were made to provide the optimum in high reliability energy storage and filtering circuits demanded by a most vital national defense electronic system. These many thousands of CG capacitors are continuing to perform their functions. Mallory's present CG capacitor product retains all of the basic, time proven design standards of reliability to meet + 85°C operating conditions. Modern processing techniques also make CG capacitors available in higher capacitance values and lower ESR per container size without sacrifice of quality or performance. Request bulletin 4-304 for complete technical data. For pricing, refer to price sheet No. 302. Replaces 32D; FAH; 500; DCM.

HIGHLIGHTS

Capacitance Range—40 to 160,000 μ F

Voltage Range—10 to 450 WVDC

Capacity Tolerance—U = -10, +75%; T = -10, +50%

Operating Temperature—-40°C to +85°C

FEATURES

Long Life
Low leakage current
Low ESR

High ripple
PVC sleeve
High post terminals (standard)

CG — COMPUTER GRADE CROSS REFERENCE

The following cross reference contains old and new type numbers. As stocks of the old numbers are exhausted they will be replaced by the new number shown adjacent to it in the cross reference.

There is no difference in the capacitor, only the part number is changed. Customers can switch to the new number with complete confidence.

Type CGR Computer Grade Capacitors

MALLORY

High Performance

The CGR is specifically designed as a low ESR, high ripple current power supply filtering capacitor. Constructed in a rugged aluminum can with a choice of high or low 10-32 screw insert terminal assemblies. (High post terminals are standard and in stock for immediate delivery.) Outstanding features of the CGR are low ESR, low DC leakage current plus high ripple current capability over broad temperature and frequency ranges.

With capacitances up to 260,000 μ F and ripple capability up to 35.7 amperes at 20kHz at +85°C the CGR handles extreme application requirements with ease and reliability. The CGR has been successfully utilized as an output capacitor in some high frequency switching regulator power supplies. Ask for Bulletin 4-313 for additional rating and complete specifications. (Replaces 6020, 32DR, FAM, UFH, 92F, 101). For prices, reference price sheet No. 308.

HIGHLIGHTS

Capacitance Range — 140 to 260,000 μ F

Voltage Range — 6.3 to 100VDC

Capacity Tolerance: — 10% + 75% 0 thru 50 WVDC
— 10% + 50% 75 and 100 WVDC

Operating Temperature: — -55°C to +85°C

36 Case Sizes 1.375 x 1.750 thru
3.00 x 5.625

In charge-discharge applications such as welders, photoflash, strob lighting, magnetizers, etc., use type HES series for longer life. See Page 15.

High Energy Storage Capacitor Type HES

The HES is an aluminum electrolytic capacitor in a round can with a molded top similar in appearance to our computer grade types. It is an energy storage capacitor having low DC leakage current, low internal resistance and inductance which contribute to a minimum of loss during high peak current discharge. Circuits demanding these discharge currents can destroy conventional type of capacitors. The HES is designed for charge-discharge applications such as: Capacitor discharge welders; Photoflash; Strobe lights; Magnetizers and Demagnetizers; Laser activation, Screw terminal standard. Solder Lug Terminal available special order. Consult factory for other ratings. Tolerance: -0% +50%. Operating Temperature -40°C to +85°C.

*Bare Can Size. Add .078" to diameter and .125" to length for PVC insulating sleeve.

†Insert "R" for CGR or "S" for CGS type.

MALLORY TYPE NUMBER

This identifies the basic capacitor design.

CAPACITANCE:

Expressed in microfarads.

The first two digits are significant figures, the third is the number of zeroes.

CAPACITANCE TOLERANCE

U = -10%, + 75% (0 to 150 volts)

T = -10%, + 50% (151 volts and up)

G = -0%, + 50%

DC VOLTAGE RATING: Expressed in volts. Zeros are used to precede the voltage rating where necessary to complete the three digit block.

CASE CODE: (see Table of Dimensions above.)

Mallory part numbers shown in the capacitor bulletin include a suffix consisting of (3) characters. [Example: CGS712U075V4C3PH]. This suffix indicates sleeve type (3 = PVC); the polarity (P = Polar); and the terminal type (H = High Post).

Consult your local Mallory distributor for price information.

Type SFC Stacked Foil Capacitors

MALLORY

Design features of the SFC capacitor, including welded plate to terminal connections and massive bus type terminals have made it possible to significantly lower the equivalent series resistance and inductance of the SFC capacitor type as compared to the more conventional computer grade capacitor.

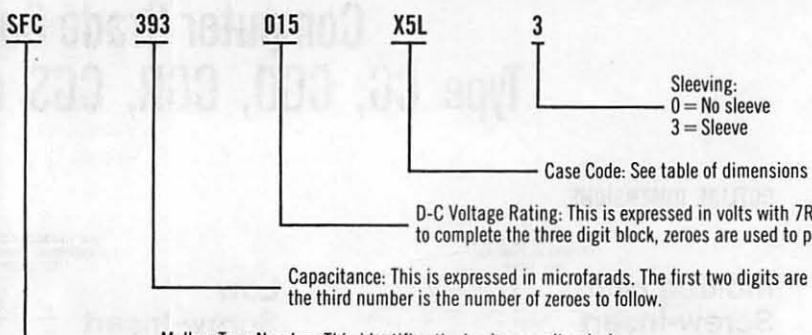

The lower AC loss characteristics of the SFC capacitor are manifested in lower equivalent series resistance, inductance, and impedance over a wide frequency range. This improved efficiency makes the SFC an excellent selection for those applications where high ripple current is encountered or where maximum effectiveness in accepting and releasing charge is required. The improved efficiency of this capacitor type additionally allows economy in size and weight where a multiple capacitor bank is necessary.

The SFC capacitor is available in a 3-inch diameter container and a height 4 1/8 inches or 5 5/8 inches. Standard capacitance values range from 6800 MFD to 100,000 MFD and DC working voltages range from 6VDC to 50VDC. The capacitor is equipped with a pressure sensitive safety vent and PVC insulating sleeve.

Operating Temperature: -40°C to +85°C. Replaces 432D. Ask for technical bulletin No. 4-310 for more detail. For prices, reference price sheet No. 309.

CATALOG NUMBERING SYSTEM

Please Specify By Complete Catalog Number, Such As:

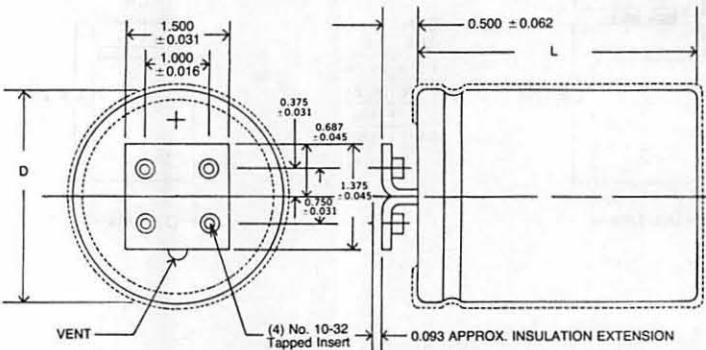

D-C Voltage Rating: This is expressed in volts with 7R5 signifying volts. Where necessary, to complete the three digit block, zeroes are used to precede the voltage rating.

Capacitance: This is expressed in microfarads. The first two digits are significant figures, the third number is the number of zeroes to follow.

Mallory Type Number: This identifies the basic capacitor design.

Capacity Tolerance: -0, +100%

Electrolytic Capacitors Type HC and NP

High Capacity Dry Electrolytics

HC and NP capacitors are furnished in heavy-duty molded phenolic cases with integral safety vent. HC types are polarized; NP types are non-polarized. Temp. Range: -20°C to +85°C except (*) which is +65°C max. Tolerance: Type HC — 0-50 WVDC, -10%, +150%; 51-350 WVDC, -10%, +100%; 351 WVDC up, -10%, +50%. Type NP — ±25%, all units. For prices, reference price sheet No. 304.

HC-NP DATA & DIMENSIONS

PHOTOFINIS CAPACITORS

HC45003 — 300 mfd, 450 WVDC. Plastic case, 2 1/16" dia. × 4 3/8". Max. DCL (at 5 min.) 5.5 mA.

FF45052 — 525 mfd, 450 WVDC. Plastic case, 2 1/16" dia. × 4 3/8". Max. DCL (at 5 min.) 2.0 mA.

FP240 — Specially engineered FP capacitor for photoflash use. Dual separate section, 50 mfd at 450 WVDC each section. May be used in parallel for 100 mfd. Supplied with cardboard insulating tube. Uses standard FP mounting plate. 1 3/8" × 3" dia.

†HES types are recommended for photoflash applications. See page 15.

For HC and NP Capacitor Hardware. See pages 40, 41 and 42.

Consult your local Mallory distributor for price information.

Type FP-WP Metal Can Electrolytic Capacitors

MALLORY

FP-WP Capacitors are designed for +85°C operation, through 450 volts, higher voltages designed for +65°C, and have standard twist-prong mounting lugs with solder terminals. PFP-PWP types use standard EIA printed circuit terminals and can be used in place of normal solder terminal types. All types use "etched cathode" construction for hum-free operation, and have an exclusive vent and seal design. Standard tolerance: Up to 50 WVDC, -10% to +150%; 51 to 350 WVDC, -10% to +100%; 351 WVDC and up -10% to +50%. For complete technical information request Bulletin 4-101. For prices, reference price sheet No. 300. Replaces: TVL, PCL, AA, BB, CC and DD. For FP-WP capacitor hardware and data see page 40 and 42.

Type TCG Tubular Computer Grade Capacitors

+85°C

MALLORY

The TCG Computer Grade capacitor is a small tubular version of the Mallory type CG electrolytic capacitor. Tolerance: 3 through 75 volts -10% +75%; all others -10% +50%. Replaces 39D, WHB, 977, 066. Request bulletin 4-307 for complete technical data. For prices, reference price sheet No. 305.

TCG FEATURES

Can Wall Safety Vent 1/2" dia. and above
Temperature Range: -40°C to +85°C

Widest Variety of Container Sizes
PVC Insulating Sleeve (Standard)

Mylar Sleeve (Optional)

Long Life

Low ESR

New Can Lengths and Diameters

All Welded Construction

Tubular Computer Grade Capacitors Type TCX

High Performance + 105°C

The type TCX axial leaded aluminum capacitors demonstrate good, reliable performance over the operating temperature range of -55°C to +105°C. In addition to its wide temperature range, this capacitor type also presents the advantages of moderately high CV product, excellent DC leakage current and dissipation factor performance, good stability versus temperature and a high ripple current capability. Tolerance: -10%, +75%, 3 thru 75 WVDC; -10%, +50%, 76 thru 150 WVDC. Supplied with Mylar® insulated sleeve. Replaces: 057 and UHH. Request bulletin 4-311 for complete technical data. For prices, reference price sheet no. 306.

Type TT Tubular Electrolytic Capacitors

Mallory TT capacitors are made from very high purity aluminum foil, deep-etched to provide maximum capacity per unit of volume. Etched cathode construction assures long hum-free operation. Utilize all-welded construction; exhibit exceptionally low DCL and ESR. Supplied in aluminum case with insulating sleeve; wire leads 2" lg. ($\pm \frac{1}{4}$). Operating Temperature Range: -40°C to $+85^{\circ}\text{C}$. Tolerance: -10% , $+75\%$. Request bulletin 4-104 for technical data. For prices refer to price sheet No. 310. Replaces EE, TE, WH110, 5000 and 5010.

*Size shown is for bare case. Add .015" to diameter and .062" to length for insulating sleeve.

Consult your local Mallory distributor for price information.

Type TC and TCN Tubular Electrolytic Capacitors

MALLORY

TC SINGLE SECTION (POLAR) and TCN SINGLE SECTION (NON-POLAR)

Mallory type TC and type TCN capacitors are single section metal tubulars with clear plastic insulating sleeves except those with the symbol (†) which have cardboard sleeving. The sizes listed below for TC and TCN capacitors without symbol (†) are bare unsleeved cans and you must add .015" to the diameter and .062" to the length to allow for plastic sleeving. Dimensions for capacitors with symbol (†) include the cardboard sleeve. Etched cathode construction is used in the manufacture of TC and TCN capacitors for maximum reliability. Type TC's and TCN's have 2" tinned leads except those shown with (■) which have 3" leads; TCD's and TCT's have 4" insulated leads. Temp. Range: -20° to +85°C. Tolerance: -10% to +100% up to 350 WVDC; -10%, +50% for 351 WVDC and up. For prices, refer to price sheet 316. Replaces TVA; WBR; BR.

•Type VTL Tubular Electrolytic Capacitors

MALLORY

Single Ended

The VTL is a miniaturized Aluminum Electrolytic Single-ended Capacitor which uses a newly developed high quality aluminum foil. These capacitors offer a maximum capacitance in low profile case sizes at operating voltages to 100 WVDC. The VTL offers excellent electrical performance and stability over a temperature range of -40°C to $+85^{\circ}\text{C}$. For more detailed information request Bulletin 9-765. (Replaces 502D, 503D, EV, LS, RH, RL, TW, ULA.) For prices, reference price sheet No. 311. To special order parts with epoxy end seal, place "E" suffix on part number and add .078" to part length. Diameters .395" or greater will have a scratch on vent.

HIGHLIGHTS:

Capacitance Range: 0.47 to 10,000 mfd.
Voltage Range: 6.3 to 100 WVDC
Temperature Range: -40°C to $+85^{\circ}\text{C}$
Capacity Tolerance: -10% , $+30\%$
Case Sizes: 12 sizes; $.197 \times .433$ to $.709 \times 1.575$ inches
Lead Spacing: .079 to .295 inches (See Standard Ratings List)
Lead Diameter: .020 to .032 inches (See Standard Ratings List)

KEY FEATURES:

Aluminum container with special Rubber end seal
All welded construction
PVC sleeving standard
Low DCL, Low ESR

APPLICATIONS:

Power Filtering
Bypass and coupling
Process instrumentation
Mobile radio and telephone
Automotive electronics

VTL ORDERING INFORMATION

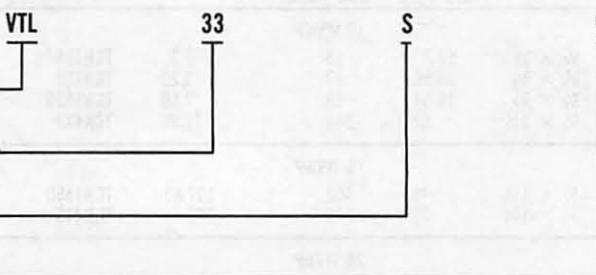

CATALOG NUMBER

Mallory type designation _____

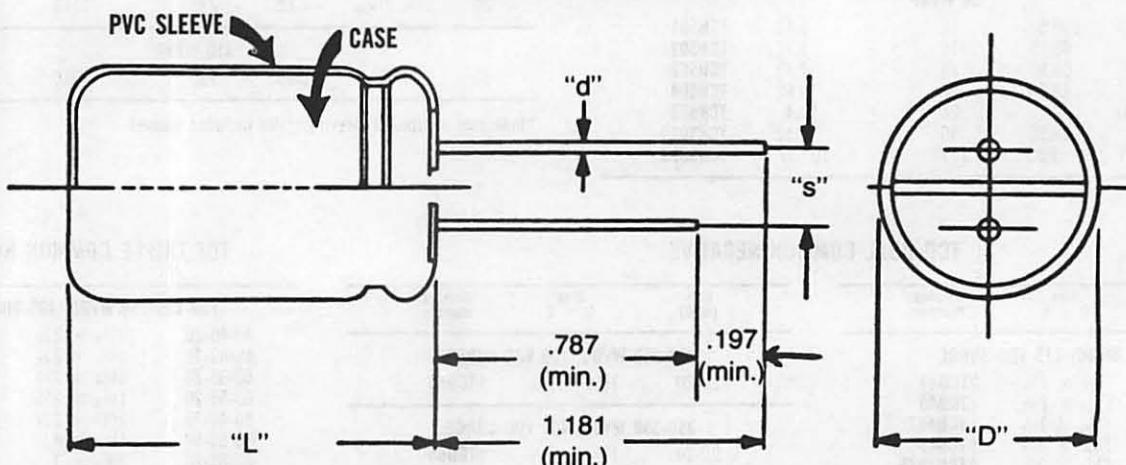

Capacity in microfarads _____

Tolerance: -10% , $+30\%$ _____

Voltage (working) DC at $+85^{\circ}\text{C}$ _____

TYPE VTL OUTLINE DIMENSIONS

Refer to Standard Ratings Table for additional information.

*Tolerance on length is as follows:

When "D" is .625" or under tolerance on "L" is $\pm .04"$.
If "D" is greater than .625" tolerance on "L" is $\pm .08"$.

EXPOSURE TO CLEANING SOLVENTS

Mallory capacitors have aluminum cases, elastomer end seals, ink identification marking and may have PVC sleeves. These materials are subject to chemical attack from some cleaning solvents. Solvent residues on the capacitors after cleaning may attack the aluminum cases. Solvent penetrating the capacitor end seal may cause internal corrosion resulting in short life. Cleaning methods for assemblies including Mallory Capacitors should be developed with the solvent vendor. Alternately, the capacitors may be mounted after cleaning the assemblies. Alcohol or water-detergent cleaning is not usually harmful but halogenated cleaning solvents are not recommended and should be avoided.

•Type VTE Low Leakage Aluminum Electrolytic Capacitors

MALLORY

Mallory is introducing an abbreviated line of low leakage miniature aluminum electrolytic capacitors with epoxy end seal. These capacitors have been designed for substitution in certain tantalum applications. These miniature aluminum electrolytics offer near comparable size plus: Lower DCL, Higher Reverse Voltage and a much lower cost. For pricing contact factory.

HIGHLIGHTS

Capacitance Range - .1 to 47 μ F
 Dimensions Dia. x Lgth.
 DCL μ A Catalog Number
 Temperature Range - -40°C to +85°C
 Capacity Tolerance - M = $\pm 20\%$ (standard)
 DCL = 0.002CV or 0.4 μ A whichever is greater

| Cap. (MFD) | Dimensions Dia. x Lgth. | DCL μ A | Catalog Number |

Four Terminal Tubular Capacitor Type QLA

High Performance + 105°C

The type QLA capacitor is designed as a four-terminal feed-thru device to provide low inductance and low impedance at operating frequencies well above 10KHz. Conventional two-terminal electrolytic capacitors are inductive above 10KHz.

The QLA has an axial lead configuration with positive and negative leads at both ends. Either end may be used for the input with the opposite end used for output to filter high frequency ripple.

Stock items supplied with Mylar® insulating sleeve and epoxy end fill. Replaces UFT; 604D. Request bulletin 4-107 for additional information. For prices, reference price sheet No. 312.

HIGHLIGHTS

Capacitance: To 14000 MFD
 Voltage: 5 to 200VDC
 Tolerance: -10% +75%, -10% +50%
 Temperature: -55°C to +105°C
 Case Sizes: 13 sizes available from $\frac{3}{4}'' \times \frac{1}{8}''$ to $1'' \times \frac{3}{8}''$

Four Terminal Tubular Capacitor Type QLA

High Performance + 105°C

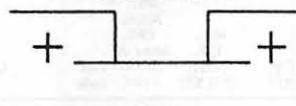

KEY FEATURES

Low Inductance above 10KHz (2nH max.)
 Low Impedance
 High Ripple Current Capability
 Wide Operating Temperature Range
 Can Wall Safety Vent

APPLICATIONS

Switching Regulators
 High Frequency Coupling

INTERNAL CONNECTIONS

Consult your local Mallory distributor for price information.

Specifications subject to change without notice.

Type VPR + 105°C Single-Ended Tubular Capacitors

MALLORY

High Performance

Designed for use in high frequency switching regulators where low impedance and low inductance characteristics are required. The A & C lead configuration are standard distributor items. The B, J, & T configurations are available on request.

Low loss high frequency characteristics make this capacitor ideal in bypass and coupling applications in data processing equipment. Supplied with Mylar® insulating sleeve. Replaces 672D/673D; 300/301. Ask for bulletin 4-106.

HIGHLIGHTS

Capacitance: From 34 to 18,000 μ F
 Voltage: From 6.3 to 100 volts
 Tolerance: -10 $+75\%$
 Temperature: -55°C to $+105^\circ\text{C}$
 Case Sizes: 22 sizes available from $\frac{1}{2}'' \times 1''$ to $1'' \times 3\frac{3}{8}''$ for vertical mounting in PC boards
 Grade: Industrial, Computer Grade

KEYS FEATURES

Low Impedance, Low ESR
 Low Inductance
 High Ripple Current Capability
 Wide Operating Temperature Range
 Excellent Temperature Stability
 Can Wall Safety Vent
 Five Different Lead Configurations

APPLICATIONS

Switching regulators
 High Frequency coupling
 Bypass circuits

**STANDARD FIG. A
(3/4", 7/8", 1" DIA.)****STANDARD FIG. C
(1/2" DIA. ONLY)****FIG. J***
(1/2", 3/4", 7/8", 1" DIA.)**FIG. T***
(1/2", 3/4", 7/8", 1" DIA.)**FIG. B**
(3/4", 7/8", 1" DIA.)**NOTES:**

1. *The T & J configurations, in the 3/4 dia. up will be supplied with standoffs "E".
2. Dimension "E" stand-off is nominally 0.100.

Consult your local Mallory distributor for price information.

