

**PRODUCT DATA SHEET****POWER INDUCTOR****P7605 Family****Features**

- \* High Current (Saturation to 20A)
- \* Low DCR (to 9mΩ)
- \* Low profile (to <3mm)
- \* Surface Mount
- \* Flat top for pick & place
- \* Pb-free

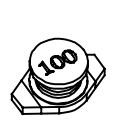

**Applications**

- \* DC-DC Converters
- \* High Current/Low Voltage Converters
- \* Notebook and handheld equipment
- \* Flash memory programmers

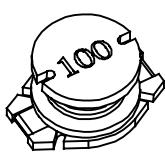

**DESCRIPTION**

The P7605 family comprises high current, unshielded power inductors. Six mechanical sizes are available, offering compact solutions for applications requiring high energy storage. The 1608 size has a profile less than 3mm and employs a ceramic base to assist heat transfer, enabling a very high current density.

The 3308, 3316 and 3340 sizes share the same footprint, but differ in height. The family provides reliable Pb-free terminations suitable for Pb-free and conventional placement and reflow.

**P7605-5022 dimensions**

Fig. 6

Dimensions shown are in millimetres.

Terminal plating is pure tin (Sn) except 1608 size (gold plating).

Recommended reflow solder profile: 2 minutes (min) @ 100-150°C, 10 seconds (max) @ 230°C; time above 200°C 30 seconds maximum.

**Notes**

1. Inductance measured at 100kHz, 100mV.
2. SRF (Self resonant Frequency) is typical and for reference only.
3. Rated current is the current at which the temperature rise is 15°C typical.  
Note that for this 1608 size, the DC current at which saturation occurs is lower than the rated AC current.
4. Saturation Current,  $I_{sat}$ , is the DC current at which the zero current inductance drops by 10% (typ).
5. Operating temperature -25°C to +85°C.
6. For non-standard inductance values, please contact Profec.