Specifications subject to change without notice.

Type OP/RP AC Motor Run Capacitors

MALLORY

All types have metal cases and four blade quick-connect terminals with flash guards. Impregnating oil is Biodegradable non-PCB. Always connect AC line to red or marked terminal and winding to other terminal. Letter suffix "R" indicates a resistor across terminals of capacitor. All other suffix letters indicate case size changes. Allow $\frac{1}{2}$ " clearance above terminals for interrupter operation. Request bulletin 4-403 for complete technical data. For pricing, refer to price sheet No. 307. Replaces OV, 26F, KKN, KNN, P16.

HIGHLIGHTS

Capacitance Range—1 to 60 μF

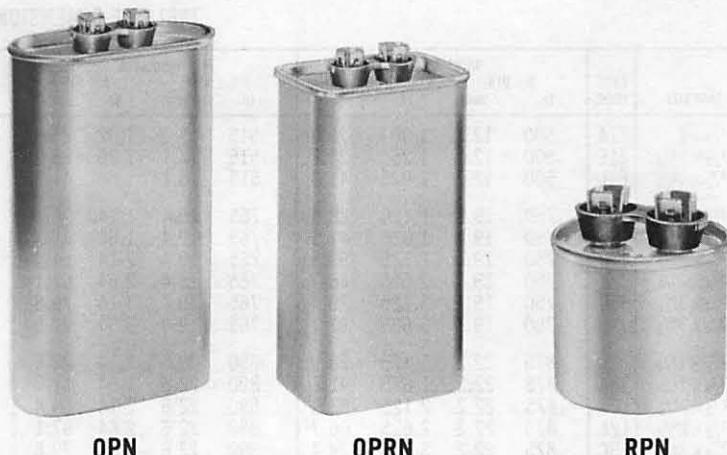

Voltage—236-660 VAC

Temperature Range— -55°C to $+70^\circ\text{C}$

Operating Frequency—50-60 Hz

FEATURES

- Internally protected
- U/L recognized (File No. E65270)
- CSA certified (File No. LR41685-2)

•Type MPD/MPF Metallized Polypropylene Capacitors

MALLORY

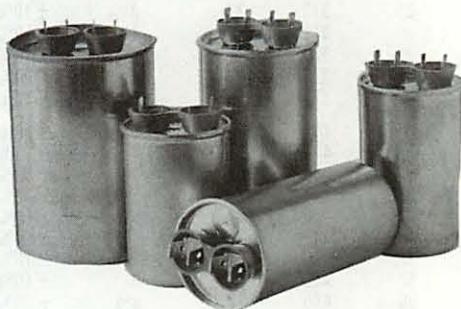

Metallized polypropylene film dielectric capacitors offer a new alternative for alternating current applications. These capacitors pack the same capacitance and voltage capabilities of a conventional paper capacitor into a smaller case of considerably lighter weight. In addition these parts have extremely low dissipation factors. They offer high reliability and long life and meet EIA Standard RS-456 Characteristic "E". Request bulletin 4-404 for complete technical data. For pricing, refer to price sheet No. 319. Replaces 315P, 325P, 97F3, Z23/24/26.

HIGHLIGHTS

- Capacitance Range — 2 to 60 μ F
- Capacity Tolerance — $\pm 10\%$ (standard)
- Voltage — 180 to 240 VAC dry;
330 to 440 VAC oil-filled.
- Operating Frequency — 50 to 60 Hz
- Dissipation Factor — 0.1% Max. @ 60Hz
- Operating Temperature — -40°C to +70°C
- U/L Recognized — yellow card number E65270 (N)

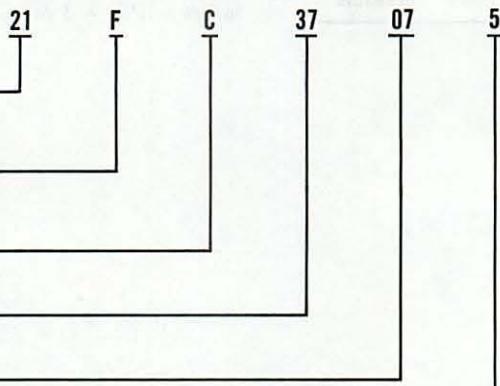

FEATURES

- Internal protector
- Oil-filled parts are environmentally safe
- Long life and high reliability

The PSU motor start capacitor is a dry electrolytic device that can be used to provide the torque necessary to start AC motors and in other intermittent AC applications. Cases are of moisture and oil resistant molded plastic. Equipped with two quick disconnect terminals. Mallory replacement motor start capacitors are designed in accordance with EIA RS-463, Type 2. May be mounted by means of PL plastic end cap and HB metal snap-in bracket or VR clamp bracket (order separately). Request bulletin 4-401 for complete technical data. For pricing, refer to price sheet No. 301. Replaces 3534/3535, 35F, AB.

HIGHLIGHTS

Capacitance Range—21 to 1536 μ F
Voltage—110–330 VAC
Operating Frequency—50–60 Hz
Power Factor—10% Max.
Temperature Range— -40°C , $+65^{\circ}\text{C}$

CYLINDRICAL CAPACITOR MOUNTING CLAMP, TYPE VR

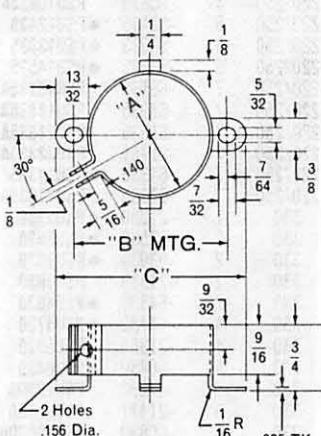

The Mallory VR mounting clamps can be used to mount any cylindrical capacitor with a $1\frac{1}{8}$ " to 3" diameter that is to be mounted in a vertical position. The standard finish is .0001" (nominal) cadmium plating. Use for mounting CG/CGS types, PSU/HC/NP types, RPN/MPD/MPF types.

These clips though designed for use with capacitors have varied applications to retain many cylindrical components. They are used extensively in the electrical and electronic industries to hold spindles, condensers, capacitors, tubes, rods and conduit. Clips have a phosphate and oil finish.

Type TDC-TDL-TDM Epoxy Dipped Solid Tantalum Capacitors

MALLORY

Type TDC-TDL-TDM capacitors offer the long life electrical stability characteristics of solid tantalum at low cost. The tough epoxy coating provides uniform lead spacing and protection against mechanical damage and moisture. These capacitors are ideal for industrial and consumer applications where premium performance, minimum size, and low cost are essential. Operating Temp.: -55°C to +85°C.

The TDC dip-coated solid tantalum capacitor offers high CV product in 4 miniature case sizes with radial stand-off lead spacing of .125 inch and .250 inch. Replaces 196D, T368 and DNS. For prices, refer to price sheet No. 359.

The TDL dip-coated solid tantalum capacitor is available in 6 low height case sizes with radial straight lead spacing of .100 inch and .200 inch. Replaces 199D. For prices, refer to price sheet No. 355.

The TDM is a low profile dip-coated rectangular thin body shaped solid tantalum capacitor available in 6 case sizes. Radial lead spacing is .125 inch and .200 inch in the smaller case sizes with .250 inch lead spacing in the larger case sizes. Replaces KNS. For prices refer to price sheet No. 356.

For additional information on TDC, TDL and TDM request bulletin 4-810.

KEY FEATURES

Tough epoxy conformal coating
Low cost
Miniature size, low profile
High capacitance per Case Size.
Low DCL, low ESR, low impedance
Long life

APPLICATIONS

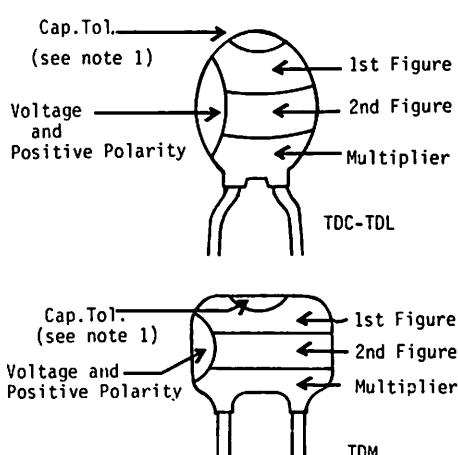

Bypass, Coupling, Timing, Filter circuits in consumer and industrial electronic equipment.

note 1 ±20% tolerance - no dot
 ±10% tolerance - silver dot
 ±5% tolerance - gold dot

* = Tolerance:
 Insert proper letter for tolerance desired i.e. M = ±20%, K = ±10%, J = ±5%

† = Lead Spacing:
 Insert proper letter. For TDC: N = .125", W = .250"; For TDL: S = .100", M = .200", W = .250" optional

§ = Lead Configuration and Length:
 Insert proper number or letter as follows:

For TDL: I = straight leads .875" max. length, 2 = standoff leads. For TDC and TDM: S = short leads .187" nominal, L = long leads 1.50" maximum length.

Consult your local Mallory distributor for price information.

Type TIM Molded Solid Tantalum Capacitors

MALLORY

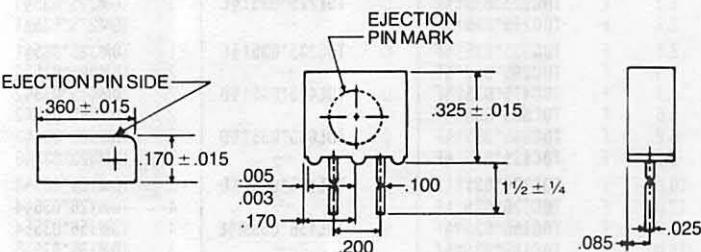

Type TIM solid electrolyte tantalum capacitors are fully molded in a rectangular epoxy case. Radial leads are precisely positioned to provide easy mounting on printed circuit boards. Electrical and environmental performance fits the needs of computer and industrial users. Four case sizes are available. Operating Temperature: -55°C to +85°C, (to +125°C with proper voltage derating). Replaces T330, PNS. Request bulletin 4-806 for complete technical data. For prices, request price sheet No. 358.

Type TAC Molded Solid Tantalum Capacitor

MALLORY

The TAC construction includes the same dry electrolyte sintered tantalum anode as used in high reliability military type capacitors. The capacitor is fully precision molded in high impact resistant epoxy cases specifically designed to close tolerances for adaptation to high speed automatic insertion applications. Cases are tapered at the positive lead for quick polarity identification. Lead wires are high purity nickel with solder coating. Reel packing is available on special request. Request bulletin 4-807 for complete technical data. For pricing, refer to price sheet No. 358. Replaces T310, T322, 1580, 154D, 173D.

HIGHLIGHTS

Capacitance Range - .082 to 68 μ F

Voltage - 6 - 50 VDC

Temperature Range - -55°C to +125°C

Operating Frequency - 120Hz

Type TAS-TXA Solid Tantalum Electrolyte Capacitors

MALLORY

TAS-TXA construction combines a sintered slug with solid electrolyte in a hermetically sealed case to provide long life with very stable electrical characteristics over a temperature range of -80°C to +85°C (to +125°C with proper voltage derating). Standard TAS capacitors offer ratings from 22μF at 50VDC to 330μF at 6 VDC in 4 sizes. Extended capacitance range is available as type TXA with ratings from 39μF at 50 VDC to 1000μF at 6 VDC, in the same 4 sizes as the TAS. TAS types are listed with uninsulated cases; for insulating sleeve, change 12th digit of catalog number from 0 to 1. Case Sizes: TAS-TXA sizes are indicated by the last letter in the part number (A, C, F, & G). Replaces 150D, T110, T140, XNS. Request bulletin 4-801 for additional information. For prices see price sheet No. 398.

VOLTAGES SHOWN ARE AT +85°C

Type CS12/13 Solid Tantalum Electrolyte Capacitors

MALLORY

 Mallory offers Solid Tantalum Capacitors constructed to meet MIL-C-26655A and MIL-C-26655B, types CS12 and CS13. Although these specifications are obsolete for new government contracts there are still many prints in the field which call for this Military designation. Order to the specifications by MIL number as listed on page 34. Unsulated CS12 types shown. For Insulating Sleeve specify CS13. Dimensions shown above. For prices, reference price sheet No. 398.

MALLORY

Solid Tantalum Capacitors Type THF

Switching Regulator Filter Capacitors

The THF solid tantalum capacitor is designed to offer low impedance to ripple current at frequencies above 1kHz through 100kHz. Special patented configuration sintered anodes provide lower equivalent series resistance (ESR) at these frequencies in comparison to conventional type solid tantalum capacitors. Lower ESR means lower power losses. Lower power loss characteristics result in savings in space, weight and cost by substituting one THF for as many as four conventional CSR 13 type capacitors to bypass or filter unwanted ripple currents. Ripple Current ratings by part number are shown in the Standard Rating Table. The solid electrolyte combined with the hermetic seal provides an inherently long life time and very stable electrical characteristics over a temperature range of -80° through +125°C.

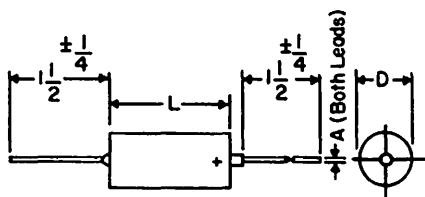

Request bulletin 4-805 for complete technical data. For prices, request price sheet No. 362.

KEY FEATURES: High ripple current, Low ESR, Lower impedance at high frequencies, Small size, Extremely stable capacitance, Hermetic seal, Long life.

APPLICATIONS: Switching Regulators, High Frequency Power Supplies, By-pass filtering.

HIGHLIGHTS

- Capacitance 5.6 to 330 μ F
- Voltage 6 to 50 VDC
- Tolerance +10% standard; \pm 20% (optional)
- Temperature -80°C to +85°C (to +125°C with proper voltage derating).

Type CSR13 Solid Tantalum Electrolytic Capacitors

Established Reliability solid electrolyte tantalums to MIL-C-39003.

Type CSR13 Solid Electrolyte Tantalum Capacitors to MIL-C-39003/01. Established reliability, low leakage and low impedance. Hermetically sealed with plastic insulating sleeve. Meet MIL-C-39003

Specifications. Life test, 10,000 hours. Temperature range, -55°C. to +125°C. Leads may be welded or soldered: are tinned nickel, type N1 of MIL-STD-1276. ±5% Tol. Available on special order.

To order: Indicate CSR13 _____ followed by the appropriate 4 digit dash number which indicates the desired capacity, voltage, tolerance and failure rate level, etc. Replaces TER, SNS, HD, 176D, T212. Request bulletin 4-813 for technical data. For prices, refer to price sheet No. 380-383.

Stock Values FRL (Failure Rate level) "L" -2% Per 1000 Hours. "M" -1% Per 1000 Hours, "P" -.1% Per 1000 Hours, "R" -.01% Per 1000 Hours, "S" -.001 Per 1000 Hours

Non-polar solid tantalum capacitors Style CSR91 to MIL-C-39003/4B are now available in qualified failure rate levels of "M", "P" and "R". Consult factory for price and delivery.

*Specify "L", "M", "P", "R" or "S" Level on Order.

†L Level numbers available from stock although they no longer are listed in MIL-C-39003.

*See page 55 for case code identification.

● NEW PRODUCT

MALLORY**Solid Electrolyte Tantalum Capacitors Type CSR23****ESTABLISHED RELIABILITY MIL-C-39003**

Type CSR23 is an extended range version of the CSR13. It offers a high c/v product in MIL case sizes A, B, C & D. Available in MIL failure rate levels "L", "M", "P", "R" and "S". (Failure rate level "L" is no longer included in the MIL-C-39003. However, "L" level is available from stock.) Replaces 178D, T242, XNS, TER. For prices, request price sheet No. 352, 353, 354.

The CSR33 capacitors are available in the same ratings as the CSR23, however, the DCL is much lower. The DCL on the CSR23 ranges from .9 thru 11 microamperes as compared with the CSR33 which ranges from .5 — 2 microamperes @ +25°C. the CSR33 is available in failure rate level "M" and "P" in MIL case sizes A, B, C, & D. Replaces 179D, T252, ZNS, TXR. For prices, request price sheet No. 351.

Ordering information: Indicate CSR— followed by the appropriate 4 digit dash number which indicates the desired capacity, voltage, tolerance and failure rate level, etc.

Example: To order Style CSR23 — 10μFD; 6 WVDC; ±10%; "M" failure rate; Order as follows: CSR230101. Request bulletin 4-813 for complete technical data.

HIGHLIGHTS

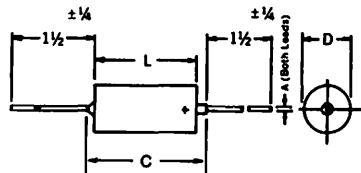

Capacitance — 1.2 to 1000μF
Voltage — 6 to 50 WVDC
Tolerance — ±10%, ±20%
Temperature — 55°C to +125°C
Case Sizes — 4 sizes to MIL A, B, C, D

KEY FEATURES

Excellent stability
Low DCL, DF and Impedance
Glass to metal hermetic seal
Rugged construction
Long life

APPLICATIONS

Bypass, filtering, coupling, and timing circuits

Liquid Electrolyte Tantalum Capacitors Type CTL

The CTL is an economical copper alloy case miniature, polarized, sintered tantalum anode, liquid electrolyte capacitor. These capacitors, available in three case sizes, exhibit high MFD-Volt rating to volume ratios. The CTL capacitors are equivalent to styles TLS except case material. Tol.: $\pm 20\%$. Oper. Temp.: -55°C to $+85^\circ\text{C}$ (with full rated voltage) to $+125^\circ\text{C}$ (with proper voltage derating). Request bulletin 4-610, for complete specifications. For prices, refer to price sheet No. 360.

HIGHLIGHTS

Capacity range: 2.5–560 microfarads
 Voltage range: 6–125 WVDC
 Temperature range: -55°C to $+125^\circ\text{C}$

Type TLS (CL64/65) and TLH Liquid Electrolyte Tantalum Capacitors

MALLORY

Extended Range

Type TLS is the commercial version of MIL-C-3965/4. Type CL64/65 is a cancelled military specification and is no longer recommended for new design. Mallory will continue to supply parts labeled with the Military CL64 or CL65 designation on request.

The Mallory TLS meets all the requirements of the Military specification and can, therefore, be used as replacement for applications in the field where the CL64/65 was used in original equipment.

Type TLH is an extended range version of the TLS capacitor. The TLH exhibits the same physical characteristics as the TLS however, provides higher capacity per case size.

Type TLS-TLH exhibit very high performance and very low DCL.

Temperature range: -55°C to +85°C and +125°C with derating.

Tolerances: ±10% (K); ±20% (M); Standard; ±5% (J) Available on special order. Types listed are in insulating Mylar® sleeves. For uninsulated part change 12th digit in TLS part number to an "O". Request bulletin No. 4-604, for complete specifications. For prices, request price sheet No. 390. Replaces 109D; 130D; LNW; 69F.

HIGHLIGHTS

Capacity range: 1.7 - 1200 microfarad

Voltage range: 6 - 75 WVDC

Temperature range: -55°C to +125°C

G = 25 VDC P = 125 VDC
H = 30 VDC

CAPACITANCE

in μF . First two digits are significant numbers last digit numbers of zeroes.
When μF is less than 10, the first digit is zero. Fractional values are expressed with "R" indicating decimal point, e.g.
2R5 = $2.5 \mu\text{F}$
6R8 = $6.8 \mu\text{F}$

TOLERANCE

M = $\pm 20\%$ (Standard)
K = $\pm 10\%$
J = $\pm 5\%$
S = $-15\%, +20\%$
T = $-15\%, +50\%$

CONSTRUCTION

P = Polarized

TYPE OF SEAL

G = Hermetic (Glass to metal)

•NEW PRODUCT

Consult your local Mallory distributor for price information.

*See page 57, for case code identification.

MALLORY

• Miniature Wet Slug Tantalum Capacitor Type TLW

The TLW is the same design and construction as the Mallory TLX which meets the high reliability specifications of MIL-C-39006/9. The glass to metal hermetic seal allows high temperature operation to 175°C (with proper derating). Rugged internal construction will withstand severe shock and vibration. Request bulletin No. 4-611B for complete specifications. For pricing contact factory. Replaces 137D, 138D, 40GW, 40SW, 69F3000, SNW.

HIGHLIGHTS

Capacitance Range - 1.7 to 1,200 μ F
Voltage - 6 - 100 WVDC
Temperature Range - -55°C to +125°C

Type CLR65 Liquid Electrolyte Tantalum Capacitors

MALLORY

Established Reliability type CLR65, meets all requirements of MIL-C-39006 specification. These sintered anode tantalum capacitors are hermetically sealed with a plastic insulating sleeve. Stored and marked in compliance with MIL-STD-790. Failure rate level to "R". To order: Indicate type CLR65, then specify 4-digit dash number which corresponds with desired tolerance and failure rate level. (Example—CLR658206 = 30μF/6 VDC ± 20% "M" Level). Request bulletin 4-612, for complete specifications. For pricing refer to price sheet No. 340 ("L"), 341 ("M"), 342 ("P"), 343 ("R"). Replaces TLX, 138D.

Type CLR69 Liquid Electrolyte Tantalum Capacitors

MALLORY

Established Reliability type CLR69, meets all requirements of MIL-C-39006 specification. These sintered anode tantalum capacitors are hermetically sealed with a plastic insulating sleeve. Stored and marked in compliance with MIL-STD-790. Failure rate level to "P". To order: Indicate type CLR69, then specify 4-digit dash number which corresponds with desired tolerance and failure rate level. (Example—CLR690089 = 220μF/6 VDC ± 20% "M" level). Request bulletin 4-612 for complete specifications. For pricing refer to price sheet No. 345 ("L"), 346 ("M"), 342 ("P"). Replaces TXX.

HIGHLIGHTS

Capacitance Range—10 to 2,200μF
Voltage—6—125 WVDC
Temperature Range— -55°C to $+85^{\circ}\text{C}$

MALLORY

• Liquid Electrolyte Tantalum Capacitors Type CL55

The Mallory Type CL55 is designed to meet all requirements of MIL-C-3965/21 specification. This unit is an assembly of tubular wet tantalum capacitors potted in a metal case and hermetically sealed with each terminal insulated from the capacitor case. These units are supplied with solder-lug type terminals. Refer to MIL-C-3965/21 for complete specifications. For pricing contact factory. Replaces TL.

HIGHLIGHTS

Capacitance Range - 70 to 2,400 μ F
 Voltage - 15-150VDC
 Temperature Range - -55°C to +125°C
 Power Factor - 15% (max.)

CATALOG NUMBER

STYLE: Fixed non solid electrolyte sintered anode tantalum capacitor.

TEMPERATURE CHARACTERISTIC: B = full operating voltage - 55°C to 85°C and linearly derated to $\frac{1}{2}$ rated voltage at 125°C.

OPERATING VOLTAGE at 85°C

E = 15

H = 30

J = 50

L = 75

N = 100

Q = 150

CAPACITANCE in microfarads first two digits are significant figures, third digit is number of zeroes to follow; i.e., 961 = 960 μ F.

CAPACITANCE TOLERANCE-M = $\pm 20\%$

POLARITY-P = Polar

SEAL TYPE-G = Hermetic

NOTE: Military number does not designate case code. See table for specific capacitance and voltage rating.

•NEW PRODUCT

Consult your local Mallory distributor for price information.

Type MTP/CMT Wet Slug Tantalum Capacitors

MALLORY

Mallory Type MTP capacitors have a higher capacity-voltage product per unit volume than any conventional wet slug, foil or solid tantalum. Sealed in silver case. This size factor makes these capacitors very desirable for applications with thin film, integrated and other micro-electronic circuits. An additional advantage of the wet slug construction is the absence of the familiar catastrophic failure mode of solid tantalum devices. The low and stable DCL characteristic of MTP capacitors is ideally suited for application in timing circuits. Request bulletin No. 4-606 for complete specifications. For pricing refer to price sheet No. 314. Replaces 146D, 62F, 69F, SWT, CNW, MW.

The CMT is comparable to the MTP line except for the copper alloy case. Request bulletin No. 4-609 for complete specifications. For pricing refer to price sheet No. 361. Replaces 62F.

HIGHLIGHTS

Capacitance Range - 3.3 to 470 μ F

Voltage - 6 - 60VDC

Temperature Range - -55°C to +85°C

Capacity Tolerance - $\pm 20\%$

® MYLAR is an E.I. du Pont de Nemours trademark.

Mallory TNT/TAP capacitors employ sintered anode wet-slug construction and are furnished in metal cases with precision formed epoxy end seals. Values shown have MYLAR® insulating sleeve. Operating temperature: -55°C to +85°C. Standard tolerance: -15%, +75%; other tolerances are available on special order. Request bulletin 4-38 (TNT) or 4-52 (TAP), for complete specifications. For pricing refer to price sheet no. 314.

CLEANING SOLVENTS

Cleaning solutions such as methyl, ethyl, or propyl alcohol, and detergents in water solution are usually not harmful to these capacitors. Care should be exercised when using halogenated solvents. Over exposure to chlorinated or fluorinated solvents may adversely effect the elastomer seal of the capacitor.

Cleaning methods for assemblies with capacitors should be developed with the flux and solvent vendor. As an alternative capacitors may be mounted after the cleaning operation.

WARNING

The electrolyte in wet slug tantalum capacitors is sulfuric acid. The electrolyte may be under some pressure. It is recommended that no attempt be made to open or dismantle these capacitors as the electrolyte can be hazardous to personnel and equipment.

CAUTIONS AGAINST MISAPPLICATION

1. Do not apply any reverse voltage to these capacitors.
2. Do not operate at temperatures above the maximum rated.
3. Do not exceed rated WVDC and Surge Voltage of the capacitor.
4. Do not apply ripple voltage or ripple current in excess of specification limits.

Violation of above can be hazardous and can cause capacitor failure or equipment failure.

Consult your local Mallory distributor for price information.

Specifications subject to change without notice.

Type XTM, XTH, XTL and XTV § +200°C Capacitors

MALLORY

High Temperature Tantalum

Mallory high temperature capacitors (200°C) are furnished in hermetically sealed metal cases and are wet-slug polarized types. XTM-A types have axial leads. All XTL, H and V types are available in a wide variety of terminal arrangements on special request. These same ratings are available to meet the requirements of MIL-C-39006. Military approved parts are available in failure rates L, M and P. Request bulletin 4-501, for complete specifications. For pricing, refer to the price sheet no. 315.

Type A Spark-Arrester Disc Ceramics

MALLORY

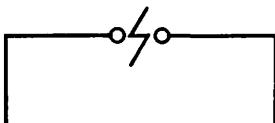

The Type 1 Spark-arrestors consist of a wire loop encased in phenolic resin. After the loop has been encased, a precise slot is cut through the wire loop and its protective case to form a gap. Type 1 does not include a parallel disc ceramic. Type 2, Spark-arrestors, is a combination of a ceramic disc in parallel with the gap. Useful in either industrial or commercial applications which require bypassing of transient over voltages. The precise gap allows the stray transients to be harmlessly bypassed. Operating Temperature: -55°C to +85°C.

SPARK-ARRESTOR DISC CERAMICS

MALLORY**• EIA Class 3, Semiconductor Type, Reduced Titanite Discs Type L**

Mallory reduced titanite ceramic discs are ideal for use in transistorized circuitry for bypass and coupling applications. Ultra miniature in size they are economical replacements for electrolytic capacitors of similar capacitance values because of their low power factor and superior radio frequency impedance characteristics. Mallory Type L. discs meet or exceed EIA RS-198B specifications for Class 3 ceramic capacitors.

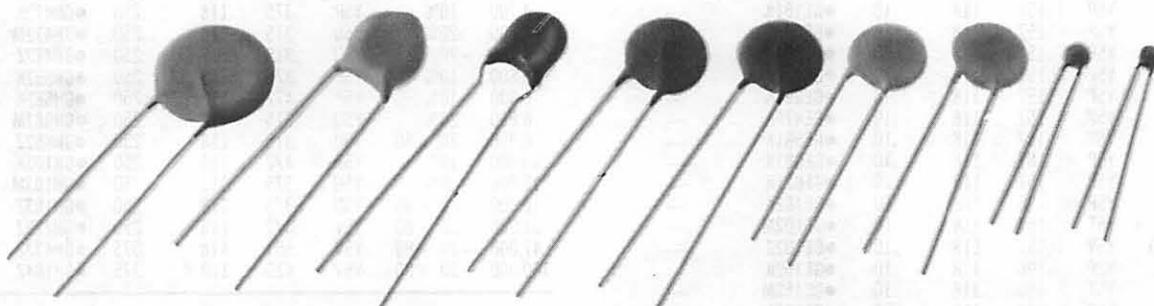

HIGHLIGHTS

Capacitance Range—0.01 to 0.47 μF
 Voltage—12, 16, 25 and 50 WVDC
 Temperature Range— -55°C to $+85^\circ\text{C}$ (-30°C to $+85^\circ\text{C}$)
 Insulation Resistance—1 megohm (min.)
 Operating Frequency—1,000 Hz
 Power Factor—5% (max.)

CLASS 3, SEMICONDUCTOR TYPE REDUCED TITANATE CERAMIC DISC CAPS.

**TYPICAL EXAMPLES**

Type G General Purpose

MALLORY

The new Mallory general purpose disc ceramic capacitors provide a wide choice of 50, 100, 500 and 1,000 volt DC rated units. These are designed for transistor circuitry and applications requiring high capacitance and low power factor for general purpose application. All capacitors are coated with tough humidity resistant coating and primarily designed for non-critical coupling, bypass and filter applications, found in all types of entertainment, industrial and medical equipment.

HIGHLIGHTS

Capacitance Range—1 to 100,000 picofarads

Voltage—50, 100, 500 and 1,000 WVDC

Temperature Range— -55°C to $+85^{\circ}\text{C}$

Insulation Resistance—10,000 megohms (min.)

Power Factor—2.5% (max.)

Operating Frequency—1,000 Hz

Type C Temperature Compensating Ceramic Discs

MALLORY

Mallory has now expanded its offering in the temperature compensating disc ceramic. We now offer 50, 100, 500 and 1,000, 3,000 and 6,000 volt types. These are now being offered in four temperature coefficients (NPO, N330, N750 and N1500) in voltages ranging from 50 to 1,000 volts. These discs are used in timing circuits, oscillatory circuits and similar applications where changes in capacity with temperature must be predictable and closely controlled.

HIGHLIGHTS

Capacitance Range — 1 to 910 picofarads

Voltage — 50–100–500–1,000–3,000–6,000 W volts

Insulation Resistance — 10,000 megohms @ 500VDC

Operating Frequency — 1,000 Hz

•Type S Temperature/Frequency Stable Disc Ceramic Caps

MALLORY

These discs provide exceptional stability in applications where temperature and frequency are critical. Exhibit minimum variation in capacity and power factor with change in frequency from audio to high radio frequencies. Suitable for use in wide band audio or R.F. coupling and bypass applications. Can be used in low "Q" resonant circuits as well as R-C response shaping networks and feedback loops in addition to conventional applications. Can be used as general replacement for mica and general purpose tubular types. Insulation Resistance: Greater than 10,000 megohms at 500 VDC.

HIGHLIGHTS

Capacitance Range—100 to 10,000 picofarads

Voltage—500 to 1,000 VDC

Power Factor—1.5% (Max.)

Temperature Range— -30°C to $+85^{\circ}\text{C}$

Operating Frequency—1,000 Hz

MALLORY**• EIA Class 2, High Voltage Disc Ceramic Type H_**

These discs are designed around EIA Test Specification RS-165A. These capacitors are designed for low frequency use. Highly efficient for bypass and coupling applications.

HIGHLIGHTS

Capacitance Range—100 to 10,000 picofarads
 Voltage—2,000 to 6,000 VDC
 Power Factor—2.5% (Max.)
 Insulation Resistance—10,000 megohms (min.)
 Operating Frequency—1,000 Hz
 Temperature Range— -35°C to $+85^{\circ}\text{C}$

HIGH VOLTAGE CLASS 2 DISC CERAMICS

• U/L Recognized, Across-The-Line, A-C Bypass Disc Ceramics Type U_

Underwriters Laboratories recognized for use in across the line and AC bypass applications rated 150V rms @ 60Hz (210 volts peak AC plus DC). These capacitors meet the requirements of their Bulletin 492, plus "across the line". The UN types also meet or exceed all of the EIA RS-165, Class 2 ceramic disc capacitors specifications for Z5U.

HIGHLIGHTS

Capacitance Range—1,000 to 10,000 picofarads
 Voltage—150V rms, (1,400 VDC)
 Power Factor—1.5% @ 1KC (initial)
 Temperature Range— $+10^{\circ}\text{C}$ to $+85^{\circ}\text{C}$
 Operating Frequency—50–60 Hz

Type C-C Multi Layer Ceramic Capacitors

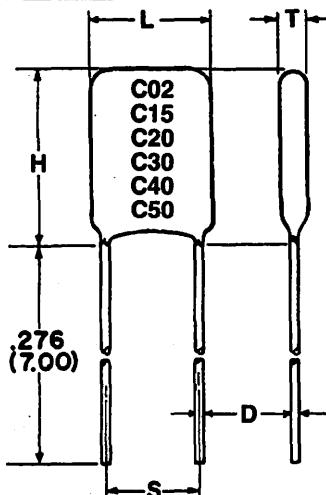

The Mallory dipped ceramic capacitors provide maximum range, conformally-coated capacitors in three dielectrics — COG Ultra-Stable; X7R Stable and Z5U General Purpose. The six case sizes include over 300 CV values in a capacitance range of 1.0pF to 6.8μF in 50, 100, and 200 volts. Their reliable performance is built-in through automated manufacture and precision process control techniques that assure uniform dielectric thickness, excellent electrode integrity, and electrode-to-termination continuity. Internal construction consists of

the same superior monolithic body used in Mallory's molded capacitors. Encapsulation consists of a multi-layer moisture and shock resistant coating that meets the flame test requirements of Underwriter's Laboratory Standard 94.

Additional CV values, sizes and lead configurations are available on special order. For pricing refer to price sheet No. 318. Replaces: MC—3417 to 3422; CZ; CW; GN; DR; 5000 series; 8100 series; C312 to C350; 1C to 5C; 2100 series.

Monolithic Ceramic Capacitors

MALLORY

TYPICAL EXAMPLES

TEMPERATURE CHARACTERISTICS

Specified electrical limits and typical performance curves for the three principal temperature characteristics are illustrated, shown below. Electrical stability with respect to temperature and voltage is ranked inversely to the packaging efficiency (capacitance \times voltage in a given case size). X7R capacitors are made from materials which are ferroelectric, principally barium titanate. This material changes crystalline form at its Curie point of approximately 120°C. The change in structure causes a radical change in the inherent dielectric constant, directly affecting the exhibited capacitance. Other materials in the ceramic formulations modify this effect to different degrees in producing the X7R and Z5U characteristics.

AGING

The change in dielectric constant above the Curie point is reversible but the reversion does not occur instantaneously. In the phenomenon called aging, capacitance declines progressively with time along a typical curve such as that illustrated for BX or X7R capacitors shown below. The slope of this curve amounts to a loss of approximately 1.5% in capacitance for every decade of hours at 25°C following the last excursion above the Curie point. The typical slope for Z5U characteristic is approximately 3% per hour decade.

Aging rates are utilized in testing Mallory capacitors prior to shipment.

VOLTAGE EFFECTS

Ferroelectric materials are also affected by applied voltage, both alternating and direct. Low values of voltage produce a slight increase in capacitance and dissipation factor. Higher voltages cause a decrease in capacitance which may become quite large. Typically, capacitors with BX or X7R characteristic decrease in capacitance by approximately 10% when rated DC voltage is applied. Other formulations with very high dielectric constants may exhibit a capacitance decrease of 50%.

The partial polarization of the ferroelectric formulations by DC voltage persists for sometime after the voltage is removed. This residual effect can be removed by "de-aging," or raising the capacitors above the Curie point for a period of time. Two hours at 150°C is a satisfactory treatment. Upon returning to room temperature, the capacitors will once more age according to the previous discussion.

CUSTOMER TESTING

Because of the temperature and voltage effects, caution must be used in establishing a testing sequence. Dielectric strength and insulation resistance tests both apply high DC voltage and depress capacitance, so capacitance should be measured prior to these tests. Alternatively, the de-aging described above may be performed, followed by a stabilizing storage at room temperature, ambient conditions for about 24 hours.

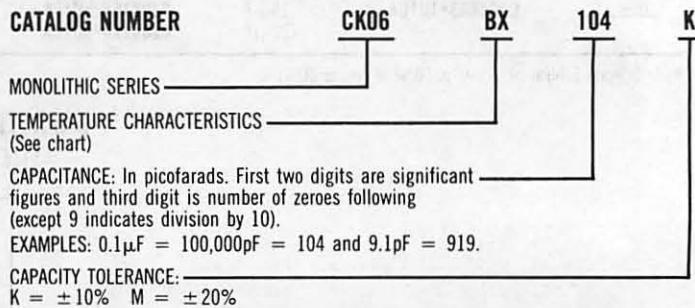

| SPECIFIED ELECTRICAL LIMITS | |
|--|----------------------------------|
| PARAMETER | TEMPERATURE CHARACTERISTIC |
| | X7R OR BX/BR |
| Dissipation Factor: Measured at 1 KHz and 1 vrms if capacitance > 100 pF. (> 1000 pF per MIL-C-20), measured at 1 MHz if capacitance <= 100 pF. | 2.5% |
| Dielectric Strength: At 2.5 times rated DC voltage. | Pass Subsequent IR Test |
| Insulation Resistance (IR): At rated DC voltage, whichever of the two is smaller. | 1,000 MΩ-μF or 100 GΩ |
| Temperature Characteristic: Range, °C. Capacitance Change: Without DC voltage At rated DC voltage | -55 to 125 ±15% +15%, -25% |

The basic capacitor element is called a chip and consists of formulated ceramic dielectric materials in layers interspersed with metal electrode layers. The entire structure is fired together at high temperature, after which conductive terminations are applied on opposite ends to contact protruding electrode edges. Chips may be terminated with materials suitable for hybrid-circuit substrate assembly. More usually, chips are furnished with protecting encapsulation and leadwires.

Mallory monolithic ceramic capacitors are produced in a plant designed specifically for capacitor manufacture. The process features a high degree of mechanization as well as precise controls over raw materials and process conditions. Manufacturing is supplemented by extensive Technology, Engineering, and Quality Assurance programs. Extensive application in aerospace and military programs attests to the reliability of Mallory capacitors. No capacitors exceed the failure rate qualifications held by Mallory capacitors under military specifications.

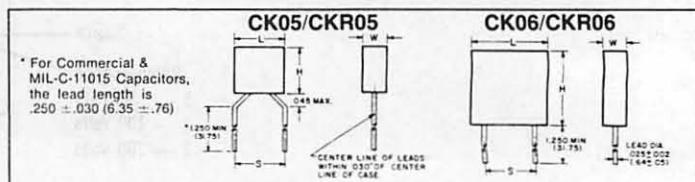

Mallory ceramic capacitors are offered in the most popular temperature characteristics. These are designated by the Electronics Industry Association (EIA), the stable X7R (military BX or BR). A wide range of sizes and lead arrangements are available to provide capacitance from 1 picofarad through 6.8 microfarads in 50, 100, and 200 volt ratings. For pricing refer to price sheet No. 318.

EWF CAPACITORS POLYESTER WRAP EPOXY END FILLED

Mallory type EWF capacitors have high insulation resistance, good moisture resistance, excellent electrical parameters, low dissipation factor, miniature case sizes and economical prices.

The physical and electrical characteristics of the EWF make it an ideal capacitor for coupling and by-pass applications in color or black and white TV, radio, hi-fi and instrumentation. Its tubular configuration adapts to printed circuit wiring or point to point soldering for normal by-pass coupling.

Type EWF capacitors are made from the finest polyester film available. The outer case is polyester wrapped and end sealed in epoxy resin. The axial centered leads are copper wire with double tinning. Tolerance: $\pm 10\%$. EWF capacitors are available from Mallory distributors in quantities from one to full production levels. Operating Temp.: -55°C to $+85^{\circ}\text{C}$ (to $+125^{\circ}\text{C}$ with proper voltage derating). For detailed information see Mallory Bulletin EWF form 9-645. For pricing refer to price sheet No. 332. Replaces WMF, B1500.

Door Knob High Voltage Ceramic Capacitor Type M500P

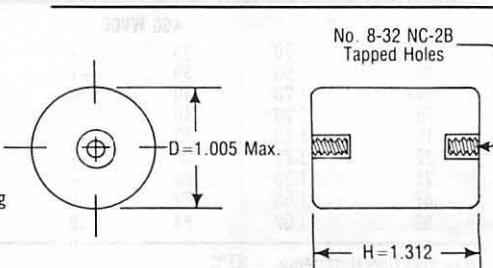

The M500P30KV, high voltage ceramic capacitor, is designed to meet the most stringent current and environmental conditions. Supplied with 2 terminals, capacitor has female threads for interchangeable screw-in terminals. For pricing, contact factory. Replaces 30DK____DHS.

HIGHLIGHTS

Temperature Range - -55°C to $+85^{\circ}\text{C}$
Temperature Characteristic - Z5U
Dissipation Factor - 1.5% (max.)
Capacity Tolerance - 20% to +80%

APPLICATIONS

CRT power supplies, electrostatic copying machines, electronic microscopes and synchroscope, HVDC power supplies, lightning arrestor voltage distribution systems and arc suppression.

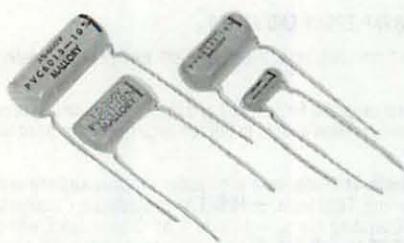

Consult your local Mallory distributor for price information.

Type PVC Epoxy Coated Film Capacitors

MALLORY

Mallory Type PVC capacitors are made from the finest materials available to assure excellent performance and long life. Only the highest grade aluminum is used for the plate material and ample plate separator thickness is used to provide trouble free service within the specifications shown. We utilize combinations of polyester film and polypropylene film dielectrics which are wound under carefully controlled atmospheric conditions, these capacitors are conformally coated with a flame retardant epoxy that protects the capacitor from heat of soldering irons or flow solder equipment. This coating also can protect the capacitor from the chlorinated cleaning solvents that are so commonly used in the industry today. The outer foil can be identified by the black stripe on the body of the capacitor. The wire leads are crimped in swaged end foil. This type of capacitor is adaptable to all electronic circuit applications calling for bypass and coupling. Request bulletin 9-769 for complete specifications. For pricing refer to price sheet No. 330.

HIGHLIGHTS

Capacitance Range - .001 to $2\mu F$
 Voltage - 100 - 2,000 VDC
 Insulation Resistance - 10,000 megohm- μF or 100,000 megohms
 Temperature Range - $-55^{\circ}C$ to $+125^{\circ}C$
 $-55^{\circ}C$ to $+105^{\circ}C$; (1,600-2,000 VDC)

Types SXK, SXL, SXM and SX Polystyrene Film Capacitors

MALLORY

SX types are manufactured from a unique form of stretched and fused polystyrene to provide the ultimate in temperature stability and humidity protection. Can be used to replace mica, film, paper and ceramic types in most applications. **Insulation Resistance:** SXK and SXL types greater than 100 megohms; SXM and SX types greater than 100,000 megohms. **Power Factor:** Less than .05%. **Dielectric Absorption:** Less than .02%. **Temperature Coefficient:** -150 ppm/°C, ±50 ppm/°C. **Temperature Range:** -40°C to +85°C; for best operating stability, -25°C to +70°C. **Capacity Tolerance:** SX types is ±5%; SXK, SXL and SXM types ±2.5%. **Inductance:** Between 10 and 30 nH dependent on length of capacitor body, additional inductance for the leads of about 10 nH/cm depending on the lead diameter. **Leads:** Tinned copper wire; the lead closest to the color band indicating the working voltage is connected to outer foil. **Lead Length** is 1.18" minimum. **Lead Diameter** shown below.

Mallory Fastening Devices

MALLORY

MALLORY fastening devices are durable yet economical and they are convenient to use. This line consists of clamps, clips, wire saddles, ties spacers, cable hangers and circuit board supports, guides and accessories. Whenever you are working with electrical or electronic components and accessories you will find a MALLORY fastening device makes the job easier for you. For prices in quantities of less than 100, consult your local Mallory distributor. For prices on all fastening devices reference price sheet No. 401.

•TYPE T, RT, IT, CABLE TIES

Mallory cable ties are precision molded of high strength, fungus resistant nylon, the tapered tail is inserted into the ties self-locking head. It is then pulled through until the bundle is secured. Our ties remain fully serviceable through 185°F. All Mallory ties are bagged 100 ties per package to attain maximum freshness.

Our heavy duty releaseable ties can be reused by pressing the conveniently located release lever. This allows complete removal for areas requiring frequent service or adjustment. They are perfect for prototype construction and temporary maintenance applications. Releaseable ties are black weather resistant nylon standard.

Standard Mallory ties are available in heat stabilized or weather resistant materials on special order.

•NEW PRODUCT

•TENSION GUN

Mallory is proud to offer three new tension guns to compliment our cable ties. The Mark III is the industry standard gun with a lifetime replacement guarantee. This gun has adjustable tension settings and accomodates our T18S through T50L cable ties. Our Mark V tension gun is a new low cost alternative to the ever popular Mark III. Our Mark V gun does everything the Mark III does. The Mark V is made with high impact polycarbonate material and comes with a one year guarantee. Finally, we would like to introduce our newest tension gun specially designed for our heavy duty ties. Our HDT-150 will tension and cut all Mallory ties from the T18S to the T150L.

| Description | Catalog Number |

TYPE EZ WIRE TIES

Just wrap them around the wire bundle, thread the end through the specially designed loop, pull it tight and lock in place. It stays put, holds your harness together until you release it. Should you want to add more conductors to the bundle, open the E-Z Wire Tie, add your wires and refasten it. It's as easy as that.

E-Z Wire Ties are strong and durable with a high dielectric that makes them the perfect tie for electrical harnesses.

| Material | Length | Color | Cat. No. |

*N = Nylon; P = Polyethylene.

Consult your local Mallory distributor for price information.

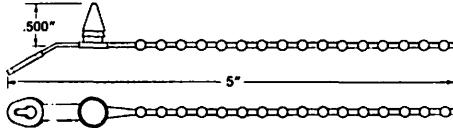

TYPE PT PUSH BUTTON WIRE TIES

Here's a new concept in harness bundling that eliminates screws. Simply press the conical head into a .250" dia. hole, wrap the beaded plastic tie around the harness and insert into slotted strap which is angulated for easy acceptance. The 16 bead five inch tie is adjustable to 16 bundling diameters from .125" to over 1.50". Wires may be substituted, added or removed by loosening the reusable tie and relocking it. Nylon or Polyethylene.

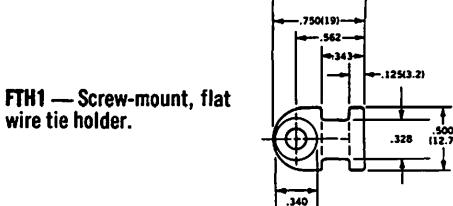

Series PT push button ties are designed to fit .250" holes in panels from .031" to .140" thick.

| Catalog No. | | |
|-------------|--------------|-----------|
| Color | Polyethylene | Nylon 6/8 |
| RED | PT200 | PT300 |
| BLUE | PT201 | PT301 |
| YELLOW | PT202 | PT302 |
| BLACK | PT203 | PT303 |
| NATURAL | PT205 | PT305 |

To order natural color, flame retardant, VO rated nylon, specify part no. PT405.

TYPE FTH TIE HOLDERS

FTH1 — Screw-mount, flat wire tie holder.

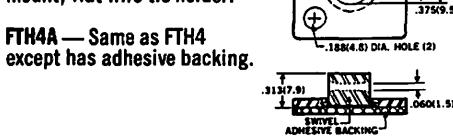

FTH2 — Self-stick mount flat wire tie.

FTH3 — Has "barbed arrow" tip to lock into .187" diameter hole, flat wire tie holder.

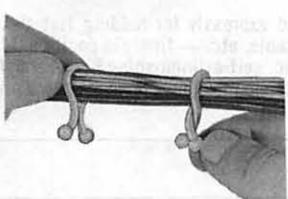

FTH4 — Swivel type, screw mount, flat wire tie holder.

Specifications subject to change without notice.

TYPE TL TWIST-LOK® TIES

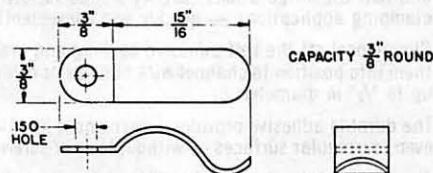

Slip bundle of wires into the tie, then twist the ends together with a flick of the fingers. The TWIST-LOK locks in place and holds your wire bundle securely and firmly. To open, another flick of the fingers releases the tie instantly — ready to be used again.

SPECIFICATIONS TWIST-LOK WIRE TIES

| Approximate Overall Height | Wire Bundle Diameter | Catalog Number |
|----------------------------|----------------------|----------------|
| .900" | .200-.300" | TL250 |
| 1.032" | .300-.400" | TL350 |
| 1.200" | .400-.500" | TL450 |
| 1.550" | .700-.800" | TL750 |

ACETAL TENSION CLIP →

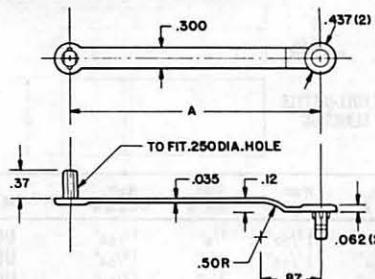

TYPE 30-1

The Mallory ACETAL TENSION CLIP has a thousand uses and performs them all well.

Made of ACETAL, these clips are strong yet elastic. Designed primarily for holding cables or wires, they can be used to hold a multitude of objects — tubing, pipe, pictures, signs, etc. Color White.

TYPE CH CABLE HANGERS

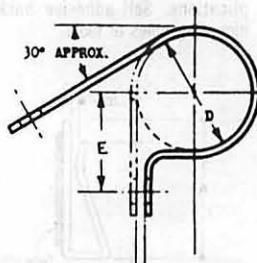

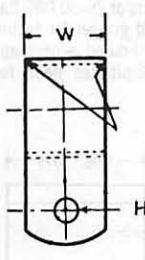

Simply press the hanger into a .250" dia. hole — just like before, except now it takes less pressure. Wrap the strap around the load — just like before, except now our offset design gives you more to grab. Then lock by inserting the post into the part — just like before, except now it fits more easily and holds harder. Your load cannot shake loose. Color White.

Mallory Fastening Devices

MALLORY

TYPE SK-STICKY KLIPS

Mallory introduces a new line of adhesive cable clips. STICKY-KLIPS are made of pliable yet strong aluminum and are designed in two sizes to hold in place cables ranging up to $5/32"$ (6 mm) or up to $3/8"$ (10 mm) diameters. Linked in strips of ten, they snap apart for easy placement. Just remove the adhesive backing, arrange them on any flat surface and the STICKY-KLIPS are permanent. For phone cords, piping, electrical runs . . . and they hold at any angle.

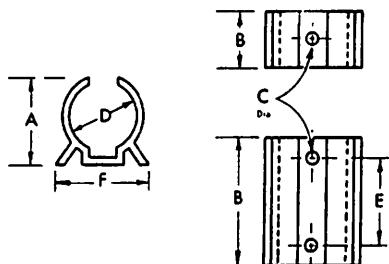

| Max. Holding Dia. | Catalog No. |
|-------------------|-------------|
| $5/32"$ (6 mm) | SK3 |
| $3/8"$ (10 mm) | SK6 |

TYPE V-VINYL COMPONENT CLIPS

Mallory Plastic Component Clips are a convenient, economical means for fastening and, where required, insulating a wide variety of electrical and electronic components, accessories and parts. They permit fast and easy insertion, hold firmly, yet allow easy removal. Typical applications are capacitors, resistors, lamps, batteries and fuses.

They are made of strong, black vinyl and have high dielectric strength.

The floor of the clip is pierced for screws or other fastening devices.

• NEW PRODUCT

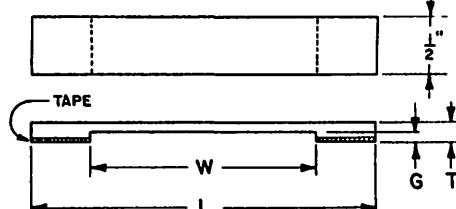

• TYPE CFCC FLAT CABLE CLAMPS

Designed for routing from one to six layers of 26-30 AWG flat or woven cable. They feature a serrated gripper for secure positioning without slippage. Ideal for limited access applications. Self-adhesive backing eliminates need for mounting holes or tools.

| Nom. Dim. A | Nom. Length B | Cat. No. |
|-------------|---------------|----------|
| $1/2"$ | .300 | •CFCC-4 |
| 1" | .850 | •CFCC-8 |

TYPE FCC FLAT CABLE CLAMPS

Designed expressly for holding flat flexible cable, ribbon cable, etc. — firmly in position. Made of high dielectric, self-extinguishing PVC. Peel off the Mylar backing from the clamp's two legs, and press over the cable.

| $+1/8"$ L-0" | $+1/16"$ W-0" | $+015"$ T-010" | $.01"$ G-02" | Catalog No. |

| 2" | 1" | $5/32"$ | $3/32"$ | FCC83 |
| 3" | 2" | $5/32"$ | $3/32"$ | FCC163 |
| 4" | 3" | $5/32"$ | $3/32"$ | FCC243 |

TYPE UC & HUC

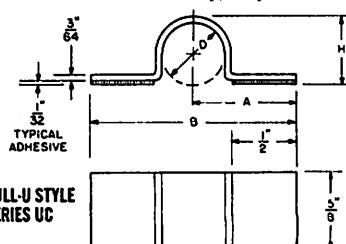

Mallory's self-adhesive PVC clips, available in full-U and half-U configurations, satisfy a wide variety of clamping applications — quickly and conveniently.

Simply peel off the self-adhesive backing and press them into position to channel wire bundles or cables up to $1/2"$ in diameter.

The durable adhesive provides a permanent bond — even to irregular surfaces — without tools or screws.

The full-U style provides two-legged bonding. The half-U version provides one-legged bonding and is recommended for corners, edges, or limited space application.

Fast, neat economical and very, very versatile.

TYPE DLCBS DUAL LOCKING CIRCUIT BOARD SPACER

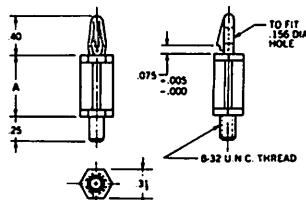

Seven sizes, rigid and rugged nylon spacers will space two boards from $3/16"$ to $7/8"$ apart — either vertically or horizontally. The spacer simply compression-snaps into .156" dia. hole on the two boards to be joined and spaced. Once inserted, the "Barbed Arrow" locking tips expand for permanent fastening on both boards to maintain the desired spacing.

TYPE CBSS NYLON CIRCUIT BOARD STACKING SPACERS

Used to stack circuit boards in any number of vertical tiers or side by side rows. Their locking tip snaps through a .156" dia. hole in the board and into the top of the spacer below.

The system is completed by inserting nylon capping button MB1156 through the top board to lock it into the spacer below.

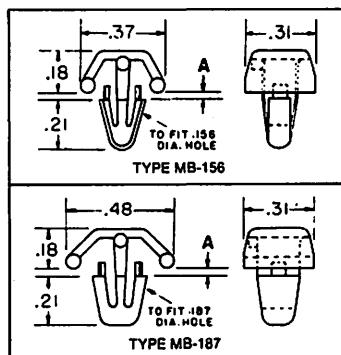

| Nom. Dim. A | Catalog No. | |
|----------------|-------------|-----------------|
| | Nylon | Flame Retardant |
| 1/2" | CBSS8N | CBSS8R |
| 5/8" | CBSS10N | CBSS10R |
| 3/4" | CBSS12N | CBSS12R |
| 7/8" | CBSS14N | CBSS14R |

| Description | Catalog Number |

| No adhesive | PCG2 |
| Adhesive backing | PCG3 |
| No adhesive | PCG3NA |
| Adhesive backing | PCG4 |
| Adhesive backing | PCG5 |
| No adhesive | PCG6 |

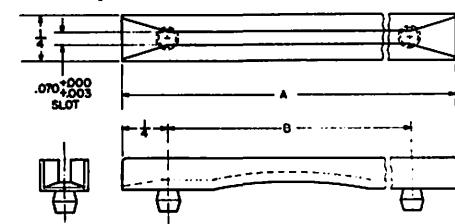

TYPE MB CAPPING BUTTONS

Use in place of screws, nails or rivets. Simply snap into place and locking tip expands to fasten permanently. Catalog number MB1156 used with CBSS series circuit board stacking spacers.

TYPE RCG RACK CARD GUIDES

Guides may be used horizontally or vertically for mounting circuit boards in rack chassis. Guides snap into .125" dia. hole at both ends. Four lengths in natural nylon.

| Nom. Dim. | A | B | Catalog No. |
|-----------|--------|---|-------------|
| 3" | 2 1/2" | | RCG1 |
| 4" | 3 1/2" | | RCG2 |
| 6" | 5 1/2" | | RCG3 |
| 8 1/2" | 7.95" | | RCG4 |

CIRCUIT BOARD EDGE GUIDE

Designed to precisely align and support circuit boards, while allowing for easy insertion and removal of the board. Full length finger grip serrations allow for simple hand insertion into a panel hole $.175" \times .310"$. The arrow type locking head is self-adjusting to fit panel thicknesses from $.03"$ to $.09"$. Made of durable natural nylon.

| Holding Height Dimension | W/O Locking End | With Locking End | With Flared Tab Locking End | Clothes-Pin Clamp |

| 1/2" | CBG1.5 | LCBG1.5 | LCBGT1.5 | — |
| 2" | CBG2 | LCBG2 | LCBGT2 | — |
| 3" | CBG3 | LCBG3 | LCBGT3 | CLC1 |

Add "N" suffix to above part numbers if you want nylon material or "R" suffix if you want flame retardant material.

TYPE PCG PRINTED CIRCUIT GUIDES

Made from accurately sized plastic extrusions. For precision placement and alignment of circuit boards. 4' length. Designed to take circuit boards $1/16"$ thick.

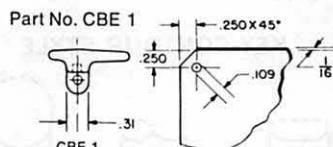

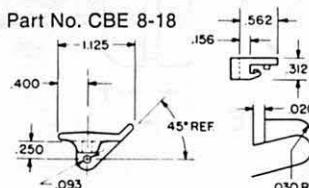

Consult your local Mallory distributor for price information.

| Brown | CBE12 | Gray | CBE18 |
| Red | CBE13 | | |

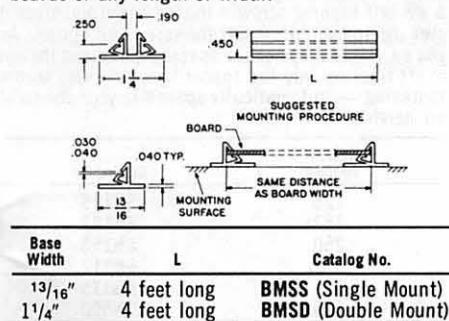

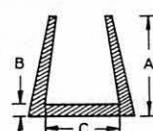

TYPE CCP CIRCUIT BOARD PULLER

Snap into two .125" dia. holes. Curved tab permits firm fingertip grip. Simply pull to withdraw. One size fits all boards up to $\frac{1}{16}$ " thick. Nylon.

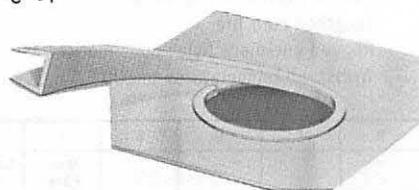

Catalog No. CCP1

**TYPE BMS CIRCUIT BOARD HOLD DOWN STRIP**

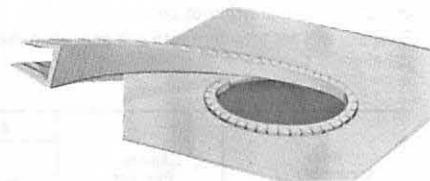

Simply snap your circuit board into the channels of two Series BMS hold down strips for quick, secure fastening. These rigid vinyl hold down strips are easy to apply in any position. Just press the self-adhesive base to any material, or tack or staple to wooden surfaces. Available in two styles — for single boards or multiple side-by-side mounting. Accommodate boards of any length or width.

**CONTINUOUS GROMMET**

SOLID . . .

. . . OR SERRATED

Now available in your choice of solid or serrated lengths . . . in polyethylene for normal service or nylon for severe service . . . in conveniently packaged 50 and 100 ft. lengths as shown below.

Natural color. Special colors available on request.

*Conforms to MIL 1-613D

**Conforms to MIL 22096. Type 4.

EDGE HOLDER & HINGED CIRCUIT BOARD SUPPORT

- Simple two component system
- For easy access to underside components
- Without removal of board
- Available in three spacing heights
- High dielectric strength nylon

Mallory's Hinged Locking Circuit Board Support System is designed to provide convenient access for the repair or replacement of components on the underside of the circuit board — without removal of the board from the chassis.

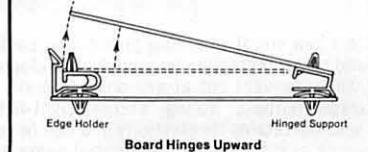

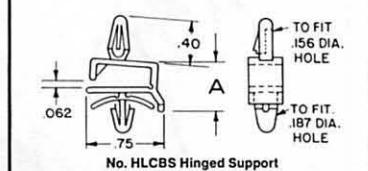

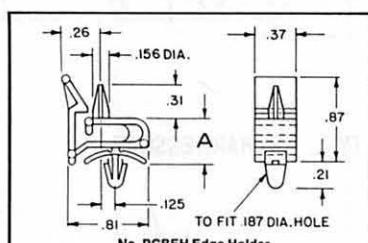

At one side a PCBEH serves as an edge holder which notches over the board. Finger tip pressure permits the board to be lifted over and off the support post.

At the other side, a HLCBS hinged circuit board support allows the board to be lifted upward without disengaging it from the support post.

"Barbed Arrow" tips of both components snap into .187" dia. holes and lock the parts firmly into the chassis. Both support posts snap into .156" dia. holes on the board.

The system generally consists of two PCBEH's on one side and two HLCBS's on the other — of equal spacing heights — for 4-corner support. Both components are made of natural high dielectric nylon in 7/16", 5/8" and 7/8" spacing heights, and are available with optional 1/16" dia. locating pegs.

| Catalog Nos. | | Nominal Spacing Dimension A |
|--------------|----------------|-----------------------------|
| Edge Holder | Hinged Support | |
| PCBEH-7 | HLCBS-7 | 7/16" |
| PCBEH-10 | HLCBS-10 | 5/8" |
| PCBEH-14 | HLCBS-14 | 7/8" |

Consult your local Mallory distributor for price information.

Snap into panel hole where it locks in place

Do not injure insulation or conductor

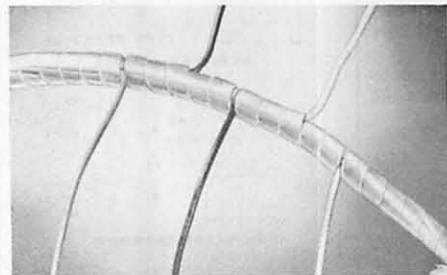

Compact will not interfere with components behind panel

Eliminate need to tie or knot cords for strain relief
Positive, non-slip grip on cord
Lengthen cord life
Rugged one-piece Nylon construction
Withstand temperatures to 300°F.

Dimension in inches

TYPE HR HARNESSRAP

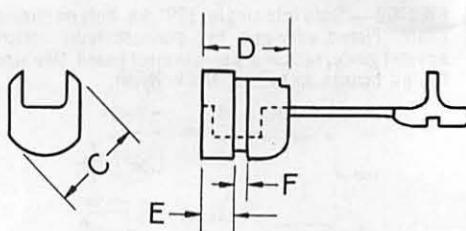

This new spiral wrapping provides a readily flexible and strong protection for groups of conductors. Leads can be brought out at any point to make a "tailor-made" harness, strong, secure, tight-fitting. HarnessRAP retains its elasticity and can be removed as easily as it is applied, and reused again and again.

BUSHING DIMENSIONS

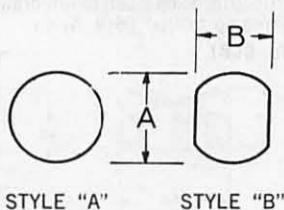

KEY-COINTOUR STYLE

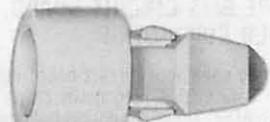

LETTERS ABOVE REFER TO PREFIX OF CATALOG NUMBER AND INDICATE STYLE OF BUSHING.

MOUNTING HOLES

TYPE SN SPACER

A remarkable expanding nut that spaces, insulates and fastens. Punch a $5/16$ " sq. hole in the bottom board and insert the spacer nut with finger tip pressure. Two legs hold it firmly in position. Drill a hole for a #8 self-tapping screw in the top board and place it over the spacer nut. Insert the screw and tighten. As you do, the two legs on the spacer expand and the nut shaft rises up into the spacer body for sure, secure fastening — automatically spaced in your choice of six heights.

(Fig. B)

SCREW INSULATORS AND BUSHINGS

These versatile molded nylon fasteners offer substantial mechanical and electrical advantages over metal parts — at economics you can't afford to overlook.

They may be used as screw insulators in applications where high strength non-insulated screws are required. Wide flanges effectively isolate screws from mounting surfaces.

These rugged one-piece molded nylon fasteners also satisfy a wide variety of bushing applications. And, because they require little or no lubrication, they can be used as light loading bearings.

Let your imagination run wild and take full advantage of the proven reliability of rugged, high dielectric nylon.

Corrosion-resistant, non-toxic molded nylon

Lightweight ruggedness

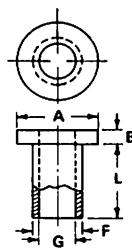

High dielectric strength

Self-insulating

Abrasion-resistant

SWITCH AND CONTROL KNOBS

Consult your local Mallory distributor for price information.

Basic specifications for carbon controls include both resistance and taper. Resistance values and tapers for the various types of Mallory carbon controls are shown in the General Catalog by means of a code: 1, 2, or 4. Taper refers to the percent of resistance change compared to percent of shaft rotation from left to right (clockwise when viewing controls from the front). See Fig. 1.

TAPER NO. 1: Left-hand logarithmic used in audio circuits where percent of change is small at start of rotation. Part number suffix is "A".

TAPER NO. 2: Right-hand logarithmic, used where percent of change must be large at start of rotation. The suffix is "R".

TAPER NO. 4: Linear taper where percent of resistance change is directly proportional to rotational change on a straight line. The suffix is "L".

When checking taper attach ohmmeter probes to the center and left terminal when viewing control from the front with control terminals pointed down.

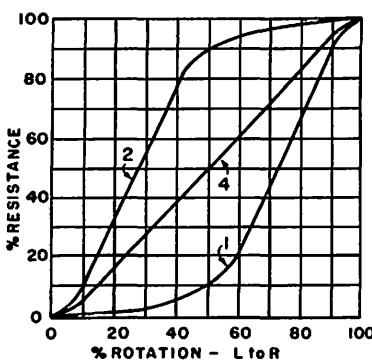

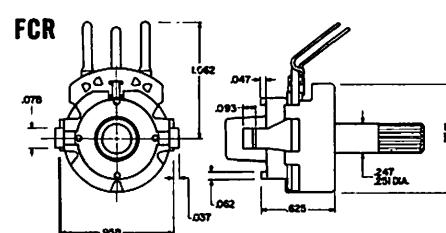

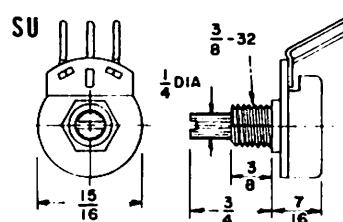

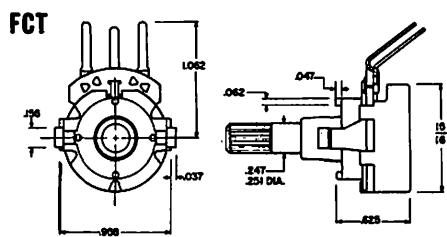

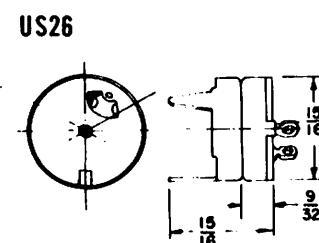

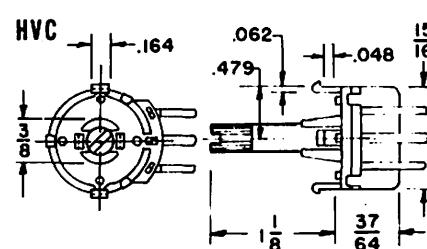

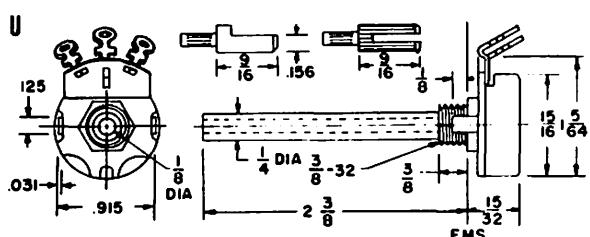

FIG. 1

STA-LOC CONTROL SYSTEM

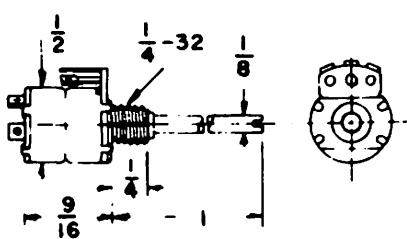

We have listed all STA-LOC components in a separate volume. This volume will be mailed to all STA-LOC distributors. To get one simply ask for bulletin 9-779.

Carbon Controls

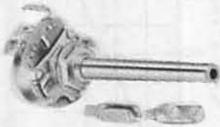

MALLORY

MALLORY MIDGETROL®

Mallory Midgetrol is used in both replacement and industrial applications. Rated 1 watt linear, $\frac{1}{2}$ watt audio taper. $\frac{15}{16}$ " diameter.

Tapers: 1- left hand audio; 2- reverse audio; 4- linear. Rotation: Mechanical and electrical is 316° for controls with #2 and #4 tapers.

If switch is used the electrical is reduced to 285° . Controls with #1 tapers have 316° mechanical and 285° electrical with or without switch. See page 103 for dimensional drawings and further taper information. For prices, reference price sheet No. 501.

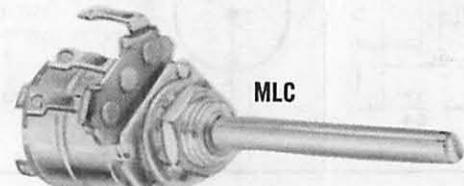

TYPE "U" BUSHING MOUNT — METAL SHAFT
 $\frac{5}{8}''$ -32 x $\frac{3}{8}$ " bushing; shaft $\frac{1}{4}$ " dia. x $2\frac{3}{8}$ " FMS (Front Mounting Surface). Tolerance $\pm 20\%$. Furnished with two knob adapters and hex nut. Use DS extension shaft with U control hardware page 00.

**EXACT "UA" REPLACEMENT
SINGLE SHAFT**

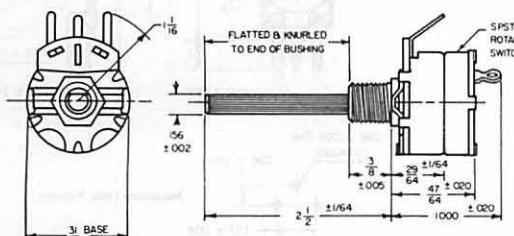

Exact duplicate, flat mill Delrin* shaft for single controls will replace original control shaft length without modification; for use with UA and RU STA-LOC® controls. Shaft lengths are measured from mounting surface (FMS) of control. For prices, reference price sheet No. 503.

TYPE EZ

Mallory EZ controls are $\frac{1}{2}$ watt, audio taper. All are supplied with either rotary or push-pull, SPST, 5A @ 125VAC switch. Control tolerance $\pm 20\%$. $\frac{3}{8}$ -32 x $\frac{3}{16}$ bushing. Units with AS suffix have $\frac{1}{4}$ x $2\frac{1}{2}$ FMS plastic knurled-flatted shaft, APS has $\frac{1}{16}$ x $2\frac{1}{2}$ FMS plastic flattened shaft. For prices, reference price sheet No. 501.

Trimmer Potentiometers

MALLORY

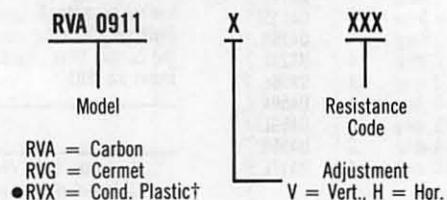

SUBMINIATURE TRIMMING POTENTIOMETERS 1/5 and 1/3 WATT CARBON and CONDUCTIVE PLASTIC 1/2 and 3/4 WATT CERMET

Mallory subminiature trimming potentiometers are applicable to a variety of consumer and industrial applications. They provide excellent long-term reliability under adverse environmental conditions in an extremely small overall package.

Cermet units, additionally, provide considerably increased power dissipating capability in the same small package.

This line of quality trimming potentiometers is backed by Mallory and is your guarantee to performance and economy you can depend upon. For prices, refer to price sheet No. 505.

PART NUMBER IDENTIFICATION:

FEATURES

- a Diminutive Size
- b Wide Resistance Ranges
- c Excellent Linearity
- d Economy
- e Non-Combustible Design
- f Extreme Resistance to Adverse Environments
- g Excellent Humidity Resistance
- h Alumina-Base
- i Resistant to Flux Solvents

CERMET

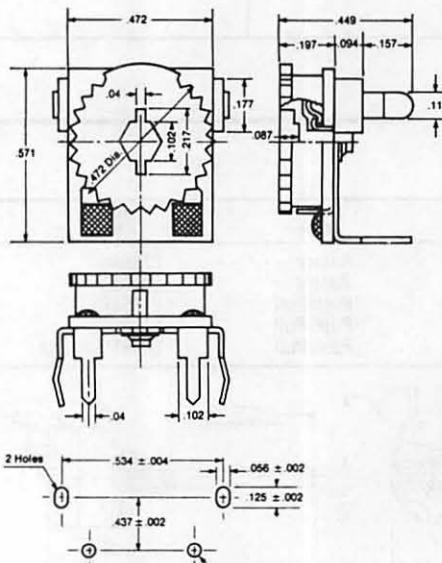

All of the features above
PLUS;
1/2 and 3/4 watt Dissipation in the same size package.
Low Noise.

● CONDUCTIVE PLASTIC NEW PRODUCT†

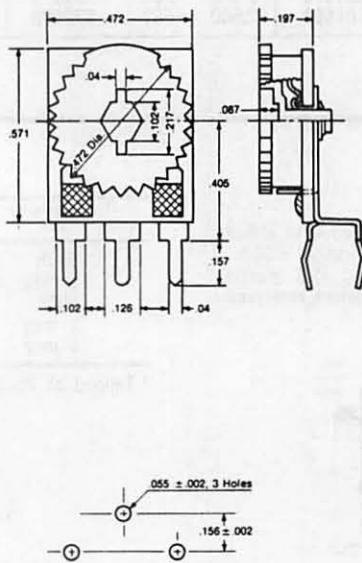

† Much better T.C. than comparable carbon units.

Power Rheostats

MALLORY

Mallory power rheostats utilize vitreous enamel construction for maximum environmental protection. All current-carrying parts are electrically insulated by dimensionally stable ceramic.

All types except the 12½ and 500 watt rated units are listed under the Underwriters Laboratories Reexamination Service. Current ratings listed

are for continuous operation in free air. If units are enclosed currents should be reduced by as much as 50% depending upon ventilation.

The rheostat will dissipate rated wattage at rated current with the total resistance of the rheostat in the circuit.

All tapers are linear. All bushings are non-locking types.

For prices on all power rheostats, reference price sheet No. 504.

TYPE M 12.5 WATTS

Dia. 7/8" O.D. Depth behind panel 11/16"—Rotation 300°—Mounts on panels up to 1/8" thick by means of 1/4"-32 Bushing and Hex Nut. Non-turn lug requires 1/8" hole 1/4" below center of shaft.

3-WATT TYPE MR WIRE-WOUND CONTROLS

Only $\frac{3}{4}$ " diameter, MR controls are used for applications in AGC, convergence, hum-balance, etc. Case is fully enclosed: MR, all metal; MRC, metal mounting plate and cup with molded nylon knob. Five mounting configurations available. Conversion from cross-slot adjustment to shaft may be made using plug-in shafts listed. Wattage Rating at 40°C: 3 watts. Rotation: 250° mechanical; 248° electrical. Resistance Tolerance: MR, $\pm 20\%$; MRC, $\pm 10\%$. Voltage Breakdown: MR, 900 VAC rms; MRC has grounded contact arm.

MR-B 3-WATT BUSHING MOUNT

Bushing $\frac{3}{8}$ "-32 x $\frac{1}{4}$ ". One MRS1250 Shaft is packaged with each control. Supplied with plain nut.

Wire Wound Control Data

MALLORY

Wire Wound Audio Attenuators

AUDIO ATTENUATORS

Mallory audio attenuators are available in three wattage ratings: 10 watt RL & RR; 15 watts T, L, LL and BAL; and 50 watts MGL and MGT. All are made to critical audio standards; come complete with mounting hardware. Two case diameters: $17/64$ " RL & RR; $15/8$ " for T, L, LL, BAL, MGL and MGT. Shunt coil elements in L & T pads open at minimum attenuation position (full counter clockwise rotation) placing load directly across output source for maximum volume.

T PAD ATTENUATORS

Present constant impedance to both source (amplifier) and output (speaker). Supplied with dial plate.

T PAD STOCK VALUES

CIRCUIT BREAKERS

Exact replacement circuit breakers for television and industrial applications. These circuit breakers are manufactured to the same specifications as original equipment. "Anti-cheat" reset action is non-cycling. Button must be pressed to reset. Tripping mechanism is temperature compensating for constant protection. Normal tripping time is ten seconds or less. Supplied with twist tab mounting lugs. May be converted to bushing mount by ordering CBB $\frac{3}{8}$ "-32 x $\frac{1}{4}$ " adapter bushing listed below. For prices, reference price sheet No. 402.

U/L CIRCUIT BREAKER KIT

*We have improved the surge ratings on our standard circuit breaker. The ratings are now comparable to the high surge circuit breakers previously offered by Mallory.

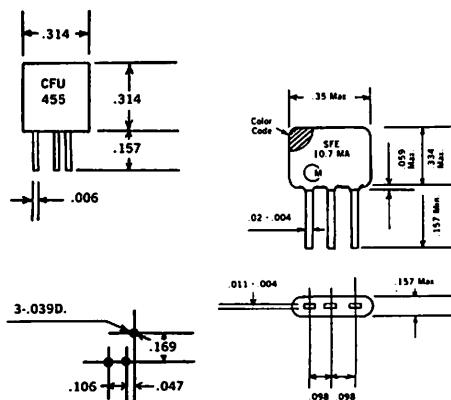

DUAL CIRCUIT BREAKERS

For use in color TV; supplies protection for B+ circuits and horizontal output circuit. Excessive current in either circuit will open the circuit breaker, thus removing all B+ voltage from set. Positive dependable, exact duplicate of RCA and many others.

| Current, Amps | | | | Catalog Number |
|---------------|---------|--------|-------|----------------|
| B+ | Section | Horiz. | Hold | |

| 1.75 | 1.25 | .8 | .6 | DB125T600 |
| 2.5 | 1.75 | .59 | .4 | DB175T400 |

For prices, refer to price sheet No. 402.

Ceramic Filters

Aceramic filter derives its basic frequency selectivity from a mechanical vibration resulting from a piezoelectric effect in the ceramic material. Specialized high quality ceramic materials combined with an advanced filter design has provided practical inexpensive ceramic filters for entertainment and communications applications. These applications are in AM radio, TV, FM and CB communications systems.

For prices, refer to price sheet No. 505.

**455KHz FILTERS
PART NUMBERS AND CHARACTERISTICS ARE AS FOLLOWS:**

| Center Frequency (KHz) | 6dB Band Width (KHz) min | 40dB Band Width (KHz) min | Spurious Response (dB) min | Insertion Loss (dB) max | In, Output Impedance | Cat. No. |

| 10.7MHz \pm 30KHz | 280 \pm 50 | 650 | 6dB max | 30dB min | 330 ohms | SFE10.7MASA |

Consult your local Mallory distributor for price information.

Power Resistors

TYPE AE WIRE-WOUND RESISTORS AXIAL LEAD VITREOUS ENAMEL COATED

Mallory type AE wire-wound resistors have axial leads and a tough vitreous enamel coating. Available in three power ratings: 3, 5 and 10 watts. To order: use type number followed by resistance value (e.g., 3AE4000). Tolerance: $\pm 5\%$. For prices on all power resistors, reference price sheet No. 600.

Specifications

Tolerance $\pm 5\%$ HJ, $\pm 10\%$ AV

Temperature Coefficient

$0 \pm 400 \text{ ppm}/^\circ\text{C}$ 1 ohm to 20 ohms.

$0 \pm 260 \text{ ppm}/^\circ\text{C}$ above 20 ohms.

Dielectric Withstanding Voltage

Measured from terminal to mounting bracket
12 to 100 watts size, 1000 volts AC.

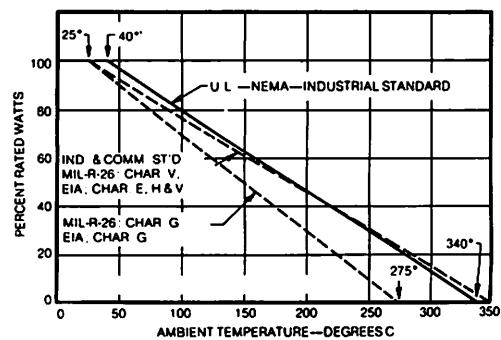

175 and 225 watts size, 3000 volts AC.

Overload 10 times rated wattage for 5 sec.

Core Tubular ceramic.

Coating Vitreous Enamel.

Derating

Consult your local Mallory distributor for price information.

•DIP Switches

MALLORY

- Designed for automatic insertion
- Contact wiping on make and break
- Integral terminal and contact locked into thermoset base
- Sealed version optional; assures contaminant-free switch operation after flow soldering and cleaning

- Types 206-2 thru-10 & -12 approved to MIL-S-83504/4
- Standard .100" by .300" DIP centers
- Available with flush actuators for low profile SPST applications

- Gold plated contacts for long term contact corrosion resistance
- All U.L. 94 V-O plastics used

ELECTRICAL AND MECHANICAL SPECIFICATIONS

Initial Contact Resistance
25 milliohms

Contact Resistance After Life
50 milliohms maximum after 10,000 cycles switching 50 mA @ 24 VDC

Nonswitching Rating
100 mA @ 50 VDC

Insulation Resistance
Across open switch - 1×10^9 ohms minimum
Between adjacent closed switches - 1×10^9 ohms minimum

Dielectric Breakdown Voltage
Between adjacent switches - 500 VDC minimum

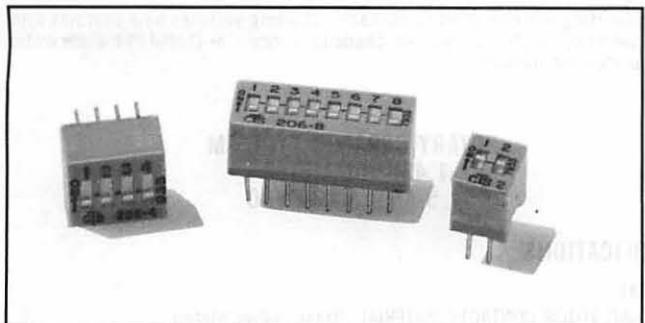

Switch Capacitance
Between adjacent switches - 5.0 pf maximum

Shock
No mechanical damage or changes of switch settings with 25 G applied

Vibration
No mechanical damage or changes of switch settings during or after testing, when tested in three mutually perpendicular planes at 10-50 Hz sweep or at 60 Hz constant vibration.

SPST switches can be supplied with either low profile actuators (actuators flush with the top of the switch housing) or with extended actuators. The low profile switches are available both sealed and taped or unsealed and without tape. The sealed and taped version are listed below and are available from stock. Switches without tape and sealing can be ordered special by leaving off the "ST" suffix on low profile actuator numbers shown below. See Bulletin 9-776 for information on Extended Actuator and Multi-Pole DIP Switches.

Specifications subject to change without notice.

Mallory switches are available in two types: Rotary and lever-action. Most styles are supplied in shorting and non-shorting contacts. Shorting switches have contacts with "make" before "break". Contacts in non-shorting switches are "break" before "make". These switches may be chosen with phenolic, ceramic or Diallyl Phthalate wafer materials. Switches are supplied with normal mounting hardware. Knobs not included. Dial plates not included.

ROTARY PHENOLIC TYPE 4M
1.437" DIAMETER
1.5 AMP @ 28 VDC

SPECIFICATIONS

GENERAL

CLIPS AND ROTOR CONTACTS MATERIAL: Brass, silver plated.
 INSULATION MATERIAL: Phenolic. Standard NEMA XXXP.

ELECTRICAL

CURRENT AND VOLTAGE RATING: Make and break resistive load 1.5 amp @ 28 VDC, 0.23 amp @ 115 VAC.
 CURRENT CARRYING CAPACITY: 9 amp.
 DIELECTRIC STRENGTH: 1500 VAC between current carrying parts and ground.
 CONTACT RESISTANCE: Average initial 3.5 milliohms.
 SURFACE RESISTIVITY: Average in excess of 500,000 megohms

MECHANICAL

CONSTRUCTION: Open bolted.
 MOUNTING: Single hole, bushing mount.
 MOUNTING HARDWARE: Nut and lockwasher supplied.
 INDEX: Single-ball, hill and valley.
 INDEX LIFE: 25,000 cycles minimum.
 INDEX TORQUE: Standard. Switches have lowest practical torque consistent with crisp detenting and smooth reliable operation.
 INDEX ANGLE: Positive, 30°
 INDEX STOPS: Adjustable
 STOP STRENGTH: 10 in. lb. minimum.
 MATERIALS AND FINISHES: Standard. All metal parts non-corrosive material or suitably plated to prevent rust or corrosion.

ROTARY CERAMIC TYPE 4M
1.469" DIAMETER
1.5 AMP @ 28 VDC

SPECIFICATIONS

GENERAL

CLIPS AND ROTOR CONTACTS MATERIAL: Brass, silver plated.
 INSULATION MATERIAL: Ceramic, MIL-1-10A, Grade L-422.

ELECTRICAL

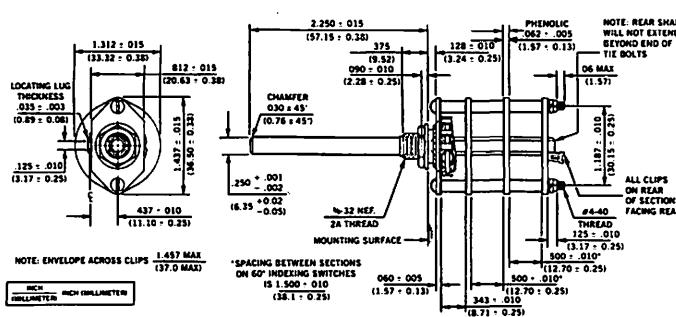

CURRENT AND VOLTAGE RATING: Make and break resistive load 1.5 amp @ 28 VDC, 0.23 amp @ 115 VAC.
 CURRENT CARRYING CAPACITY: 9 amp.
 DIELECTRIC STRENGTH: 1500 VAC between current carrying parts and ground.
 CONTACT RESISTANCE: Average initial 3.5 milliohms.
 SURFACE RESISTIVITY: Average in excess of 1 million megohms.

MECHANICAL

CONSTRUCTION: Open bolted.
 MOUNTING: Single hole, bushing mount.
 MOUNTING HARDWARE: Nut and lockwasher supplied.
 INDEX: Single-ball, hill and valley.
 INDEX LIFE: 25,000 cycles minimum.
 INDEX TORQUE: Standard. Switches have lowest practical torque consistent with crisp detenting and smooth reliable operation.
 INDEX ANGLE: Positive, 30° and 90°
 INDEX STOPS: Adjustable
 STOP STRENGTH: 10 in. lb. minimum.
 MATERIALS AND FINISHES: Standard. All metal parts non-corrosive material or suitably plated to prevent rust or corrosion.

GENERAL PURPOSE ROTARY SWITCHES 3000 SERIES

Single section with formed cup enclosing contacts.

SPECIFICATIONS:

TERMINALS: Silver plated high quality non-ferrous material. Ground rings silver plated brass. Rotor silver plated copper alloy.

CONTACT RESISTANCE: — Less than .010 OHMS. Will not increase more than 50% throughout life of switch.

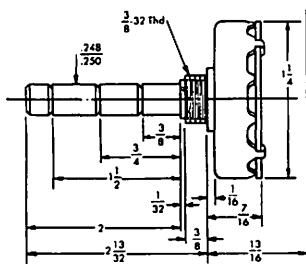

DIELECTRIC STRENGTH: — Will withstand 500 WVDC or WVAC RMS. High grade phenolic used for wafer material.

ELECTRICAL RATINGS:

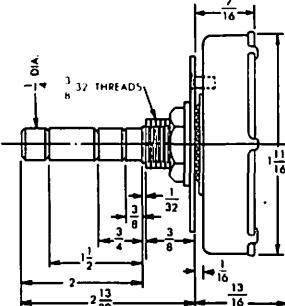

| | | | |

Consult your local Mallory distributor for price information.

TYPE 12M
1.000" DIAMETER
0.55 AMP @ 28 VDC

SPECIFICATIONS

GENERAL

CLIPS AND ROTOR CONTACTS MATERIAL: Brass, silver plated.

INSULATION MATERIAL: Diallyl Phthalate, IAW, MIL-M-14F. Type SDG.

ELECTRICAL

CURRENT AND VOLTAGE RATING: Make and break resistive load 0.55 amp @ 28 VDC, 0.17 amp @ 115 VAC.

CURRENT CARRYING CAPACITY: 7 amp.

DIELECTRIC STRENGTH: 750 VAC between current carrying parts and ground.

CONTACT RESISTANCE: Average initial 5.0 milliohms.

SURFACE RESISTIVITY: Average in excess of 900,000 megohms.

MECHANICAL

CONSTRUCTION: Open bolted.

MOUNTING: Single hole, bushing mount.

MOUNTING HARDWARE: Nut and lockwasher supplied.

INDEX: Dual-ball, side thrust.

INDEX LIFE: 50,000 cycles minimum.

INDEX TORQUE: Standard. Switches have lowest practical torque consistent with crisp detenting and smooth reliable operation.

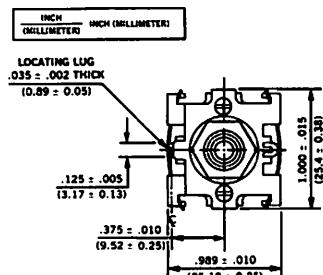

INDEX ANGLE: Positive 30°.

INDEX STOPS: Adjustable.

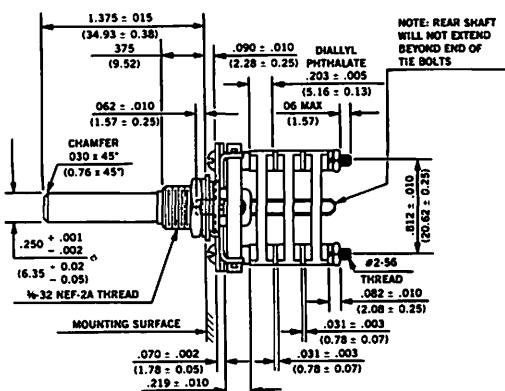

STOP STRENGTH: 10 in. lb. minimum.

MATERIALS AND FINISHES: Standard. All metal parts non-corrosive material or suitably plated to prevent rust or corrosion.

| Index | Poles per Section | No. of Sections | Max. Positions | Catalog Number Non-Shorting |

LEVER ACTION SWITCHES

Mallory lever action switches utilize MIL grade phenolic or glass-epoxy for wafer materials. Three wafer sizes available with a variety of circuits and actions. Supplied with mounting screws and knob.

STANDARD 1 3/4" DIA. PHENOLIC (FIG. H 6000 SERIES)

Rated 0.2 amp at 300 VDC; 5 amps, 6 VDC; 0.25 amp, 300 VAC; 6 amps, 6 VAC, Positive action. Breakdown, 500 VAC/DC rms. Max. non-breaking resistive load, 5 amps.

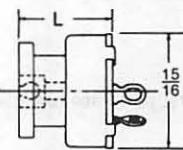

| Index | Number of Poles | Number of Positions | Size | | Catalog Number |
|-------|-----------------|---------------------|---------|---------|----------------|
| | | | A | B | Shorting |
| 20° | 2 | 4 | 2 11/16 | 2 15/16 | 5124 |
| 20° | 4 | 3 | 1 7/8 | 1 5/8 | 6243 |

MINIATURE 1 3/8" DIA. PHENOLIC (FIG. I)

Rated 350 mA at 500 VAC rms resistive. Breakdown, 1000 VAC rms, 60 cps. Suffix indicates action (e.g., 6M1213S): S, spring return to center; U, spring return to one side, positive opposite; no suffix, positive action.

| 30° | 4 | 2 | | 6M2412 |
| 30° | 4 | 2 | | 6M2412S |

Refer to price sheet No. 400 for all products on this page.

ROTARY AC SWITCH

Heavy-duty AC line switch with integral $\frac{3}{8}$ "-32 x $\frac{3}{8}$ " bushing and $\frac{1}{4}$ " dia. shaft. For use in equipment carrying up to 6 amps. (SPST). Switch action is 26°. U/L Recognized. Furnished with hex nuts, washer and 366-1 knob.

Mallory No. RAC10 (SPST)

PUSH-PULL AC SWITCHES

Attractive push-pull AC line switches are furnished with integral aluminum alloy handle to compliment the finest electronic equipment. Heavy duty, U/L Approved. PPS1, PPS2 rated 6 amps at 125 VAC. Furnished with a nickel-plated knurled ring out.

Mallory No. PPS1 (SPST)

Mallory No. PPS2 (DPST)

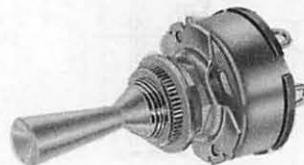

MODEL KR8M AND MODEL KR9M PUSH-PULL REPLACEMENT AC SWITCHES

Excellent replacement for push-pull AC switch sections of original equipment, single and dual controls. Rated 6 amps, 125 volts; sufficient for color set operations. Special "O" ring construction assures long life. Easy to replace, often without removing control from set. KR9M designed for higher surge current application of newer TV sets. Same basic appearance as KR8M. Switches not interchangeable.

KR8M—L dimension $\frac{3}{4}$ "

KR9M—L dimension $\frac{5}{8}$ "

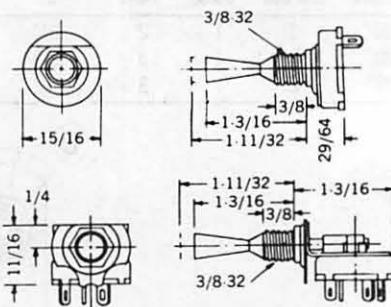

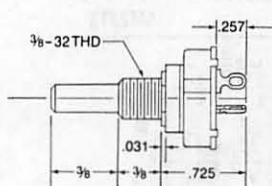

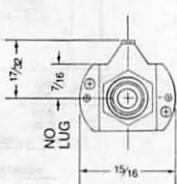

Both supplied with U.L. approved flame proof backs.

SPECIAL SWITCH

Original replacement SPST push-push switch used on the rear of controls in Curtis Mathes and other television sets. Catalog number SP1 5 amp, 125 VAC.

See page 102 for switch hardware.

PUSH-PULL AC SWITCH DIMENSIONS

Consult your local Mallory distributor for price information.

PRINTED CIRCUIT BOARD DIP SOCKETS:

Available in from 8 thru 40 contacts. The tin alloy plated contacts incorporate a patented high pressure contact (when mated with pin being inserted) which remove surface oxides and seals out potential oxidation that occur in looser fitting contacts. This feature assures, essentially, the same contact resistance as gold without the use of gold. For applications calling for gold plated contacts we offer the P-110 series shown below. Consistent performance is assured over the continuous operating temperature, see Performance Characteristics below. Will accommodate I.C. packages having any type finish — even unplated if resistance requirements will permit.

Low profile design — compact body provides maximum utilization of the available P.C. board area with a profile height of only .175 maximum.

The body is a thermoplastic polyester, glass reinforced black color. Flammability rating: UL94V-0.

Types P-11 and P-108 are available from stock. All other types are available on special order. Allow 4 to 6 weeks for delivery. For prices, reference price sheet No. 420.

Terminal contact material and plating is as follows:

- P-11 Copper alloy, tin alloy pre-plated
- P-108 Beryllium copper, tin alloy post-plated
- P-110 Beryllium copper, 30 microinches minimum of gold over .75 microinches of nickel
- P-112 Beryllium copper, tin lead alloy post-plated

Performance Characteristics:**Contact Resistance:**

- 20 milliohms maximum, type P-108
- 30 milliohms maximum, types P-11, P-110, P-112

Test current: 1 ampere**Operating temperature continuous:**

- P-11 -40°C to +75°C
- P-108 -40°C to +105°C
- P-110 -40°C to +125°C
- P-112 -40°C to +105°C

Insulation Resistance (500VDC): 100,000 megohms minimum

Dielectric Withstanding Voltage: 1000 volts AC rms minimum

Durability: 50 cycles — no electrical degradation

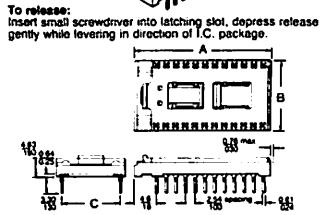

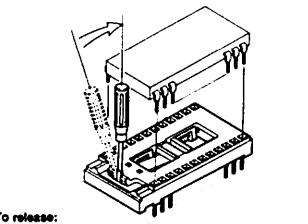

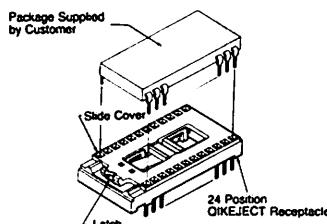

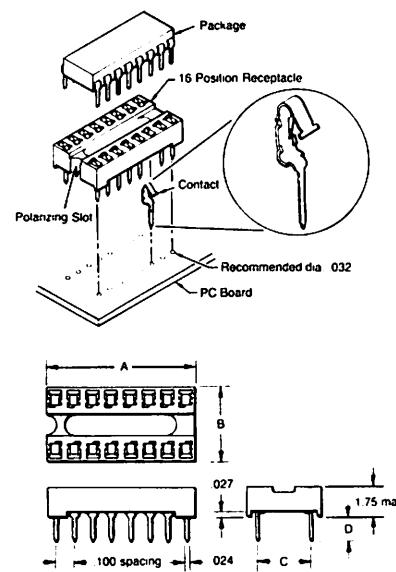

Thermal Shock: MIL-STD-1344, Method 1003, Condition B. No physical or electrical degradation

Moisture Resistance: MIL-STD-202, Method 106, except omit steps 7a and 7b, 300 megohms minimum

Vibration: MIL-STD-1344, Method 2005, Condition 111. No electrical interruption greater than 1 microsecond

Mechanical Shock: MIL-STD-202, Method 213, Condition 1. No electrical interruption greater than 1 microsecond.

Performance Characteristics conform to requirements of MIL-S-83734A.

**LOW EXTRACTION FORCE I.C. SOCKETS**

Designed for LSI (large scale integration) packages. The unique contact design prevents "wicking" of solder into the contact area during PC board soldering process. Stand-offs provide easy removal of flux residue. Contact cavities are chamfered for easy insertion of I.C. package, and a polarization indicator is provided for proper package alignment.

A unique release mechanism allows quick and easy release of the I.C. yet the socket maintains the same patented high pressure contact surface as the other DILB series.

Low profile design, .195" maximum, contacts number from 24 to 64 contacts per socket.

Performance Characteristics:

Contact Resistance (maximum): 30 Milliohms

Test Current: 1 Ampere

Operating Temperature: Continuous -40°C to +150°C

Insulation Resistance (500VDC): 100,000 Megohms minimum

Dielectric Withstanding Voltage: 1,000 Volts A.C. RMS minimum

Durability: 100 Cycles — No electrical degradation

Thermal Shock: MIL-STD 202, Method 107, Condition B. No physical or electrical degradation

Consult your local Mallory distributor for price information.

Moisture Resistance: MIL-STD 202, Method 106; except omit steps 7A and 6B, 300 Megohms minimum

Vibration: MIL-STD 1344, Method 2005, Condition 111. No electrical interruption greater than 1 microsecond

Mechanical Shock: MIL-STD 202, Method 213, Condition 1. No electrical interruption greater than 1 microsecond.

Material:

Contacts: Beryllium copper

Plating: Tin alloy postplated

Body: Thermoplastic polyester, glass reinforced. Color black.

Flammability Rating: UL94V-0

Performance Characteristics conform to requirements of MIL-S-83734A.

MALLORY SEMICONDUCTOR PRODUCTS

Mallory offers replacement and industrial semiconductors for the technician/serviceman, hobbyist, experimentor and engineer. Included are transistors, diodes, multi-diode packages, and zener diodes. The devices are designed for maximum versatility and flexibility so that they can serve in a variety of consumer and industrial applications compatible with todays need.

See Mallory Price Sheet 200B for prices on all devices.

The Mallory Semiconductor Products listed on the following pages are arranged in order not by part number but by pertinent parameters. The Semiconductors are arranged in major groups by classifications as follows:

- I) Line Index to Semiconductor Devices
- II) Silicon Transistors (Bipolar Replacement Types)
- III) Germanium Transistors (Bipolar Replacement Types)
- IV) Semiconductor Hardware and Hardware Kits
- V) General Purpose Diodes and Rectifiers
- VI) 1 Watt Zener Diodes
- VII) Thyristors (SCR'S and TRIACS)
- VIII) Dual Diodes and Full Wave Bridges
- IX) Popular Silicon Rectifiers
- X) Industrial and Exact Replacement Diodes

| Line | Catalog Number | Type (Polarity) | Description | Case Diagram | Terminal Diagram | hFE | Typical | | Absolute Maximum Ratings | | | | | Minimum |
|------|----------------|-----------------|-------------|--------------|------------------|-----|---------|---------|--------------------------|----------------------|----------------------|----------|--|---------|
| | | | | | | | Po (mW) | Ic (mA) | BV _{CE} (V) | BV _{CE} (V) | BV _{EB} (V) | fr (MHz) | | |

A) SMALL SIGNAL AF AMPLIFIERS & PREAMPLIFIERS In Order By: 1) Case Category, 2) hFE

| | | | | | | | | | | | | |
|---|--------|-----|---------------------------|-------|---|-----|-----|-----|-----|----|-----|-----|
| 1 | PTC103 | PNP | AF, IF, RF Amp/Oscillator | T092 | 5 | 140 | 500 | 600 | 70 | 70 | 5.5 | 300 |
| 2 | PTC101 | NPN | AF, IF, RF Amp/Oscillator | T0105 | 9 | 150 | 500 | 100 | 70 | 35 | 7.0 | 400 |
| 3 | PTC139 | NPN | High Gain Preamplifier | T092 | 5 | 700 | 315 | 100 | 33 | 30 | 7.0 | 200 |
| 4 | PTC123 | NPN | AF, IF Amp | T05 | 2 | 200 | 500 | 600 | 100 | 55 | 7.0 | 100 |
| 5 | PTC127 | PNP | AF Amp/Driver | T05 | 2 | 230 | 800 | 500 | 90 | 90 | 5.5 | 300 |
| 6 | PTC136 | NPN | AF, IF, RF Amp/Oscillator | T018 | 2 | 250 | 500 | 800 | 60 | 44 | 7.0 | 550 |

| Line | Catalog Number | Type (Polarity) | Description | Case Diagram | Terminal Diagram | hFE | Minimum | | Absolute Maximum Ratings | | | | | Typical |
|------|----------------|-----------------|-------------|--------------|------------------|-----|----------|---------|--------------------------|----------------------|----------------------|----------------------|-----|---------|
| | | | | | | | fr (MHz) | Po (mW) | Ic (mA) | BV _{CE} (V) | BV _{CE} (V) | BV _{EB} (V) | hFE | |

B) SMALL SIGNAL RF & IF AMPLIFIERS AND OSCILLATORS In Order By: 1) Case Category, 2) fr

| | | | | | | | | | | | | |
|----|--------|-----|----------------------------|-------|----|------|-----|-----|-----|----|-----|-----|
| 7 | PTC121 | NPN | AF, IF, RF Amp/Oscillator | T092 | 5 | 100 | 500 | 100 | 70 | 50 | 5.0 | 200 |
| 8 | PTC139 | NPN | High Gain IF Amp | T092 | 5 | 200 | 315 | 100 | 33 | 30 | 7.0 | 700 |
| 9 | PTC103 | NPN | AF, IF, RF Amp/Oscillator | T092 | 5 | 300 | 500 | 600 | 70 | 70 | 5.5 | 140 |
| 10 | PTC101 | NPN | AF, IF, RF Amp/Oscillator | T0105 | 9 | 400 | 500 | 100 | 70 | 35 | 7.0 | 150 |
| 11 | PTC132 | NPN | VHF-UHF Amp/Oscillator/Mix | T092 | 21 | 1000 | 185 | 50 | 50 | 50 | 5.0 | 100 |
| 12 | PTC123 | NPN | AF, IF, Amp/Oscillator | T05 | 2 | 100 | 500 | 600 | 100 | 55 | 7.0 | 200 |
| 13 | PTC136 | NPN | AF, IF, RF Amp/Oscillator | T018 | 2 | 550 | 500 | 800 | 60 | 44 | 7.0 | 250 |

| Line | Catalog Number | Type (Polarity) | Description | Case Diagram | Terminal Diagram | Po (W) | Ic (A) | BV _{CE} (V) | BV _{CE} (V) | BV _{EB} (V) | fr (MHz) | Absolute Maximum Ratings | | Minimum | Typical |
|------|----------------|-----------------|-------------|--------------|------------------|--------|--------|----------------------|----------------------|----------------------|----------|--------------------------|--|---------|---------|
| | | | | | | | | | | | | hFE | | | |

C) LOW POWER AF AMP/AF DRIVER/AF OUTPUT In Order By: 1) Case Category, 2) Po, 3) Catalog Number

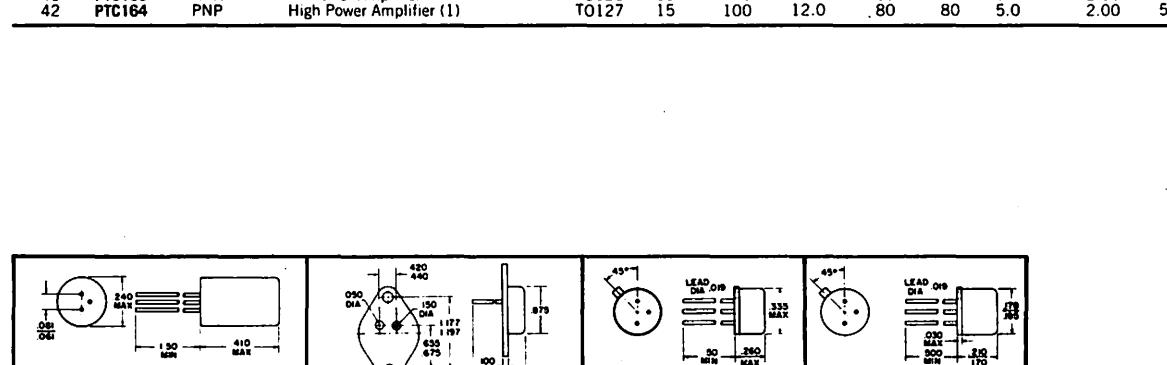

| | | | | | | | | | | | | |
|----|--------|-----|--|-------|----|------|------|-----|-----|-----|-----|-----|
| 14 | PTC127 | PNP | AF Amp/Driver | T05 | 2 | 800m | 500m | 90 | 90 | 5.5 | 300 | 230 |
| 15 | PTC144 | NPN | AF Driver/Output | T05 | 2 | 5.0 | 1.0 | 130 | 100 | 8.0 | 150 | 100 |
| 16 | PTC142 | PNP | AF Driver/Output | T05 | 2 | 6.0 | 3.0 | 65 | 45 | 8.0 | 200 | 80 |
| 17 | PTC143 | NPN | AF Driver/Output | T05 | 2 | 6.0 | 3.0 | 65 | 45 | 8.0 | 200 | 80 |
| 18 | PTC141 | PNP | AF Driver/Output | T05 | 2 | 7.0 | 1.0 | 105 | 100 | 8.0 | 120 | 100 |
| 19 | PTC193 | NPN | AF Output/Modulator for CB Radio, etc. | T0202 | 26 | 7.0 | 1.5 | 50 | 40 | 5.0 | 70 | 150 |

D) MEDIUM POWER AF OUTPUTS (2 to 40W) In Order By: 1) Case Category, 2) Po, 3) Catalog Number

| | | | | | | | | | | | | |
|----|--------|-----|--|-------|----|------|-----|-----|-----|-----|-------|-----|
| 20 | PTC144 | NPN | AF Driver/Output | T05 | 2 | 5.0 | 1.0 | 130 | 100 | 8.0 | 150.0 | 100 |
| 21 | PTC142 | PNP | AF Driver/Output | T05 | 2 | 6.0 | 3.0 | 65 | 45 | 8.0 | 200.0 | 80 |
| 22 | PTC143 | NPN | AF Driver/Output | T05 | 2 | 6.0 | 3.0 | 65 | 45 | 8.0 | 200.0 | 80 |
| 23 | PTC141 | PNP | AF Driver/Output | T05 | 2 | 7.0 | 1.0 | 105 | 100 | 8.0 | 120.0 | 100 |
| 24 | PTC148 | NPN | AF Output/Regulator for Line Operated Sets | T066 | 12 | 40.0 | 5.0 | 160 | 120 | 6.0 | 20.0 | 60 |
| 25 | PTC110 | NPN | AF Output for Low Power Hi-Fi | T0220 | 13 | 12.5 | 3.0 | 70 | 70 | 7.0 | 75.0 | 100 |
| 26 | PTC111 | NPN | AF Output for Lower Power Hi-Fi | T0220 | 13 | 12.5 | 3.0 | 70 | 70 | 7.0 | 75.0 | 100 |
| 27 | PTC163 | NPN | AF Output for Medium Power Hi-Fi | T0126 | 15 | 40.0 | 4.0 | 60 | 60 | 5.0 | 2.0 | 50 |
| 28 | PTC160 | PNP | Fast Switching Amplifier | T0126 | 15 | 40.0 | 4.0 | 70 | 70 | 6.0 | 9.0 | 100 |
| 29 | PTC193 | NPN | AF Output/Modular for CB Radio, etc. | T0202 | 26 | 7.0 | 1.5 | 50 | 40 | 5.0 | 70.0 | 150 |

E) HIGH POWER AF OUTPUT (30 to 250W) In Order By: 1) Case Category, 2) Po, 3) Ic, 4) Catalog Number

| | | | | | | | | | | | | |
|----|--------|-----|--|-------|----|-----|------|-----|-----|-----|-------|-----|
| 30 | PTC119 | NPN | High Power Amplifier | T03 | 12 | 115 | 15.0 | 105 | 65 | 7.5 | 2.00 | 120 |
| 31 | PTC140 | NPN | High Power Amplifier | T03 | 12 | 115 | 15.0 | 100 | 60 | 4.0 | 6.00 | 60 |
| 32 | PTC116 | NPN | High Power Amplifier | T03 | 12 | 150 | 10.0 | 70 | 60 | 4.0 | 4.00 | 40 |
| 33 | PTC173 | NPN | High Power Output | T03 | 12 | 200 | 16.0 | 100 | 100 | 7.0 | 1.00 | 50 |
| 34 | PTC175 | NPN | Fast Switching-High Power/High Current Amplifier | T03 | 12 | 250 | 30.0 | 100 | 100 | 6.0 | 2.00 | 50 |
| 35 | PTC148 | NPN | AF Output/Regulator for Line operated sets | T066 | 12 | 40 | 5.0 | 160 | 120 | 6.0 | 20.00 | 60 |
| 36 | PTC154 | NPN | Fast Switching Power Amp. | T0220 | 13 | 50 | 7.0 | 90 | 70 | 5.0 | 3.00 | 70 |
| 37 | PTC166 | PNP | AF Power Output/TV Vertical Output | T0220 | 13 | 75 | 5.0 | 100 | 80 | 5.0 | 2.00 | 40 |
| 38 | PTC168 | PNP | High Power Amplifier (1) | T0127 | 16 | 100 | 12.0 | 80 | 80 | 5.0 | 2.00 | 50 |
| 39 | PTC169 | NPN | High Power Amplifier (1) | T0127 | 16 | 100 | 12.0 | 80 | 80 | 5.0 | 2.00 | 50 |
| 40 | PTC162 | PNP | AF Power Amplifier | T0126 | 15 | 40 | 4.0 | 60 | 60 | 5.0 | 2.00 | 50 |
| 41 | PTC163 | PNP | AF Power Amplifier | T0126 | 15 | 40 | 4.0 | 60 | 60 | 5.0 | 2.00 | 50 |
| 42 | PTC164 | PNP | High Power Amplifier (1) | T0127 | 15 | 100 | 12.0 | 80 | 80 | 5.0 | 2.00 | 50 |

Consult your local Mallory distributor for price information.

| 46 | PTC175 | NPN | Fast Switching High-Power, High Current Amplifier | TO3 | 12 | 250 | 30.0 | 100 | 100 | 6.0 | .7 | |
| 47 | PTC154 | NPN | Plastic Power AF/Vertical Output | TO220 | 13 | 50 | 7.0 | 90 | 70 | 5.0 | | |
| 48 | PTC160 | PNP | Plastic Power AF/Vertical Output | TO126 | 15 | 40 | 4.0 | 70 | 70 | 6.0 | | |

III) GERMANIUM TRANSISTORS Bipolar Replacement Types

| Line | Catalog Number | Type (Polarity) | Description | Case Diagram | Terminal Diagram | Typical | Absolute Maximum Ratings | | | | | Minimum |
|--|----------------|-----------------|-------------------------|--------------|------------------|---------|--------------------------|---------|----------|----------|----------|----------|
| | | | | | | hFE | Po (mW) | Ic (mA) | BVcs (V) | BVce (V) | BVeb (V) | fr (MHz) |
| A) SMALL SIGNAL AF AMPLIFIERS & PREAMPLIFIERS In Order By: 1) Case Category, 2) hFE | | | | | | | | | | | | |
| 49 | PTC102 | PNP | AF/IF/RF Amp/Oscillator | TO5 | 2 | 120 | 200 | 300 | 40 | 25.0 | 6.0 | 5.0 |

| Line | Catalog Number | Type (Polarity) | Description | Case Diagram | Terminal Diagram | Minimum | Absolute Maximum Ratings | | | | | Typical |
|------|----------------|-----------------|----------------------------------|--------------|------------------|----------|--------------------------|---------|----------|----------|----------|---------|
| | | | | | | fr (MHz) | Po (mW) | Ic (mA) | BVcs (V) | BVce (V) | BVeb (V) | hFE |
| 50 | PTC102 | PNP | AF/IF/RF Amp/Oscillator | TO5 | 2 | 5.0 | 200 | 300 | 40.0 | 25 | 6.0 | 120 |
| 51 | PTC108 | NPN | RF/IF/Amp/Osc/Mixer for AM Radio | TO5 | 2 | 27.5 | 150 | 300 | 46.7 | 27 | 22.0 | 70 |
| 52 | PTC145 | PNP | IF/RF Amp/Osc/Mixer | TO5 | 2 | 800.0 | 300 | 200 | 33.0 | 33 | 2.75 | 200 |

B) SMALL SIGNAL RF & IF AMPLIFIERS AND OSCILLATORS In Order By: 1) fr

| Line | Catalog Number | Type (Polarity) | Description | Case Diagram | Terminal Diagram | Absolute Maximum Ratings | | | | | Minimum | Typical |
|------|----------------|-----------------|-------------|--------------|------------------|--------------------------|--------|----------|----------|----------|----------|---------|
| | | | | | | Po (W) | Ic (A) | BVcs (V) | BVce (V) | BVeb (V) | fr (MHz) | hFE |

C) LOW POWER AF AMPLIFIERS/DRIVERS/OUTPUTS In Order By: 1) Po

| | | | | | | | | | | | | |
|----|--------|-----|-------------------------|-----|---|------|------|----|------|----|------|-----|
| 53 | PTC134 | NPN | Low Power Driver/Output | TO1 | 1 | 350m | 500m | 36 | 36.0 | 14 | 2.75 | 180 |
| 54 | PTC135 | PNP | Low Power Driver/Output | TO1 | 1 | 900m | 500m | 38 | 35.0 | 14 | 2.75 | 180 |

D) MEDIUM POWER AF DRIVER/OUTPUT (2 to 40 watts) In Order By: 1) Case Category

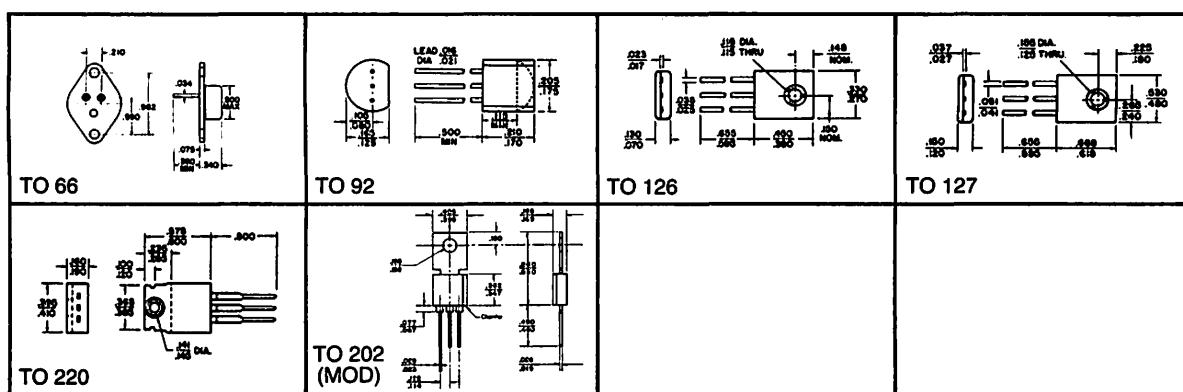

| | | | | | | | | | | | | |
|----|--------|-----|--|-------|----|------|-----|----|----|-----|------|-----|
| 55 | PTC155 | PNP | Power Amp/Regulator (used in DC-DC (Conv's)) | TO8 | 1 | 9.0 | 5.0 | 60 | 40 | 5.0 | 1.0 | 100 |
| 56 | PTC194 | PNP | AF Power Output | MD10a | 12 | 12.0 | 2.0 | 35 | 35 | 6.0 | .700 | 100 |

E) HIGH POWER AMPLIFIERS (Over 30 watts) In Order By: 1) Case Category, 2) Po

| | | | | | | | | | | | | |
|----|---------|-----|-----------------|------|----|-----|------|-----|----|------|------|-----|
| 57 | PTC105A | PNP | AF Power Output | TO3 | 12 | 90 | 10.0 | 100 | 75 | 50 | .5 | 80 |
| 58 | PTC120A | PNP | AF Power Output | TO66 | 12 | 57 | 7.0 | 75 | 60 | 20 | .25 | 150 |
| 60 | PTC106A | PNP | AF Power Output | TO36 | 10 | 150 | 15.0 | 55 | 45 | 20.0 | .600 | 90 |

F) TV HIGH POWER OUTPUT/DEFLECTION/SWITCHING

| | | | | | | | | | | | | |
|----|--------|-----|--------------------------------|-----|----|----|----|-----|-----|-----|-----|----|
| 61 | PTC122 | PNP | AF Output/Regulator and Switch | TO3 | 12 | 56 | 10 | 220 | 350 | 2.2 | 1.1 | 65 |
|----|--------|-----|--------------------------------|-----|----|----|----|-----|-----|-----|-----|----|

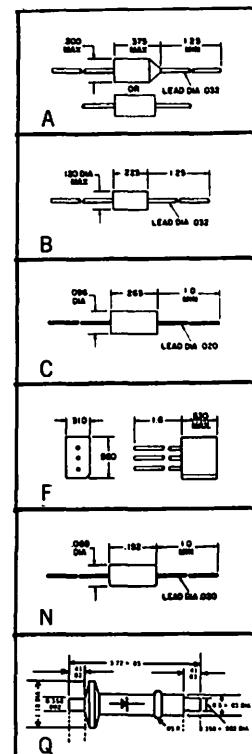

Consult your local Mallory distributor for price information.

IV) SEMICONDUCTOR HARDWARE KITS and HARDWARE ITEMS

| Catalog Number | Description |
|----------------|----------------------------|
| HDO4A | Mica Washer |
| HDO4B | Brass Washer |
| HDO4C | Teflon® Washer |
| HDO4D | Solder Terminal |
| HDO5A | Mica Washer |
| HDO5B | Brass Washer |
| HDO5C | Teflon® Washer |
| HDO5D | Solder Terminal |
| HDO5E | 1/4"-28 Locknut |
| HTO39A | Mica Wafer |
| HTO66B2 | Insulating Shoulder Washer |
| HTO220A | Mica Wafer |

| Contains | | |
|----------------------|----------|-------------|
| Kit # | Quantity | Part Number |
| HDO4 | 2 | HDO4A |
| (For D04, S Case) | 1 | HDO4B |
| Diodes | 1 | HDO4C |
| | 1 | HDO4D |
| HDO5 | 2 | HDO5A |
| | 1 | HDO5B |
| | 1 | HDO5C |
| | 1 | HDO5D |
| | 1 | HDO5E |

V) GENERAL PURPOSE DIODES and RECTIFIERS

In Order By: PIV, 2) Io

| Line | Catalog Number | Outline Diagram | Application | Material | Maximum Ratings | | | | | |
|---|----------------|-----------------|---------------------------|----------|-----------------|--------|-----|--------------|----------------|----------------|
| | | | | | PIV (V) | Io (A) | (V) | Vf at If (A) | Ir at PIV (μA) | 1 Hz Surge (A) |
| A) GENERAL REPLACEMENT DIODES AND RECTIFIERS In Order By: PIV, 2) Io | | | | | | | | | | |
| 62 | PTC206 | C | General Detector | Germ. | 50 | 50m | .50 | 375m | 200 | 500m |
| 63 | PTC214 | N | Fast Switching Det | Si. | 200 | 250m | 1.0 | 250m | 1.0 | 8.0 |
| 64 | PTC201 | B | General Purpose Rectifier | Si. | 400 | 1.0 | 1.0 | 1.0 | 1.0 | 30.0 |
| 65 | PTC202 | B | General Purpose Rectifier | Si. | 600 | 1.0 | 1.0 | 1.0 | 1.0 | 30.0 |
| 66 | PTC203 | B | General Purpose Rectifier | Si. | 1000 | 1.0 | 1.0 | 1.0 | 1.0 | 30.0 |
| 67 | PTC205 | B | General Purpose Rectifier | Si. | 1000 | 2.5 | 1.0 | 2.5 | 1.0 | 80.0 |
| 68 | PTC204 | B | General Purpose Rectifier | Si. | 1000 | 3.0 | 1.0 | 3.0 | 1.0 | 80.0 |

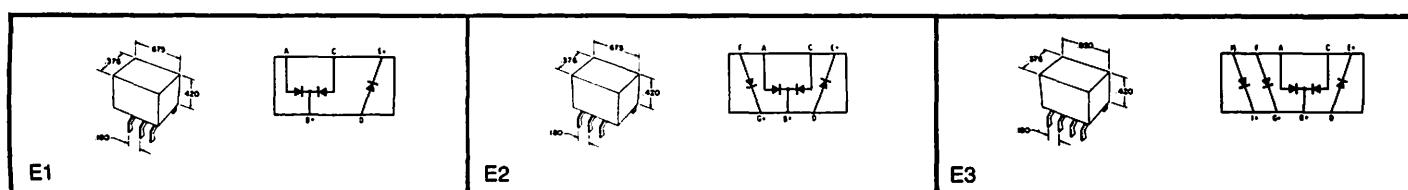

B) TELEVISION APPLICATIONS, SINGLE CELL

| | | | | | | | | | | |
|----|--------|-----|-------------------------------|------|------|-------|-----|------|------|----|
| 69 | PTC209 | SE | Boost Rectifier | Sel. | 800 | 2m | | | 150 | |
| 70 | PTC216 | A | Fast Switching Damper | Si. | 1400 | 1.0 | 1.0 | 1.0 | 6.0 | 50 |
| 71 | PTC218 | P | Damper | Si. | 5000 | 300m | 4.4 | 300m | 5.0 | 15 |
| 72 | PTC208 | SEL | Focus Rectifier | Sel. | 6500 | 2m | | | 150 | |
| 73 | PTC210 | J | High Voltage Rectifier | Sel. | 11K | 25m | 18 | 25m | 1.0 | |
| 74 | PTC219 | Q | High Voltage Rectifier for TV | Si. | 45K | 3.0mA | 130 | 30mA | 20nA | |

C) TELEVISION APPLICATIONS, MULTI-CELL

| | | | | | | | | | | |
|----|--------|----|--------------------|------|----|------|--|--|--|--|
| 75 | PTC403 | E1 | Convergence | Sel. | 18 | 65m | | | | |
| 76 | PTC404 | E2 | Convergence | Sel. | 18 | 65m | | | | |
| 77 | PTC405 | E3 | Convergence | Sel. | 18 | 65m | | | | |
| 78 | PTC407 | F | Horizontal AFC (1) | Sel. | 47 | 250m | | | | |

Sonalert® audio and electrical specifications

MALLORY

Mallory Sonalert® signals produce an audible tone by electronic means when voltage is applied. Voltages from 1V to 250V may be used depending upon the model.

Electrical power is converted to sound by means of a piezoelectric transducer operating substantially at resonance in a solid state oscillator resulting in efficient power conversion.

Sonalert signals may be powered by many electrical sources ranging from single cell batteries to industrial power lines. Little electrical power is required making them ideally suitable for portable battery operated equipment. This low power feature allows the Sonalert signal to be turned on or off with a low power transistor, SCR, or integrated circuit. Completely solid state with no moving parts, no arcing, and no mechanical wear, the Mallory Sonalert signals should give you many years of trouble-free service.

For complete specification request bulletin 4-10-03. For pricing see price sheet No. 700.

Underwriters laboratories

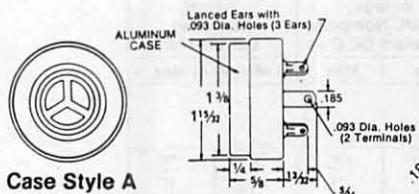

The following models are listed as recognized components – audible signal appliances. Guide Number UCST2, Yellow Card Number S1290.

SNP428 SC628 SC648 SC628P SC110 SC110P

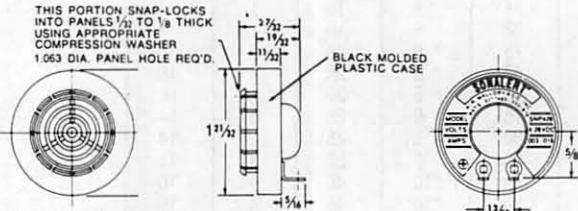

Consult your local Mallory distributor for price information.

Specifications subject to change without notice.

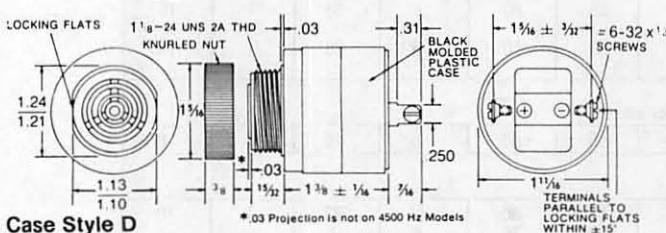

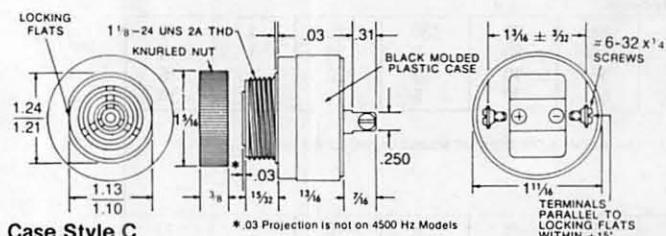

OUTLINE DIMENSIONS FRACTIONS $\pm \frac{1}{32}$ DECIMALS $\pm .01$

Terminals—.032 steel, tin plated with .093 dia. wire hole, will accept standard 3/16" quick disconnect.

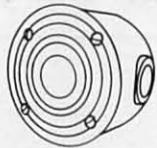

Terminals—.016 brass, hot tin finish with .076 wire hole. Terminal will accept standard 1/8" quick disconnect.

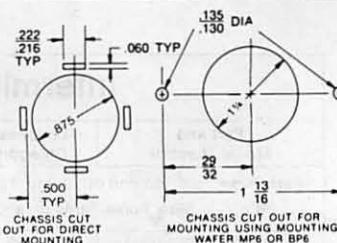

Case Style E—Outline dimensions are the same as case style D except length is changed to $1\frac{15}{16} \pm \frac{3}{32}$.

Electrical Mounting Box—Part Number SCMB
Used to mount Sonalert® signal case styles C and D on standard 3/4 inch electrical conduit. 3-1/2 inch diameter, 2 inch deep ABS plastic.

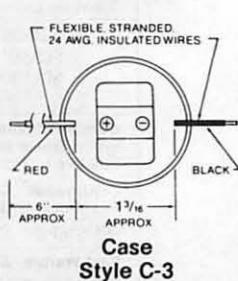

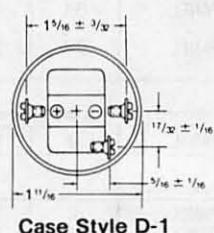

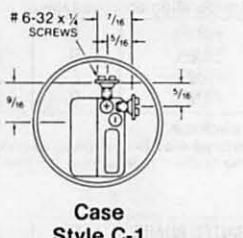

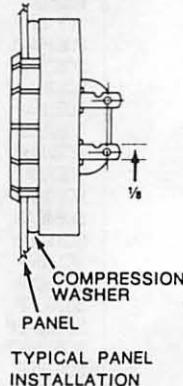

Consult your local Mallory distributor for price information.

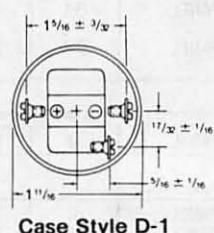

Mounting—Four lanced twist mount ears per EIA std. RS395 are provided for mounting. Terminals are electrically isolated from case and mounting ears. Also may be mounted using mounting wafer number MP6 for uninsulated mounting or mounting wafer number BP6 to insulate case from chassis.

Mounting—Panel hole $1.063 \pm .005$ diameter should be punched from the back side so that locking fingers enter on the slightly rounded edge of the hole. Assemble proper compression washer and press into panel hole until locking fingers snap over hole edge. Installation pressure should be applied only at the circumference of the device.

| PANEL THICKNESS | COMPRESSION WASHER NO. |
|-----------------------|------------------------|
| 11-12 GA. (.125-.109) | PW1 |
| 13-17 GA. (.093-.056) | PW2 |
| 18-22 GA. (.050-.031) | PW3 |

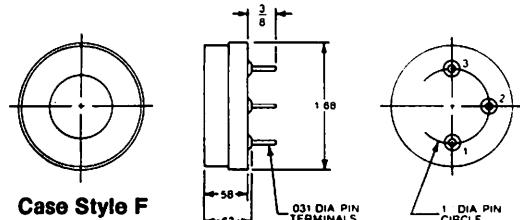

Terminals—.032 brass, tin plated, tapped for #6-32 screw. Two #6-32 cadmium or zinc plated steel screws included. Will accept standard 1/4" quick disconnect.

Mounting—Remove black plastic nut and insert threaded front through 1.25" hole punched in panel. If orientation is needed, note locking flats on drawing. Screw nut back on. Do not overtighten. To substitute natural finished aluminum nut add C to catalog number. To substitute black anodized aluminum nut add B to catalog number. Example:—SC628B.

Specifications subject to change without notice.

Case Style F

Mounting—Insert into printed circuit board and hand or machine solder. For recommended fluxing, soldering, and cleaning procedures, send for Mallory Audio Signal Engineering Bulletin 778.

Terminals—.031 dia. soldercoated copperclad steel.

Electrical Connections—SBM2, SBM428, SBM616P, SBM616J—When pin 1 is connected to + voltage and pin 3 is connected to common (-), unit will sound. Pin 2 is for mechanical support only and is not connected internally.

SBM616PC, SBM616JC—When pin 1 is connected to + voltage, and pin 3 is connected to common (-), and the voltage on pin 2 is within 1.25V of pin 1 or higher, the unit will sound a pulsing tone. When the voltage on pin 2 is within .9V of pin 3 or lower the unit will sound a continuous tone. The maximum voltage which may be applied to pin 2 before damage may occur is ± 16 V referenced to pin 3. Pin 2 input impedance is 110K ohm.

Sonalert® signals for military applications

Environmental specifications

| Test | MIL-STD-202 method | Test condition |
|-------------------|--------------------|----------------|
| Thermal shock | 107 | A |
| Humidity | 103 | B |
| Salt spray | 101 | A |
| Shock | 213 | H |
| Vibration | 201 | None |
| Terminal strength | 211 | A (5 lbs) |

Life expectancy: 5 years under normal operating conditions.

Operating temperature: -40°C to $+85^{\circ}\text{C}$

Storage temperature: -65°C to $+85^{\circ}\text{C}$

Altitude change: 10,000 feet per minute maximum.

Quality Specifications

Operating—100% tests of sound and frequency at 85°C , 25°C and -40°C . Data at 25°C is supplied with parts.

Environmental—MIL Std. 105D Level II single normal inspection. .65 AQL.

MALLORY CAPACITOR CO. CODE IDENTIFICATION — 37942

Consult your local Mallory distributor for price information.

Back by popular demand, Mallory components are now available in compact Mallobin merchandisers. The Mallobin is a handsome, easy to stack display case designed for quick access to a variety of electronic components.

Mallobins are available in two sizes: the standard Mallobin with fifteen drawers, and the Master Mallobin. Master Mallobins have twenty large drawers with partitions to accommodate an even greater assortment of components.

Whether you choose a standard Mallobin or an expanded Master Mallobin, you can rest assured, Mallory Mallobins offer the versatility and component reliability you desire.

Mallobins and Master Mallobins can be supplied containing other Mallory products in a variety of component mixes. Contact your Mallory salesman for details.

MASTER MALLOBINS

MLC2001D An assortment of $\frac{1}{2}$ " diameter subminiature potentiometers. $\frac{1}{8}$ " shafts with $\frac{1}{4} \times 32$ bushing. $\frac{1}{4}$ watt. Values from 1K to 1 megohm.

MTC2001D A selection of heavy duty miniature trimmers with horizontal and vertical adjustment models. Values from 100 ohms to 5 meghoms.

RVA2001D A combination of cermet and carbon subminiature trimmer potentiometers in two convenient sizes. Horizontal and vertical mounting styles. Values from 500 ohms to 2 meghoms.

MR2001D An assortment of wirewound 3 watt potentiometers with various mounting styles. Values from 10 ohms to 15K ohms.

CCC1 An assortment of general purpose type disc ceramic capacitors. Values from 3.3pF to .05μF.

CCC2 A selection of temperature and frequency compensated ceramic capacitors. Values from 1pF to .01μF.

CCC3/3A An assortment of low voltage type disc ceramic capacitors. Values from .001μF to 1μF and 3WVDC to 500WVDC.

CCC4 Specially selected high voltage type ceramic capacitors. Values from 15pF to .01μF and 2KV to 6KV.

SX2001D A selection of polystyrene film capacitors, designed for high temperature stability. Values from 5pF to .01μF.

TT2001D A wide assortment of miniature axial leaded aluminum electrolytic capacitors. Values from 1μF to 1,500μF with voltages to 150WVDC.

VTL2001D A selection of miniature single ended aluminum electrolytic capacitors. Values from 1μF to 3,300μF with voltages to 100WVDC.

MALLOBINS

TT151 An assortment of axial leaded miniature aluminum electrolytic capacitors with voltages to 150WVDC. Values from 1μF to 1,500μF.

TC151 Assorted axial leaded aluminum electrolytic capacitors with voltages to 600WVDC. Values from 1μF to 5,000μF.

PVC151 A selection of radial leaded epoxy coated film capacitors with voltages to 2,000WVDC. Values from .001μF to 2μF.

MON0151 A collection of monolithic ceramic capacitors with voltages to 200WVDC. Values from 10pF to 1μF.

MTP151 An assortment of axial leaded liquid electrolyte tantalum capacitors with voltages to 60WVDC. Values from 1μF to 470μF.

TIM151 A selection of molded solid tantalum capacitors. Radial leads and voltage ratings to 50WVDC. Values from 1μF to 68μF.

CTL151 Assorted liquid electrolyte tantalum capacitors. Axial leads and copper alloy case with voltages to 125WVDC. Values from 2.5μF to 560μF.

TDC151 An assortment of epoxy dipped solid tantalum capacitors. Voltages to 35WVDC. Values from 1μF to 150μF.

MALLOBINS

ZBB151 A collection of 1 watt zener diodes. 5% tolerance. Values from 3.6V to 200V.

FW151 An assortment of bridge rectifiers with voltage capabilities to 1,000 volts. Values from 1.5 amps to 25 amps.

UL151 Assorted circuit breakers designed for anti-cheat reset action. Values from .5 amps to 3.5 amps.

DIPS151 A selection of dual-in-line sockets and switches. 8 to 40 pin sockets and 4 to 9 actuator DIP switches.

RVS151 A package containing cermet and carbon subminiature trimmer potentiometers. Horizontal and vertical mounting styles. Values from 500 ohms to 2 meghoms.

MTC151 An assortment of horizontal and vertical mount miniature trimmer potentiometers. Values from 100 ohms to 5 meghoms.

MR151 Assorted wirewound 3 watt potentiometers with various mounting styles. Values from 10 ohms to 15K ohms.

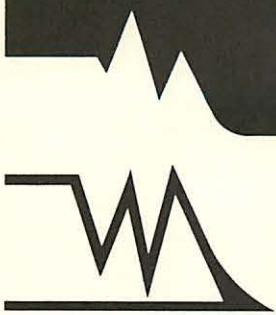

G301 Kit containing two Mallobin cabinets with general purpose ceramic disc capacitors.

SX301 Kit containing two Mallobin cabinets with polystyrene film capacitors. Values from 5pF to .01μF.

L151 An assortment of low voltage type ceramic disc capacitors. Values from .001μF to 1μF.

VTL151 A selection of single ended aluminum electrolytic capacitors with voltages to 100WVDC. Values to 1μF to 3,300μF.

Consult your local Mallory distributor for price information.

MALLORY'S GOT IT

FOR YOU!

• INSTANT INFORMATION

MALLORY DOES IT! Distributor Order Entry System Information Terminal — gives you on-line direct access to our computer. In seconds you can get all the facts you need to place your order: inventory availability, quantity pricing cross reference, part numbers. For the complete line of Mallory Precision Electronic Components, you can put a DOES IT in your office for a surprisingly low monthly rate.

• FAST DELIVERY

We can deliver the parts you need anywhere in the U.S. in just a few days. Because we're set up to process, pack and get your order out the door in hours. Delivery is prompt, because we're located at the crossroads of the country, a major shipping hub with a concentration of motor freight carriers on-call, day and night. You get instant service on the complete line of Mallory Precision Electronic Components.

• VERSATILE PACKAGING

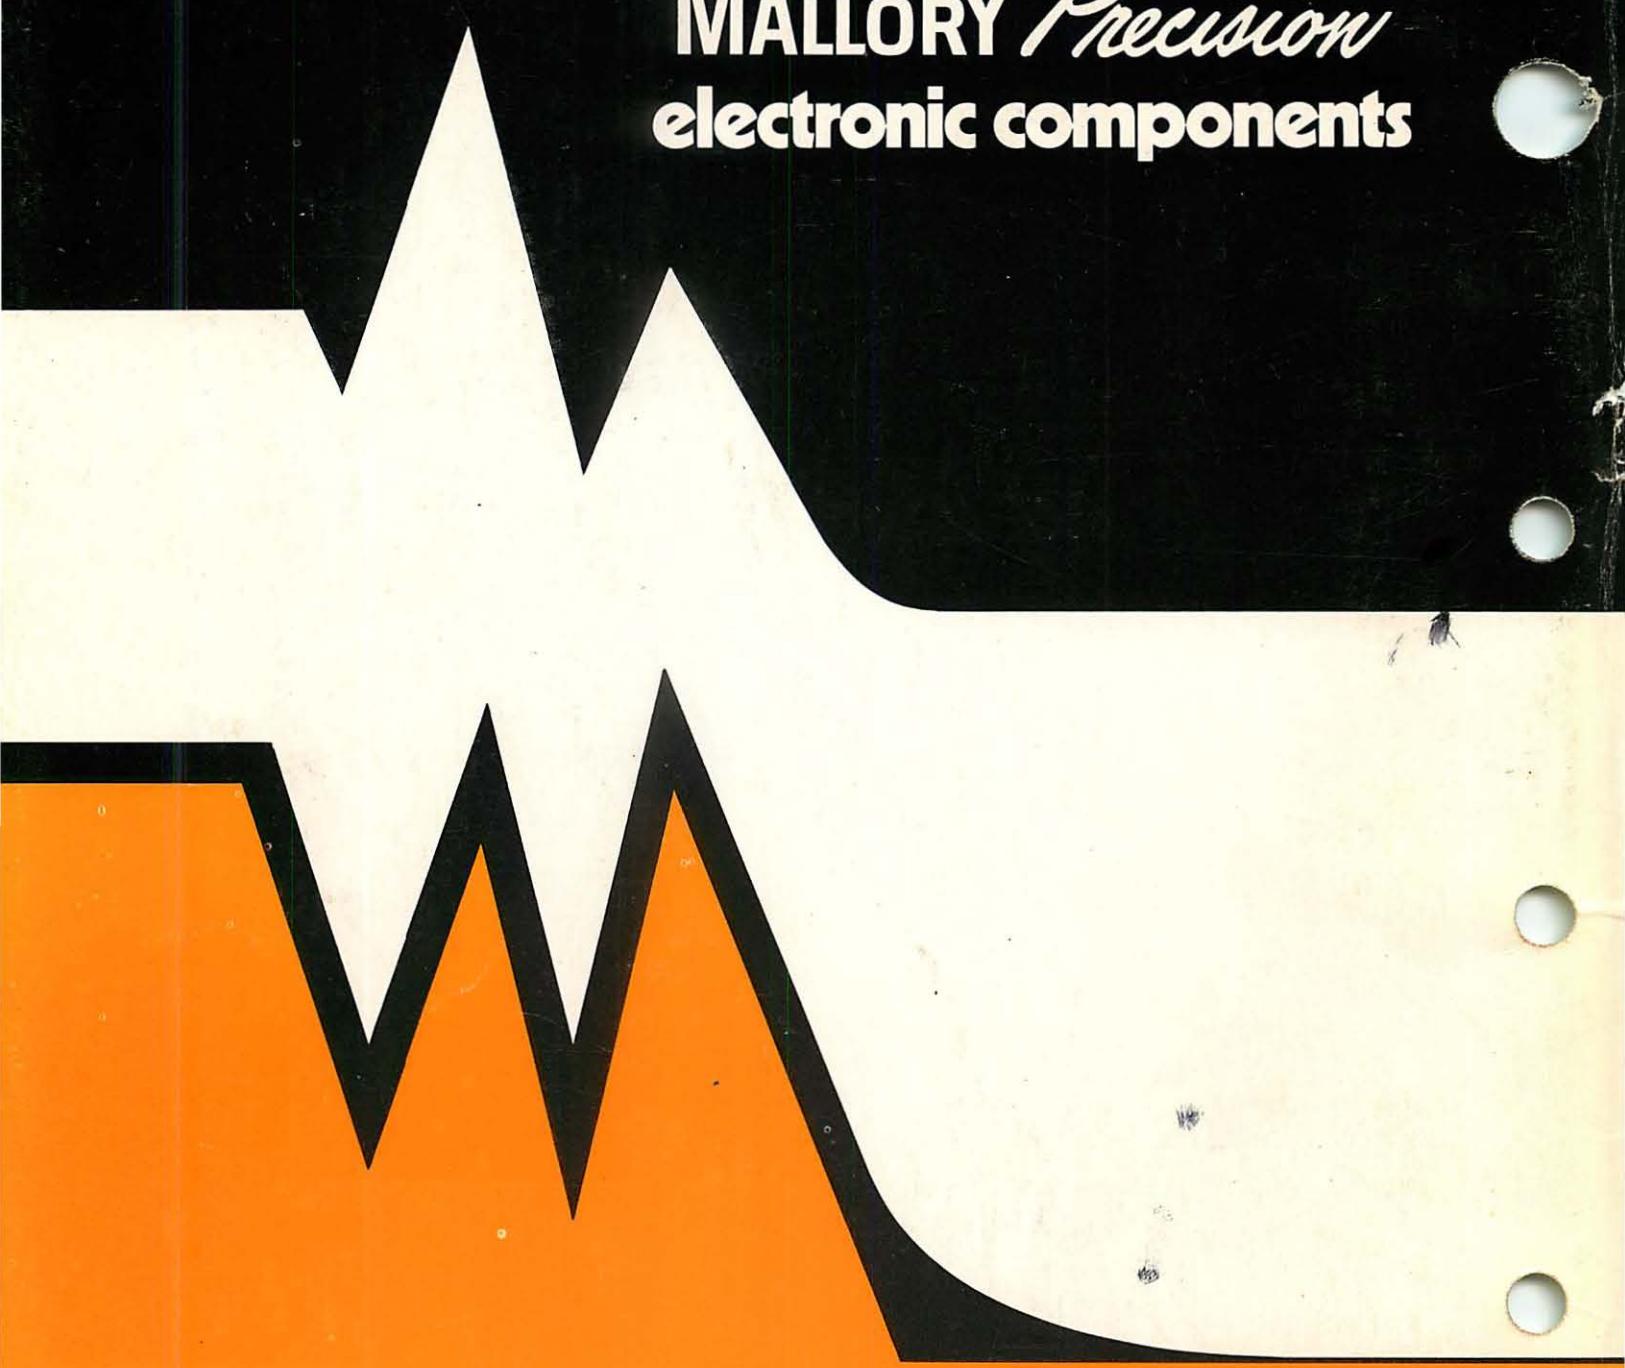

Whether your customers buy by the thousands or one at a time, Mallory can deliver products in the packaging you want. Super-bulk, Mini-bulk, or display. Complete and versatile packaging for the complete line of Mallory Precision Electronic Components.

• DOUBLE-CHECKED QUALITY

Every Mallory component you receive has its quality tested twice. First at the manufacturing plant, and again when it is received at our warehouse. Quality assurance is more than a policy at Mallory, it's a way of life. This practice applies to the complete line of Mallory Precision Electronic Components.

For the complete line of Mallory capacitors, switches, controls, resistors, connectors, semiconductors, Sonalet signals and other precision electronic components, see your nearest sales office or contact Mallory Distributor Products Company, Mallory Components Group, P.O. Box 1284, Indianapolis, Indiana 46206 U.S.A.
